NOTICE TO MARINERS.

(No. 64.)—GULF OF ST. LAWRENCE.—PRINCE EDWARD ISLAND.

(1.) *East Point—Alteration in Position of Lighthouse, Alterations in Light, and Establishment of Fog-Signal.*

THE Government of the Dominion of Canada has given notice, dated 19th January, 1886, that during the past season the lighthouse and dwellings on East Point, Prince Edward Island, were moved eastward from the positions they previously occupied a distance of about 533 yards :—

The light is, as heretofore, a revolving white light, attaining its greatest brilliancy every three minutes; it is now visible between the bearings of S.E. by S., through west, and E. by N. $\frac{1}{2}$ N. It is elevated 10⁰ feet above high water, and should be seen in clear weather from a distance of fifteen miles.

The lighthouse now stands within 67 yards of the eastern extreme, and 83 yards from the south shore, of East Point. The appearance of the tower is unchanged, but is more conspicuous than formerly, not being hidden by trees; the dwellings, painted white with brown roofs, are situated about 50 yards in rear of the lighthouse.

Position, lat. 46° 27' 15" N., long. 61° 58' 5" W.

Also, that during thick or foggy weather a horn, worked by compressed air (established at East Point in October, 1886), will give a blast of about eight seconds' duration every half minute.

The fog-signal building is painted white, with a brown roof, and stands 33 yards eastward of the lighthouse. These two buildings in line indicate nearly the outer extreme of East Point Reef.

(2.) *Cove Head Outer Leading Light—Alteration in Colour.*

Also, that in the month of September, 1885, the colour of the outer leading light at Cove Head Harbour was changed from blue to green. In other respects the leading lights are unaltered.

NOTE.—As this harbour has only about four feet on the bar at low water, it is used only by fishing boats of light draught, and should not be approached when there is a strong breeze on-shore, as the sea then breaks completely across the entrance.

[The bearings are magnetic, and are given from seaward. Variation 25 $\frac{1}{4}$ ° Westerly in 1886.]

By command of their Lordships,
W. J. L. Wharton, Hydrographer.
