TREASURY

TREASURY MINUTE dated 23rd July 1991.

The Lords Commissioners of Her Majesty's Treasury read section 3(2) of the National Loans Act 1968 (1968 C.13 as amended) whereby any sums borrowed from the Public Works Loan Commissioners shall bear interest at such rates as the Treasury may determine from time to time in accordance with section 5 of the said Act.

My Lords understand that the Public Works Loan Commissioners will be operating arrangements under which local authorities are permitted to borrow from the Commissioners up to a specified quota at a certain fixed rate of interest and in excess of such quota at one of two higher fixed rates.

In accordance therewith the Chancellor of the Exchequer now recommends that with effect from 24th July 1991 and until the coming into operation of a further determination:

- (i) The rate of interest applicable to any such fixed rate loan will be that in force on the day the authority applies to borrow or, if the application is before noon three working days before the loan is credited to the account of the authority's banker, the rate in force at 11 a.m. two banking days before credit day;
- (ii) Different rates of interest shall be charged on such fixed rate loans according to whether the principal of a loan is repaid by instalments or at maturity and, if repaid by instalments, whether by equal instalments of the principal with interest paid on the decreasing balance of the principal (E.I.P.), or by instalments of equal repayments of the principal and interest paid thereon (E.R.);
- (iii) The rates of such interest shall be:

ROAD TRAFFIC REGULATION ACT 1984, SECTION 14

Temporary Closures of the M4 Motorway between Junctions 1 and 3

The Secretary of State for Transport hereby gives notice that, to enable works of maintenance and repair to be carried out, he intends to make an Order the effect of which would be to authorise the closure of lengths of the M4 Motorway between Junctions 1 and 3.

The closures would apply only when the appropriate traffic signs were displayed, for periods between 9 p.m. and 6 a.m. the following morning on Monday nights to Friday mornings from 12th August 1991, to 28th February 1992.

Eastbound and westbound carriageways would not be closed simultaneously, and no closures would apply on bank holidays. The press and media will announce the closure periods in advance giving more details.

When the motorway is closed, westbound through traffic would be diverted to Chiswick Roundabout along the Great West Road (A4), Bath Road (A4) and The Parkway (A312) to Junction 3. Eastbound through traffic would be diverted along the same roads in the opposite order and direction.

On occasions when only the elevated section of the motorway between junctions 1 and 2 is closed, diverted traffic would use the A4 at ground level.

OFTEL

NOTICE UNDER SECTION 12(2) OF THE TELECOMMUNICATIONS ACT 1984

Proposed Modifications of the Conditions of the Licences of British Telecommunications plc ("BT") and Mercury Communications Limited ("Mercury").

Whereas the Director General of Telecommunications ("the Director") in accordance with section 12(2) of the Telecommunications Act 1984 ("the Act") gave notice on 7th March 1991 that he proposed to modify the Conditions of the Licences granted to:

- (a) British Telecommunications on 22nd June 1984 ("the BT Licence"); and
- (b) Mercury on 5th November 1984 ("the Mercury Licence")

under section 7 of the Act for the running of the telecommunication systems specified in Annex A to each of those Licences, and representations and objections were received by the Director in respect of those proposed modifications;

And whereas, having considered those representations and objections, the Director has concluded that it would be appropriate for the proposed modifications to be made in a revised form;

Now therefore, in accordance with section 12(2) of the Act, the Director hereby gives notice that he proposes to make modifications of the Conditions of both the BT Licence and the Mercury Licence.

1. The principal modifications which the Director proposes to make, the effect of the modifications and the particular reasons why he proposes to make them are set out, as regards both the BT Licence and the Mercury Licence, in Schedule 1 below and, as regards the BT Licence only, in Schedule 2 below. The Director also proposes to make a number of minor and consequential modifications for the purposes of the principal proposed modifications.
2. The reasons why the Director proposes to make the modifications as a whole are to promote further competition in the provision of telecommunication services, to ensure that the regulatory arrangements provide for effective competition, including competition from new telecommunications operators who may wish to use the services and facilities of BT and Mercury, and to afford greater choice and quality of service and more competitive prices to users of telecommunications services.
3. The Director is required by section 12(2) of the Act to consider any representations or objections which are duly made and not withdrawn.
4. Representations or objections to the proposed modifications may be made to G. P. Knight, Office of Telecommunications, Export House, 50 Ludgate Hill, London EC4M 7JJ, no later than 27th August 1991.

Copies of the proposed modifications may be obtained from the above address (telephone 071-822 1665).

SCHEDULE 1

Proposed Principal Modifications of Conditions of both the BT Licence and the Mercury Licence

(i) *Interconnection of Public Networks*

The proposed modification would enable the Director, if necessary, to ensure that the costs of interconnection were apportioned equitably between the operators of public networks to reflect the benefits to both parties; it would strengthen his enforcement powers if interconnection agreements were not being carried out effectively; and it would enable him, with a view to minimising delay, to determine standard terms for a class of similar types of interconnection. Special additional provisions, as described in paragraph (iv) of Schedule 2 below, would be made in relation to the BT Licence.

(ii) *Equal Access*

A limited form of equal access is available under existing Licence Conditions. The proposed modification would empower the

Director to impose an explicit obligation on BT and Mercury to provide facilities for a more complete form of equal access, such that exchange line customers have greater opportunity to choose between competing long distance operators, to the extent that the Director has determined that it is justified on cost benefit grounds and he is of the opinion that sufficient arrangements have been made in relation to the pricing of BT's telecommunication services for the purpose of achieving fair competition. Those arrangements would need to relate to the scope for the rebalancing of BT's charges (as affected by regulatory controls) and any access charges payable to BT under Condition 19 or to Mercury under Condition 18. The Director would have the power to determine those terms and conditions relating to the equal access which BT or Mercury have, within a reasonable time, failed to agree, and he would also have the power to determine the manner in which the costs should be apportioned between the Licensee and the operator requesting access to ensure that the costs borne by that operator equitably reflect the benefits to that operator and its customers. The Director's power to direct the provision of equal access would take effect only after the end of 1992 and, in the case of Mercury, after Mercury had achieved a 25 per cent. share of the exchange lines in any particular locality.

(iii) *Numbering*

The proposed modification would allow the Director to establish a national numbering plan and to allocate numbers or blocks of numbers within that plan. The reason for this is that numbering arrangements are critical to the effective working of competition, and the allocation of numbers should not therefore be under the control of a particular operator or operators. The modification would also enable a limited degree of portability of numbers to be achieved, provided that was technically feasible and not disproportionately costly. Customers would be able to change from one network operator to another without changing numbers, if they were remaining in the same premises.

(iv) *Access to Data Bases*

The proposed modification would require each Licensee to allow access to its data bases by other operators of public telecommunication systems, on reasonable terms, for the purpose of dealing with directory enquiries and routing calls. The operators of interconnected networks would not be able to provide a complete service to their customers in the absence of such an obligation, and so would be unable to compete effectively.

(v) *Essential Interfaces*

The proposed modification would give the Director the power to specify essential interfaces which the Licensee shall make available in compliance with the appropriate European or other international standard. In the absence of such a standard, the Director would have the power to prescribe one. The reason for this proposed modification is to ensure that the interfaces in question have the characteristics necessary for the development of effective competition.

(vi) *Provision of Private Circuits to Other Public Telecommunications Operators ("PTOs")*

The proposed modification would require both BT and Mercury to provide private circuits to other PTOs on request, unless the Director was satisfied that any reasonable demand was, or would be, met by other means or that the PTO in question would be unduly reliant upon services provided by BT or Mercury, as the case may be, in satisfying its own licence obligations. The Director would have the power to determine that BT or Mercury, as the case may be, should modify any relevant published charge if he was satisfied that another PTO had established a prima facie case that it was unreasonable. The reason for this modification is to create a framework under which PTOs, including BT or Mercury, would not be required to provide their own circuits when it would be more efficient for the PTO in question to pay for BT or Mercury to provide them.

(vii) *Financial Information*

The proposed modification to the BT Licence would impose an explicit obligation on BT to furnish the Director, within 6 months of its financial year end, with statements showing its turnover, operating costs and profit, disaggregated to show those figures by types of service, together with a certificate from BT's auditor giving his view on the acceptability of the methods of allocation and the application of those methods for the preparation of the statements. The proposed modification to the Mercury Licence would impose similar obligations, but only in the event of an explicit request from the Director. The reason for the proposed modifications is to ensure that the Director receives adequate and timely information about services provided by the operators who have, or may achieve, a substantial share of the market or a particular sector of it, in order that he may use that information as a basis for regulatory decisions.

(viii) *Metering and Billing*

The proposed modification would require BT and Mercury to apply for approval (under section 24 of the Act) in accordance with a time-scale to be specified by the Director of meters of a description specified by him in use on a date specified by him. BT and Mercury would also have to apply for approval of meters of a specified description not in use on that specified date no later than a date further specified by the Director, or not less than 6 months before the Licensee in question intended to bring that meter into use, whichever should be the later. BT and Mercury would be prohibited from keeping in or bringing into use after a date specified by the Director any description of meter specified by him which is not approved or for which the Licensee in question has not made an application for approval.

Where approval is not granted or is withdrawn, the Licensee would be required to inform the Director of the remedial action it proposes to take and of the anticipated date of approval or of the programme for the cessation of use of that description of meter.

BT and Mercury would also be prohibited from rendering bills which were higher than was warranted by the extent of telecommunication service which the Licensee had actually provided. The Licensee would be obliged to have billing processes which would facilitate compliance by the Licensee with this billing obligation. The Licensee would be afforded a defence of having taken all reasonable steps to prevent a contravention of its billing obligations.

The Licensee would be obliged to keep records for the purpose of enabling the Director to check that the billing process met the requirements of the Licence.

Powers to require information and of examination, inspection and testing would be conferred on the Director so as to allow him to verify that the billing process met the requirements of the Licence.

(ix) *Service Providers/Retailers*

The proposed modification would require BT and Mercury to deal with retailers of their services on reasonable terms. It would give the Director the power to require BT or Mercury, as the case may be, to modify any charge, term or condition relating to the supply of telecommunication services to retailers if, following representations from a retailer, he was satisfied that it was unreasonable. The reason for the modification is to create a framework to enable retailers (if any emerge) to resell services, or to offer packages of services, which could reflect any discounts they were able to obtain as bulk purchasers from BT or Mercury.

(x) *Notice of Price Changes*

The first proposed modification would make it clear that charges, terms and conditions for new services should be notified to the Director at the time the service is first provided. A second proposed modification would require that where BT and Mercury notify price changes in accordance with the existing obligations in Condition 16 of the BT Licence and Condition 15 of the Mercury Licence by publishing a price list, the list clearly identifies the new prices and their operative date. The reason for the first proposed modification is to ensure that the Director is notified promptly of the prices charged by BT and Mercury for new services, and the reason for the second modification is to enable customers readily to identify price changes.

SCHEDULE 2

Additional Proposed Principal Modifications of Conditions of the BT Licence Only

(i) *New Price Control Rule*

There are two existing price control rules in Condition 24A of the BT Licence. The first rule limits the extent to which BT may increase, or obliges BT to reduce, the aggregate price of a "basket" of certain main services, in any year of the four years ending on 31st July 1993, to 4.5 percentage points below the percentage change in the Retail Prices Index (RPI) in the year to the previous 30th June. The services to which this rule applies are exchange line rentals and inland calls (except calls from public call boxes). The proposed modification would bring international calls (except from public call boxes) within the "basket" of controlled services and would limit the extent to which BT could increase, or would oblige BT to reduce, the aggregate price of this enlarged "basket" of services to 6.25 percentage points below the percentage change in the RPI for each year of the final 2 years, commencing 1st August 1991.

The second price control rule limits the extent to which BT may increase, or obliges BT to reduce, the aggregate charge for a "basket" of its main inland private circuit services, in any year of the three years ending on 31st July 1993, to the percentage charge in the RPI in the year to the previous 30th June. The proposed modification would bring all BT's main international private circuit services within the "basket" for the final 2 years, commencing 1st August 1991.

The reason for the proposed extensions of the existing rules in the Licence is that BT's profits on its international services have increased significantly since the major review of the first price control rule in 1988, and the Director accordingly considers that BT's prices for its main international services should now be subject to control.

(ii) *Alternative Tariffs/Differential Charging*

The first proposed modification would recognise explicitly that the offering of alternative tariffs, in respect of services provided either by means of BT's public switched telecommunications network or by means of private circuits, would not be regarded as undue discrimination (for the purposes of Condition 17) as between different classes of customers in respect of services provided by each of those means, provided that:

- (a) the effect was to achieve greater uniformity of the ratios of the revenues accruing from the different classes of customer (in respect of services received by each of those means) to the incremental costs of providing the relevant services to those classes of customer; and
- (b) neither service revenue by class of customer nor charges for any category of call are decreased below the incremental cost of provision.

The second proposed modification provides for the Director to issue guidelines, agreed with BT, which will specify, inter alia, the levels below which any charge or combination of charges may be set for the purpose of alternative tariffs, and will provide for the gradual introduction of such differential tariffs over a period of 5 years commencing on 1st August 1991.

The third proposed modification makes it clear that BT will be deemed not to have shown undue preference or undue discrimination in relation to differential charging, provided that:

- (a) the alternative tariffs comply with the guidelines;
- (b) the increase in the Median Residential Bill does not exceed the increase in RPI during the currency of the existing price control rules;
- (c) any increase in standard residential and single line business exchange line rentals or standard connection charges shall not exceed the percentage change in RPI by more than 2 percentage points during each year of that period; and
- (d) that the same charges for business customers with more than one line shall not exceed the percentage change in RPI by more than 5 percentage points during that period.

The reason for the proposed modifications is to make clear the extent to which BT may introduce differential charging in an increasingly competitive market, and to control the speed of change with the objective of promoting effective competition.

(iii) *Notice of Price Changes*

The proposed modification would require BT to provide individual customers, on request, with advance details of increases in exchange line rental charges, telephone call charges and Directory Enquiry charges. The reason for this modification is to give customers the opportunity of budgeting for their use of the telephone service.

(iv) *Interconnection of Public Networks*

The modifications outlined in the notice published by the Director on 7th March 1991, would have obliged an operator connecting with BT, in circumstances where the Director determined that BT's interconnection costs should be apportioned between BT and that operator, to pay to BT as part of that apportionment a contribution towards any losses incurred by BT in respect of the provision, use and maintenance of exchange lines ("the Access Deficit"). Having considered the representations and objections received by him in relation to the modifications originally proposed, the Director now proposes the modifications described below.

When calculating the interconnection charges payable by an operator interconnecting with any of BT's Applicable Systems, the Director would be able to determine that such operator should make no, or only a partial, contribution towards BT's Access Deficit. For wire-based operators this would apply only in respect of the first 10 per cent. of that operator's market share. Should however BT's market share fall below 85 per cent., BT would be entitled to a full contribution towards its Access Deficit in respect of competitors' market shares in excess of 15 per cent. Full access deficit contributions would be payable on traffic handled through equal

access arrangements and on all interconnected traffic by competitors whose market shares had exceeded 25 per cent. Additionally, in the event of restrictions affecting BT's ability to rebalance between call charges and rentals being removed, the operator would no longer be obliged to make any contribution towards BT's Access Deficit.

Where the Director determines any charges payable by BT to another interconnected operator he would be required to include terms and conditions appearing reasonably necessary to him to secure that any charge payable in respect of the conveyance of any message should cover (a) the operator's fully allocated costs of conveyance calculated on an historic cost basis (including a full contribution to relevant overheads) and (b) a reasonable rate of return on attributable assets applied to the relevant capital employed. In addition, the Director would have power to include in any such determination a requirement for BT to pay a contribution towards the access deficit of the operator not exceeding the operator's contribution to BT's Access Deficit.

The reason for this new proposed modification is to ensure an equitable distribution of costs between operators whilst promoting further competition.

Notice is hereby given that East Sussex County Council have made an order on 24th July 1991, coming into force on 29th July 1991, under sections 84(1) and (2) of, and Part IV of Schedule 9 to the Road Traffic Regulation Act 1984, as amended, which amends "The East Sussex (Roads at Heathfield) (40 m.p.h. Speed Limit) Order 1984". The amendment alters the length of the 40 m.p.h. speed limit on the A267 Horam Road, Heathfield by a distance of 10 metres, so it is effective as follows:

Horam Road, A267 (40 m.p.h. Speed Limit), from a point 25 metres east (presently it is 15 metres) of its junction with the centreline of Sheepsetting Lane, westwards to a point 35 metres east of the western boundary of the property known as "Snashall's Cottage".

This enables the appropriate traffic signs to be resited in a more visible location.

A copy of the Order, together with a plan of that length of road affected, and a statement of the reasons why the county council made this Order, may be examined at my office between the hours of 9 a.m. and 4 p.m. on Monday to Friday inclusive until 4th September 1991.

Any person wishing to question the validity of the Order or any of its provisions, on the grounds that it is not within the powers conferred by the Road Traffic Regulation Act 1984 or on the

grounds that any requirement of that Act or of any Instrument made under it has not been complied with in relation to the Order, may within 6 weeks of 24th July 1991, apply to the High Court for this purpose.

EAST SUSSEX COUNTY COUNCIL

The County Council of East Sussex (Built-up Areas) Order 1936, Amendment Order 1991

Notice is hereby given that East Sussex County Council have made an Order on 24th July 1991, coming into force on 29th July 1991, under sections 82(2) and 83(2) of, Part IV of Schedule 9 to, the Road Traffic Regulation Act 1984, as amended, which amends part of "The County Council of East Sussex (Built-up Areas) Order 1936". Part of that Order derestricted the A265 Burwash Road, Heathfield, from a point level with the street lamp opposite the "Crown Hotel" to the crossroads at Mutton Hall Hill/Tower Street.

However, to improve road safety that length of the A265 Burwash Road, Heathfield, from its junction with Tower Street, to a point 140 metres east of that junction, has been made subject to a 30 m.p.h. speed limit (due to shortening the length of derestriction).

A copy of the Order and plan showing the length of road affected, a statement of reasons and details of that part of the 1936 Order revoked, may be examined at my office between the hours of 9 a.m. and 4 p.m. on Monday to Friday inclusive until 4th September 1991.

Any person wishing to question the validity of the Order or any of its provisions, on the grounds that it is not within the powers conferred by the Road Traffic Regulation Act 1984, or on the grounds that any requirement of that Act or of any Instrument made under it has not been complied with in relation to the Order, may within 6 weeks of 24th July apply to the High Court for this purpose.
