ENVIRONMENT AGENCY

Drought permit under Schedule 22 of the Environment Act 1995 (section 79A of the Water Resources Act 1991)

Take notice that, due to the exceptional shortage of rain during 1995 and 1996, South East Water Limited, of 14 Upperton Road, Eastbourne, East Sussex, is applying to the Environment Agency for a Drought Permit. This Permit is required to assist in the winter refill of Ardingly Reservoir near Haywards Heath, West Sussex, and therefore to ensure that a sufficient supply of water is available to meet water supply demands in 1997. The measures proposed are as follows:

1. *River Ouse*, to amend the Company's existing licence No. 10/41/283508 which effect on 9th September 1974, which maintains a minimum residual flow of 13.6 megalitres per day below the confluence of the Shell Brook and the River Ouse in the Parish of Ardingly, such that the flow is reduced to 7 megalitres per day. This relaxation to apply from 1st January 1997 to 30th April 1997.

2. (a) *River Ouse*, to amend the Company's existing licence No. 10/41/283507 which took effect on 9th September 1974, which allows abstraction at Ardingly when the flow at the Ardingly gauging station is above 12.7 megalitres per day, such that abstraction is permitted when the flow is above 6.1 megalitres per day. This relaxation to apply from 1st January 1997 to 30th April 1997.

2. (b) *River Ouse*, to amend the Company's existing licence No. 10/41/283507 which took effect on 9th September 1974, which allows abstraction at the Ardingly of 50% of the flow in excess 12.7 megalitres per day, such that 100% of the flow in excess of 6.1 megalitres per day may be abstracted. This relaxation to apply from 1st January 1997 to 30th April 1997.

The other conditions of licences 10/41/283508 and 10/41/283508 will remain unchanged, so that the maximum abstraction from the River Ouse will continue to be 45 megalitres per day (16,425 megalitres per year implicit).

The effect of the licence condition relaxations above will be to allow the Company increased flexibility to achieve the vital objective of refilling Ardingly Reservoir whilst minimising the effects of the natural regime of flows in the River Ouse below the confluence of the Rivers Ouse and Shell Brook.

To guard against any potential detrimental effects on the river, mitigation contingency measures will be undertaken by South East Water to include:

- (i) additional monitoring of river flows;
- (ii) provision for releases from Ardingly Reservoir of 10% of any additional water abstracted to be made available at the discretion of the Environment Agency to support the natural regime and to be in addition to those contained within the existing licences.

Copies of the plan showing the area affected by this notice may be inspected by any person, free of charge, during all reasonable office hours for a period of 7 days from the date of publication or service of this notice, at the Company's area offices at 107 South Road, Haywards Heath, and 77 High Street, Uckfield.

Any objections may be made in writing to the Environment Agency at Guildbourne House, Chatsworth Road, Worthing, West Sussex BN11 1LD, marked for the attention of John Ellis. Such objections should reach the Agency not later than 7 days from the date of publication or service of this notice.
