"31.—(1) Where any person purchases or otherwise acquires part of an undertaking, the Board shall determine the amounts of the annual output and export supply standard tonnages of coal and any class of coal of the undertaking which relate to that part of the undertaking, having regard in such determination to the special circumstances of the undertaking or to the matters relevant to such determination as the case may be. Subject as hereinafter provided those amounts shall be the annual output and export supply standard tonnages respectively of coal and that class of coal of that coal mine. The amounts so determined shall be deducted from the respective annual output and export supply standard tonnages of the undertaking and the remainders shall be the respective annual output and export supply standard tonnages of that part of the undertaking which has not been so acquired.

(2) Where an Owner purchases or otherwise acquires any coal mine or part of an undertaking, the annual output and export supply standard tonnages of coal and any class of coal of that coal mine or the amounts determined under sub-clause (1) of this Clause in respect of that part of the undertaking, as the case may be, shall be added to the respective annual output and export supply standard tonnages of coal and that class of coal of the coal mine previously belonging to such Owner to constitute the annual output and export supply standard tonnages of the undertaking."

17. There shall be inserted the following new Clauses, that is to say:—

"33.—(1) Before the 1st day of August, 1936, the Board shall determine the annual basic tonnage of each coal mine.

Subject as hereinafter provided such annual basic tonnage shall be the average annual tonnage of coal supplied for inland supply during the years 1931 to 1935 (inclusive) from that coal mine:

Provided that the Board shall make a special addition in respect of any temporary closing down of the coal mine for more than

14 consecutive working days or of any strike, lock-out, accident or other cause beyond the control of the Owner which prevented or restricted the supply of coal, equal to the average annual additional tonnage which in the opinion of the Board would have been supplied during those years from that coal mine for inland supply but for that temporary closing down, strike, lock-out, accident or other cause.

(2) The annual basic tonnages thus determined by the Board or awarded upon arbitration as hereinafter provided shall come into operation upon the 1st day of August, 1936, and shall remain in force without revision except in the manner hereinafter provided.

(3) If the operation of the Act be extended beyond the 31st day of December, 1937, the Board shall before the 1st day of December, 1937, and subsequently before the 1st day of December in each year make any revision of the annual basic tonnage of each coal mine required on the ground that—

(a) the Owner has persistently failed to supply coal in pursuance of permits issued to him or has persistently requested the Sales Committee not to issue permits to him; or

(b) a new seam has been opened at the coal mine.

(4) The annual basic tonnages determined by the Board under sub-clause (3) of this Clause or awarded under arbitration as hereinafter provided shall come into operation on the 1st day of January, 1938, and subsequently on the 1st day of January in each year and shall, subject to the provisions of the next following Clause, remain in force without revision for a period of one year.

(5) Forthwith upon any determination of annual basic tonnages under this Clause the Board shall send a notice of all such basic tonnages determined to each Owner. If any Owner refers any such determination to arbitration, notice of such reference shall forthwith be sent by the Board to every Owner. The annual basic tonnage of every coal mine shall thereupon be referred to arbitration and the Arbitrator shall determine the annual basic tonnage of each coal mine.

34.—(1) If at any time after 1st January, 1936,

(a) a new colliery has been or shall be opened; or

(b) the working of any colliery has been or shall be recommenced following any abandonment or discontinuance of working;

the Board may from time to time during a period of two years from the opening or re-opening of the colliery (if such colliery forms part of an undertaking) determine the annual basic tonnage of the undertaking, or (if such colliery does not form part of an undertaking) determine the annual basic tonnage of the coal mine. Every such determination shall be made having regard to the development of the colliery and all other relevant circumstances and to the interests of the other Owners.

(2) Where any person purchases or otherwise acquires part of an undertaking the Board shall determine the amount of the annual basic tonnage of the undertaking

which relates to that part of the undertaking and subject as hereinafter provided that amount shall be the annual basic tonnage of that coal mine. The amount so determined shall be deducted from the annual basic tonnage of the undertaking and the remainder shall be the annual basic tonnage of that part of the undertaking which has not been so acquired.

(3) Where an Owner purchases or otherwise acquires any coal mine or part of an undertaking, the Board shall determine the proportion of the annual basic tonnage of that coal mine or of the amount determined under sub-clause (2) of this Clause in respect of that part of the undertaking, as the case may be, which shall be added to the annual basic tonnage of the coal mine previously belonging to such Owner to constitute the annual basic tonnage of the undertaking. Such proportion shall be determined having regard to all relevant circumstances including the probable working life of the coal mine or part of an undertaking so acquired.

35. For the purpose of assisting the Board in any determination of annual basic tonnages any Owner shall upon notice given to him by the Board furnish to the Board within the period specified in the notice, a statement in writing giving any information which the Board may require for that purpose and any Owner who claims that a special addition or a revision under Clause 33 or an adjustment under Clause 34 of the Scheme should be made, as the case may be, shall with such statement furnish to the Board a notice in writing stating the addition or revised or adjusted annual basic tonnage which he claims, together with any evidence required to substantiate the claim.

36.—(1) Within seven days of the date of the notice of any determination of the annual basic tonnage of his coal mine the Owner may give notice in writing to the Board specifying the proportion of such tonnage which he desires to be allocated to each quarter and subject to the approval of the Board such allocations shall be the quarterly basic tonnages of that coal mine. In default of such notice or if the Board do not approve the proportions specified in such notice the Board shall divide such annual tonnage into quarterly tonnages in such proportions as may be fair and equitable. The Board may from time to time revise such quarterly tonnages where it is fair and equitable to do so.

(2) Notice of any quarterly basic tonnage determined under this Clause shall forthwith be given to the Owner.

#### *Permits.*

37.—(1) The supply by Owners of coal from their coal mines shall be regulated by the issue of Permits by the Sales Committee.

The Committee may issue—

(a) a Special Permit for the supply of coal in pursuance of an enquiry made therefor, or

(b) a General Permit for the supply of coal in circumstances such that in the opinion of the Committee it is unnecessary, in order to avoid competition between Owners, that a Special Permit should be issued in respect of each enquiry for coal.

(2) Every Permit shall state—

(a) the name of the Owner to whom it is issued;

(b) the maximum tonnage of coal, and the commercial description of coal, which may be supplied thereunder;

(c) the price below which the coal shall not be supplied, or the actual price at which the coal may be supplied, and the maximum discount, commission, or credit, which may be allowed by the Owner;

(d) the period within which the coal may be supplied, and any limitation upon the tonnages which may be supplied during any part of such period; and

(e) any special conditions of sale.

(3) In addition—

(a) every Special Permit shall state the name of the customer to whom the coal may be supplied; and

(b) every General Permit shall state the class of customer to whom, or the markets in which, the coal may be supplied, and the maximum tonnage of coal which may be supplied to any customer under any one contract. No such tonnage shall exceed forty tons.

(4) Any Permit for the supply of coal for resale by the customer may state—

(a) the market or area in which the coal may be resold; and

(b) the price below which the coal may not be resold, and the maximum discount, commission, or credit, which may be allowed by the customer.

It shall be a term of the Permit that coal shall be supplied by the Owner thereunder only if the customer agrees to observe such conditions.

(5) No Owner shall supply coal from his coal mine otherwise than under and in accordance with the terms of a Permit issued to him:

Provided that an Owner may supply coal without a Permit—

(a) for use in working the coal mine; and

(b) free or at reduced rates for the use of persons who are or have been employed in or about the coal mine and the dependants of persons who have been so employed.

38.—(1) No Owner shall supply coal under a Permit so that the actual consideration received by him is less in value than the price stated in the Permit below which that coal shall not be supplied, or differs from the actual price at which that coal may be supplied, as the case may be; and in particular, no Owner shall make, allow, or give, or agree to make, allow, or give, any gift, discount, commission, rebate, extended credit or allowance in respect of the price, quantity or weight of the coal or otherwise, other than any discount, commission or credit allowed by the Permit.

(2) No Owner shall without the consent of the Sales Committee supply any additional tonnage of coal, or make any allowance or reduction in price, in consequence of complaint by a customer in regard to short weight or the quality of coal in any consignment.

(3) If any part of the consideration payable for any coal supplied under a Permit has not been received by the Owner by the due date, he shall inform the Sales Committee thereof, and shall take such steps as they may direct to enforce the contract.

(4) Any Owner who acts in contravention of any of the provisions of this Clause shall be deemed to have supplied coal otherwise than in accordance with the terms of the Permit issued in respect of the supply of that coal.

39.—(1) For the purpose of ensuring the observance of the conditions upon which the supply of coal by Owners is permitted the Board may keep a Register of distributors. If such a Register is kept the Sales Committee shall not issue a Special Permit for the supply of coal to, or through the agency of, any distributor, whose name is not upon the Register kept for the purposes of this Clause, and no General Permit shall be deemed to authorise the supply of coal to, or through the agency of, any such distributor.

(2) There shall be entered on the Register on the application of any Owner the name of any distributor, who gives to the Board an undertaking in a form prescribed by them—

(a) to observe any conditions relating to the resale of coal by him imposed on him by an Owner by virtue of any Permit; and

(b) to permit such inspection of his books or accounts by an accountant appointed by the Board as may be reasonably necessary to determine whether such conditions have been observed.

If any distributor acts in breach of his undertaking the Board shall remove his name from the Register, unless they are satisfied that the purposes of this Clause will not be prejudiced if his name remains upon the Register.

The name of any distributor which has been removed from the Register shall not be restored nor shall the name of any person controlled by that distributor be entered on the Register unless the Board are satisfied that the purposes of this Clause will not be prejudiced by such restoration or entry.

(3) In this Clause "distributor" includes any exporter, factor, merchant, dealer, or other person, whose business includes the supply of coal.

40.—(1) Permits may be issued upon an application therefor by an Owner or otherwise.

(2) Any Owner who receives an enquiry for the supply of coal from his coal mine (other than an enquiry for coal which he is permitted and intends to supply under a General Permit or without a Permit), shall forthwith inform the Sales Committee thereof, stating by whom the coal is required, and giving particulars of the quantity and description of coal and the date for delivery thereof, and any other particulars which may be required by the Committee.

41.—(1) The Sales Committee shall allocate Permits to the Owners in such manner

as is fair and equitable, and so that as far as possible the Owners can in every quarter supply—

(a) coal for inland supply in proportion to the quarterly basic tonnages of their respective coal mines; and

(b) coal for export supply in proportion to the export supply standard tonnages of their respective coal mines.

(2) The Committee shall also have regard to the customers to whom, and the markets in which, each Owner has been accustomed to sell the coal from his coal mine, and generally to the good will of each Owner.

(3) Before issuing a Permit for the supply of coal otherwise than at a pithead price, the Committee shall consider any representations made by the Owner to whom the Permit is to be issued with regard to the costs and charges which would be incurred by him in connection with the conveyance of that coal.

42.—(1) Any Owner, who is not able or does not intend to supply coal under any Special Permit issued to him or to supply the maximum tonnage permitted thereunder, shall give notice thereof to the Sales Committee as soon as possible after receipt of the Permit, stating the reason therefor.

(2) Each Owner shall forthwith give to the Sales Committee particulars of any agreement for the supply of coal entered into in pursuance of a Special Permit.

(3) Every Owner shall at the end of every month send to the Sales Committee a statement showing the tonnages of each commercial description of coal supplied from his coal mine during that month to each customer and the price therefor together with such other particulars as they may require.

43.—(1) The Sales Committee shall from time to time and as early as possible in each quarter inform each Owner of the total tonnage of coal produced in the District, which the Committee anticipate will be supplied for inland supply from all the coal mines during that quarter.

(2) As soon as possible after the end of each week the Sales Committee shall inform each Owner of the total tonnage of coal produced in the District, supplied for inland supply from all the coal mines during that week.

44. On or before the 1st day of August, 1936, each Owner shall give to the Sales Committee particulars of all agreements made before the 1st day of August, 1936, under which coal from his coal mine is to be supplied after that date (other than agreements in respect of which no Permit is required), and the Committee shall issue a Permit enabling such coal to be supplied in accordance with the agreement:

Provided that in calculating the tonnage of coal to be so supplied the Committee may exclude any tonnage of coal which may be supplied at the option of the Owner.

45. Permits shall not be issued for the supply of coal in such a manner that in any period for which allocations are fixed the

tonnage of coal supplied by Owners under Permits exceeds any allocation in respect thereof.

46. The Board may enter into contracts with any persons for the purpose of facilitating the operation of the provisions of the Scheme."

18. Clause 33 shall have effect as if—

24. For Clauses 38 to 46 there shall be substituted the following Clauses, that is to say:—

#### *Maintenance of Quality.*

"53.—(1) Every Owner shall clean and prepare for the market coal of each commercial description in such a manner as to maintain the usual standard of quality of coal of that commercial description and the Board may formulate a reasonable specification for any commercial description of coal for the purpose of testing that the standard is maintained.

(2) No Owner shall, without the consent of the Board, which shall not be unreasonably withheld, alter the methods employed in the preparation for the market of any coal produced from his coal mine.

(3) The Sales Committee, in fixing in any Permit the price below which any coal shall not be supplied, or the actual price at which any coal may be supplied, shall have regard to any alteration in the methods employed in the preparation of that coal for the market, and any consequent improvement or deterioration in the quality of that coal.

#### *Compensation.*

54.—(1) Forthwith, after the end of each quarter, the Sales Committee shall determine the total tonnage of coal supplied for inland supply from all the coal mines in that quarter. Such total tonnage shall be divided in the proportions of the quarterly basic tonnages of all the coal mines for that quarter, and, subject as hereinafter provided, the tonnage thus calculated for each coal mine shall (subject to any addition or deduction made under the following provisions) be the trade share of that coal mine for that quarter.

Provided that no compensation shall be payable in respect of a deficiency or part thereof (a) due to a request to the Sales Committee by the Owner not to issue any Permit to him, or to the failure of the Owner to supply any coal for which a Permit has been issued to him, unless he shall satisfy the Sales Committee that, having taken all reasonable steps so to supply, such failure was caused by his inability (otherwise than by reason of any temporary closing down of his coal mine for a period of not less than 14 consecutive working days or of any strike, lock-out, accident or other cause beyond the control of the Owner which prevented or restricted the supply of coal from that coal mine during that quarter, to supply coal in accordance with the terms of the Permit, and (b) where it is shewn conclusively that the deficiency was caused by the loss of specific trade to another district;

Provided further that any tonnage in respect of which no compensation is payable under the provisions of this sub-clause shall be divided in the proportions of the basic tonnages of the other coal mines for that quarter and the tonnage thus determined for each coal mine shall be added to the trade share thereof calculated under sub-clause (1) hereof for that quarter.

(3) If in any quarter such total tonnage of coal so supplied from any coal mine is greater than the trade share of that coal mine for that quarter—

(a) such excess, or 3 per cent. of that trade share, whichever is the less, shall be deducted from the trade share of that coal mine for the next ensuing quarter as calculated under this Clause; and

(b) the Board shall debit the Owner with a contribution in respect of any excess exceeding 3 per cent. of that trade share at the rate prescribed in the next following sub-clause.

The remaining Owners shall be associated Owners and the respective residues of such standard tonnages, annual basic tonnage and quarterly basic tonnages after such deductions as aforesaid shall constitute the standard tonnages, annual basic tonnage and quarterly basic tonnages of such associated Owners.

97. If any quota or trade share of associated Owners shall be exceeded all Owners so associated shall be jointly and severally liable to pay to the Board any penalty fixed by the Board as payable in respect of such excess over quota and any premium computed under Clause 122 hereof in respect of any excess over trade share.

Thereupon the Board may authorise an output of coal

or that class of coal from any other coal mine in excess of that permitted by the quota in respect thereof by a tonnage not exceeding that by which the output permitted from the first mentioned coal mine has been reduced.

(2) The Board shall not require any Owner to limit the output of coal or any class of coal from his coal mine to an extent which would prevent or restrict the supply of coal from his coal mine for the purpose of working the mine or for supply free or at reduced rates for the use of persons who are or have been employed in or about the mine and the dependants of persons who have been so employed or for consumption in any excluded works of that Owner, or for supply in pursuance of any Permit issued to him or in due performance of a Pre-control Contract.

*Determination of Basic Tonnages.*

62. Before the 1st day of August, 1936, the Board shall determine the annual export basic tonnage and the annual inland basic tonnage of each coal mine. Such annual basic tonnages shall be the tonnages of coal supplied from that coal mine for export supply and inland supply respectively in the year 1935 after adjustment in manner following, viz. :—

(1) by the addition of tonnage equal to the additional tonnage which in the opinion of the Board would have been supplied in the year 1935 from that coal mine for export supply or inland supply as the case may be but for any strike or lock-out or accident which prevented or restricted the getting of coal from the coal mine for not less than six consecutive working days :

(2) in the case of a coal mine in respect of which a scheme of reorganisation or development was being carried into effect during the year 1935 either—

(a) by such an addition (not exceeding the additional tonnage which in the opinion of the Board would have been supplied in the year 1935 for export supply and inland supply respectively by reason of the better preparation of coal for the market as a consequence of such scheme if such scheme of reorganisation or development had reached on 31st December, 1934, the stage at which it was on the 31st December, 1935,) as the Board shall consider fair having regard to—

(i) the capital expended pursuant to such scheme of reorganisation or development prior to 31st December, 1935 on the provision of plant and equipment for the better preparation of coal for the market, and

(ii) the interests of the other Owners; or

(b) when to facilitate such scheme coal getting from the coal mine or any colliery forming part of the undertaking was stopped for not less than six consecutive working days in the year 1935 by the addition of a tonnage equal to the additional tonnage (if any) which in the opinion of the Board would have been supplied from the coal mine for export supply or inland supply, as the case may be, but for such stoppage :

(3) in the case of a coal mine whose output in the year 1935 fell below the output of such coal mine in any year from 1931 to 1934 inclusive by not less than 20 per cent. owing to exceptional mining difficulties by such an addition (not exceeding the additional tonnage which in the opinion of the Board would have been supplied by such coal mine for export supply or inland supply if such difficulties had been overcome by first January 1935 to the extent that they have been overcome by thirty-first July 1936) as shall be fair and equitable having regard to the interests of the other Owners.

(4) in the case of a coal mine having Excluded Works Tonnage, by the subtraction from the tonnage of coal supplied from the coal mine for inland supply in the year 1935 of the tonnage of coal supplied from such coal mine to excluded works of the Owner of such coal mine in that year for consumption in such works : and

(5) in the case of a coal mine part of the coal from which was supplied for export supply or inland supply in the year 1935 in breach of the provisions of the Scheme relating to minimum prices, by the subtraction from the tonnage of coal supplied from the coal mine in 1935 for export supply or inland supply, as the case may be, of such a tonnage as having regard to the circumstances of the case the Board shall consider just.

63. The annual basic tonnages thus determined by the Board shall come into operation upon the 1st day of August, 1936, and shall remain in force without revision except in the manner hereinafter provided.

64. The Board may from time to time revise the annual export basic tonnage of any coal mine on the ground that there has been an increase or decline in the demand for coal of the District from an export market which was not in the opinion of the Board normal in the year 1935. In making any such revision the Board shall also have regard to—

(a) the extent to which such market was supplied by the coal mine in the years 1933, 1934 and 1935 ; and

(b) the relative share of the export trade of the District enjoyed by such coal mine in those years or any of them.

65. Whenever on a variation as hereinafter provided of the Excluded Works Tonnage of a coal mine such Excluded Works Tonnage has become less than the tonnage of coal supplied from the coal mine for consumption in such works in the year 1935 the Board shall make such an addition to the appropriate basic tonnage of the coal mine as they shall consider fair having regard to the interests of the other owners :

Provided that the annual inland basic tonnage of the coal mine shall not by reason of such addition exceed the largest tonnage supplied from the coal mine for inland supply otherwise than to such excluded works in any one of the years 1931 to 1935 inclusive. On a further variation of such Excluded Works Tonnage the Board shall make such variation subject as aforesaid in such addition as shall be fair having regard to the interests of the other Owners.

66. If the operation of the Act be extended beyond the 31st day of December, 1937, the Board shall before the 1st day of December, 1938, and subsequently before the 1st day of December in each second year make any revision of the annual basic tonnages of each coal mine required on the ground that—

(i) the Owner has persistently failed to supply coal in pursuance of Permits issued to him or has persistently requested the Committee not to issue Permits to him,

(ii) the Owner has permitted the quality of his coal or any of his coal as prepared for market to deteriorate,

(iii) the Owner has supplied coal in excess of his trade share over a period of not less than six months immediately preceding such revision at the written request of the Sales Committee to meet the demands of a particular market or markets which in the opinion of the Sales Committee could not be met from coal mines in the District consistent with the division of trade strictly in accordance with trade shares and such demands are likely to continue.

67. The annual basic tonnages determined by the Board under the last preceding Clause shall come into operation on the 1st day of January, 1939, and subsequently on the 1st day of January in each second year and shall remain in force without revision except as herein provided for a period of two years.

68. Forthwith upon any determination or revision of annual basic tonnages under Clauses 62, 64 and 66, the Board shall send a notice of all such basic tonnages determined to each Owner.

69.—(1) If at any time after the first day of January, 1934, a new colliery has been or shall be opened the Board may from time to time during a period of three years from the opening of the colliery (if such colliery forms part of an undertaking) determine the annual basic tonnages of the undertaking or (if such colliery does not form part of an undertaking) determine the annual basic tonnages of the coal mine.

(2) If any time after the first January, 1934, a closed or abandoned colliery (not being part of an undertaking having an output in the basic period) has been reopened the Board may from time to time during a period of three years from such reopening determine the annual basic tonnages of the coal mine.

(3) Every such determination under this Clause shall be made having regard to the development of the colliery and all other relevant circumstances and to the interests of the other Owners.

70. Where any Owner purchases or otherwise acquires any coal mine the annual basic tonnage and quarterly basic tonnages of the coal mine so acquired shall respectively be added to the corresponding annual basic tonnage and quarterly basic tonnages of any other coal mine belonging to such Owner and constitute the annual basic tonnage and quarterly basic tonnages of the combined undertaking.

71. Where an Owner purchases or otherwise acquires part only of an undertaking for which an annual basic tonnage and

quarterly basic tonnages have been determined the proportion of that annual basic tonnage, and those quarterly basic tonnages to be added to the annual basic tonnages and quarterly basic tonnages of any other coal mine belonging to the same Owner shall be determined by the Board and such amounts shall be deducted from the annual basic tonnage and quarterly basic tonnages of the undertaking of which part has been so acquired.

72. Where any person, other than an Owner, purchases or otherwise acquires part only of an undertaking for which an annual basic tonnage and quarterly basic tonnages have been determined the proportion of that annual basic tonnage and quarterly basic tonnages to constitute the annual basic tonnage and quarterly basic tonnages of the part so acquired shall be determined by the Board and such amounts shall be deducted from the annual basic tonnage and quarterly basic tonnages of the undertaking of which part has been so acquired.

73. For the purpose of assisting the Board in any determination of annual basic tonnages any Owner shall upon notice given to him by the Board furnish to the Board within the period specified in the notice, a statement in writing giving any information which the Board may require for that purpose and any Owner who claims that an addition, revision or variation should be made as the case may be, shall with such statement furnish to the Board a notice in writing stating the addition or revised or varied annual basic tonnage which he claims, together with any evidence required to substantiate the claim.

74. Within seven days of the date of the notice of any determination of the annual basic tonnages of his coal mine the Owner may give notice in writing to the Board specifying the proportion of such tonnages which he desires to be allocated to each quarter and subject to the approval of the Board such allocations shall be the quarterly basic tonnages of that coal mine. In default of such notice or if the Board do not approve the proportions specified in such notice the Board may, and in the case of a coal mine having Excluded Works Tonnage shall divide such annual tonnages into quarterly tonnages in such proportions as may be fair and equitable. The Board may from time to time revise such quarterly tonnages where it is fair and equitable to do so.

Notice of any quarterly basic tonnage determined under this Clause shall forthwith be given to the Owner.

#### *Excluded Works.*

75. Any Owner who claims to be the Owner of or to control or to be controlled by the Owner of any works and who desires to supply coal to those works for consumption therein shall notify the Board within the time hereinafter mentioned and shall give such information about those works and the relationship between those works and his coal mine as the Board may require. In the case of an Owner who was the Owner of or who controlled or was controlled by the Owner of any works to which he supplied coal for consumption in such works in the

year 1935 the Board shall only have regard to a claim made before 31st July, 1936, unless the Board shall extend the time for making such claim for a period not exceeding one month, and in any other case the Board shall only have regard to a claim made within six months of the Owner making the claim first having become the Owner of or controlled or become controlled by the Owner of such works. If they consider any such claim established the Board shall declare those works to be excluded works of that Owner for the purposes of the Scheme.

76. If at any time an Owner ceases to be the Owner of or to control or to be controlled by the Owner of any excluded works the Board shall declare that such works shall cease to be excluded works.

77. Where the Board have declared any works to be excluded works of any Owner they shall forthwith determine the annual tonnage of coal (herein referred to as Excluded Works Tonnage) which may be supplied in any year from his coal mine for consumption in his excluded works.

78. Such Excluded Works Tonnage shall be determined having regard to the tonnage of coal (if any) supplied from the coal mine during the year 1935 for consumption in those works and to the prospective demand for coal from the coal mine for consumption in those works.

79. Any Excluded Works Tonnage may be varied by the Board at any time—

(a) if the prospective demand for coal from the coal mine for consumption in those works in any year differs from the annual tonnage in respect thereof; or

(b) if the Board declare that any other works are excluded works of that Owner or that any works cease to be excluded works of that Owner.

Such variation shall take effect at the beginning of the next succeeding allocation period.

80. Notice of any determination of the Excluded Works Tonnage of any coal mine shall forthwith be given to the Owner thereof.

81. Each Owner may not less than seven days before the beginning of each quarter give notice in writing to the Board specifying the proportion of such Excluded Works Tonnage which he desires to be allocated to that quarter and subject to the approval of the Board such allocation shall be the quarterly tonnage which may be supplied from the coal mine of that Owner in that quarter for consumption in his excluded works. In default of such notice or if the Board do not approve the proportion specified in such notice the Board shall allocate such quarterly tonnage as may be fair and equitable, and notice thereof shall forthwith be given to the Owner.

82. Any Owner shall upon notice given to him by the Board furnish in writing within the period specified in the notice any information the Board may require to assist them in any determination of such annual or quarterly tonnages.

(b) the Board shall debit the Owner with a premium as hereinafter provided in respect of the surplus tonnage if any remaining after such deduction.

112.
