WATER ACTS

NORTH WEST WATER AUTHORITY

DROUGHT ACT, 1976

Proposed Reduction of residual flow in the River Dane

Notice is hereby given that the North West Water Authority have applied to the Secretary of State for an Order under section 1 of the Drought Act 1976 to reduce for a maximum period of six months from the date of the Order the residual flow to which the abstraction of Imperial Chemical Industries Ltd. (I.C.I.) from the River Dane is presently subject as follows:

At the present time I.C.I. are licensed to abstract up to 30·8 million gallons per day from the River Dane at their premises at Ravenscroft. The Company's abstraction is however subject to there being a sufficient head of water over the weir across the River Dane at the Ravenscroft Pumping Station to sustain a downstream flow of six cubic feet per second (approximately 15 megalitres per day).

This application is to reduce temporarily this downstream flow from six cubic feet per second to four cubic feet per second (approximately 10 megalitres per day).

Any objections to the proposed Order must be made in writing to the Secretary of State for the Environment, 2 Marsham Street, London S.W.1, within seven days of publication of this notice and it is requested that a copy of any such objection be sent at the same time to the undersigned.

Should it appear to the Secretary of State that the Order is required to be made urgently if it is to enable the Authority effectively to meet the deficiency of supplies of water referred to above, he may direct that the holding of a public local inquiry or a hearing by a person appointed by him should be dispensed with.

A map showing the location(s) of the above-named reservoir(s) may be inspected during normal office hours for a period of seven days from the publication of this notice at the Authority's offices at Bancroft House, Liverpool Road, Great Sankey and at I.C.I. Limited, Lostock Works, Lostock Gralam, Northwich.
