Notice is given, as required by Schedule 10 of the Water Resources Act 1991, that the following applications have been made to the Environment Agency, South West Region.

South West Water Limited has applied for two Consents to Discharge and a modification to an existing Consent to Discharge from Lower Clovelly, Devon.

Sewage from Lower Clovelly currently discharges into Bideford Bay with no treatment. The National Environment Programme requires primary treatment for Lower Clovelly sewage under the Urban Waste Water Treatment Directive. In order to meet these requirements, South West Water Limited propose to install two new Pumping Stations (PS) to transfer the sewage to a new Sewage Treatment Works (STW).

It is proposed that the PSs will both have a storm and emergency overflow. Emergency overflow operation only occurs as a result of mechanical or electrical failure and it is proposed the PSs will be equipped with telemetry to warn of failure, back-up pumping facilities, emergency power connection and storm/emergency storage. The proposed new STW will treat all flows arriving at the works to discharge a screened settled final effluent (primary treated). These proposals should result in an environmental improvement over the current situation, replacing the existing continuous crude sewage discharge with one primary treated discharge and associated intermittent discharges.
