PETROLEUM (PRODUCTION) REGULATIONS 1976

The Secretary of State for Energy is prepared to receive applications in accordance with the Petroleum (Production) Regulations 1976 (S.I. 1976 No. 1129) for petroleum production licences in respect of the blocks to which the numbers specified in Schedule 1 to this Notice have been assigned on a map deposited in the Library at the Department of Energy, Thames House South, Millbank, London SW1P 4QJ. The map may be inspected by prior appointment (tel: 01-211-3394) between 09.30 and 1700 hours Monday to Friday until 4th October 1976. Copies of the map may also be inspected by prior appointment at the offices of the Offshore Supplies Office of the Department of Energy, Alhambra House, 45 Waterloo Street, Glasgow G2 6AS (tel: 041-221-8777, ext. 286), and at Inverlair House, West North Street, Aberdeen (tel: 0224-21808); the Welsh Office, Cathays Park, Cardiff, CF1 3NQ (tel: 0222-28066, ext. 326); and at the Department of Commerce, Chichester House, 64 Chichester Street, Belfast BT1 4JX (tel: 0232 34488, ext. 418). Applications should be submitted on the form specified in Schedule 3 to the Petroleum (Production) Regulations 1976. Copies of the form may be obtained from the Department of Energy, Thames House South, Millbank, London SW1P 4QJ.

2 Applications shall be delivered during normal business hours up to 1200 hours on 5th October 1976 to the Department of Energy at Thames House South, Millbank, London SW1P 4QJ, together with a payment in respect of the appropriate application fee. Applicants should indicate any preference which they attach to the blocks to which their application relates, and should indicate if blocks are applied for as alternatives.

3 Licences will be granted on the basis that the British National Oil Corporation (BNOC), or one of its subsidiaries, is from the grant of the licence a co- licensee entitled to a 51% share in all the benefits of the licence, except

- (a) that where another state corporation or subsidiary of such a Corporation is also to be a co-licensee, the combined share to be held in the licence by that other corporation or its subsidiary, and the BNOC or its subsidiary, shall total 51%; and
- (b) where the Secretary of State decides to grant a licence solely to a state corporation or its subsidiary.

4 The consideration required in respect of production licences granted as a result of this invitation will be:

- (a) in respect of the first period of four years of the licence a non-recurrent fee payable upon the grant of the licence of eighty pounds for each square kilometre comprised in the licence area; and in respect of any second period of three years, a non-recurrent fee payable at the end of the fourth year of one hundred and twenty pounds for each square kilometre comprised in the continuing part;
- (b) in respect of the first year after the expiry of the second period (on exercise of the option to continue as to the remaining period of the licence) the sum of two hundred pounds for each square kilometre in the continuing part; in respect of the second year four hundred pounds, and similarly by annual increments of two hundred pounds until an annual sum of three thousand pounds will be payable for each square kilometre comprised in the licensed area;
- (c) a royalty at the rate of 12½ per cent, either in kind or by value on all quantities of petroleum won and saved.

Licences granted may be subject to special conditions governing the notice required for, and the timing and circumstances of, drilling.

5 Applicants will be judged against the background of the continuing need for expeditious, thorough and efficient exploration to identify oil and gas resources of the UK Continental Shelf, and the following factors will be particularly borne in mind when examining applications:

- (a) technical competence to undertake a programme of exploration and production;
- (b) capability to produce funds commensurate with work programme obligations in respect of initial exploration and the extent of access to adequate funds in the event of a commercial discovery being made;
- (c) where the applicant already holds or has held a licence, his overall performance to date in meeting licence obligations;
- (d) exploration already done by or on behalf of the applicant which is relevant to the areas applied for;
- (e) the extent of the contribution which the applicant has made or is planning to make to the economy of the UK, including the strengthening of the UK balance of payments and the growth of industry and employment;
- (f) where a body incorporated in a country outside the United Kingdom applies for a licence or holds a controlling interest in the applicant, how far equitable treatment is afforded in such other country;
- (g) the degree to which the applicant, or any existing licensee in whom he has a controlling interest, or any existing licensee who has a controlling interest in the applicant, has demonstrated his agreement to the conceding to the State a majority share in any discovery made under existing licences;
- (h) whether the applicant subscribes to the Memorandum of Understanding agreed by the Secretary of State and United Kingdom Offshore Operators Association to ensure that full and fair opportunity is provided to UK industry to compete for orders of goods and services. Where the applicant is an existing licensee, his past performance in providing full and fair opportunity to UK industry will be taken fully into account;
- (i) whether the applicant is willing to grant reasonable access to representatives of independent trade unions to his offshore installations, having in mind the Government's objective to negotiate a memorandum of understanding on this matter.

6 The Secretary of State will in due course notify those applicants who are being favourably considered for the grant of a licence that they will be offered a licence if (a) they settle a form of operating agreement with the BNOC to the satisfaction of the Secretary of State and (b) in association with the BNOC, they agree with the Secretary of State an acceptable work programme for the prospective licence. In respect of the settlement of both the operating agreement and the work programme, the Secretary of State will wish to be satisfied that adequate exchange of information between the BNOC and the prospective licensee takes place to ensure that negotiations for this purpose are meaningful. Guidelines as to the type of arrangements which the Secretary of State expects to be included in the operating agreements are set out at Schedule 2.

7 The Secretary of State will advise applicants of his decision in due course.

SCHEDULE 2

Guidelines as to the Relationship between BNOC and Co-Licensees on Licence Activities

BNOC to be a Co-licensee

1 Licences will be granted on the basis that the British National Oil Corporation (BNOC), either directly or through subsidiaries, is a co-licensee from the outset. It will therefore be necessary for applicants for licences, who have been notified that their application is likely to be successful, to settle a form of operating agreement with BNOC in advance of the grant of the licences.

Nature of the Guidelines

2 In exercising his discretion as to the grant of licences, the Secretary of State will wish to examine the form of the operating agreement settled between BNOC and its proposed co-licensees in the licence. The Secretary of State will expect to see that the agreement incorporates the substance of the guidelines set out hereunder but he will be prepared exceptionally to consider variations which the proposed parties can satisfy him are reasonable, and which are consistent with the national interest, including any which may be necessary in circumstances where the subsidiaries of BNOC or of the British Gas Corporation (BGC) are involved.

BNOC's share in the licence

3 The form of the agreement is to provide that BNOC is to be entitled to a 51% share in all the benefits of the licence, including a corresponding share of the petroleum produced and the income which accrues from petroleum discoveries within the licensed area; except where BNOC decides not to participate in a development, in which case the arrangements should be as described in paragraph 7 below.

Operating Committee

4 BNOC is to be entitled, from the date of issue of the licence, to a vote, appropriate to its having a 51% share, on any Operating Committee which is set up. It will be fully involved before decisions are taken. It will nominate

a representative (and alternates) to attend all meetings of the Committee, and any sub-committees. BNOC's nominated representative will be entitled to cast BNOC's 51% vote after taking part in the appropriate discussions in respect of both exploration and development, save as provided in paragraph 7 below.

Decisions of the Committee

5 BNOC should not be able to decide questions brought before the Committee solely by the use of its majority vote, nor should holders of small percentages of the licences have a power of veto. It should be left to the parties including BNOC to decide upon suitable arrangements for voting by reference to these parameters. Different voting arrangements for different kinds of decisions would be acceptable in appropriate cases. For example if majority decisions are to be arrived at on the basis of percentage votes, arrangements requiring votes representing no less than 60% of the shares in the licence and no more than 90%, would be regarded as reasonable. Arrangements requiring votes exceeding 90% would not generally be regarded as satisfactory, except where there are only two co-licensees, including BNOC, in which case decisions could be required to be unanimous. Where majority decisions could not be obtained, work might be able to proceed under sole risk arrangements—see paragraph 11.

BNOC's liability to contribute

6 BNOC is to be liable for its share of expenditure properly incurred in the licensed area, except that related to (a) "sole risk" exploration or appraisal in which BNOC has decided not to join; or (b) the development of a discovery in which the Corporation has decided not to participate.

7 Following a decision by BNOC not to be involved in any particular development, its co-licensee(s) could proceed with the development under the sole risk arrangements. BNOC should continue to be able to attend all meetings, to receive information about the development and to take part in discussions. BNOC would not be entitled to a share in the petroleum produced from that development; nor a share in the ownership of assets relevant to that development; nor to a vote on matters arising in respect of that development: save in the event it rejoined the venture under sole risk provisions included in the agreement, as provided for in paragraph 11 below.

8 In respect of

- (a) exploration work carried out under the licence; and
- (b) appraisal work undertaken on a discovery before the Corporation decides whether to participate

the Corporation will pay its share of expenditure as it is incurred.

9 In the event of BNOC deciding to participate in the development of a discovery, the method under which the Corporation is to pay its share of expenditure on the discovery and its development following the decision to participate shall be a matter for BNOC: the detailed arrangements for payment will be for negotiation between the Corporation and its co-licensee(s). If BNOC's share of expenditure is not to be paid at the time it is incurred, interest shall be chargeable to the Corporation, at a commercial rate until payment is made.

Programmes of Work

10 The joint licensees should be entitled to agree by majority decision (see paragraph 5) programmes of work to be carried out other than at sole risk under the licence.

Sole Risk

11 The agreement should contain sole risk arrangements including a requirement that the "sole risk licensee" is to indemnify the other co-licensee(s) against all claims or proceedings brought by a third party arising out of the "sole risk operation"; and against all damages and costs or losses by interference caused to Approved Work Programmes. The sole risk arrangements are also to include provisions enabling a co-licensee, other than the "sole risk licensee", to join the venture at a later date.

Detailed financial arrangements

12 The operating agreement is to include, or contain in documents annexed to it, arrangements for the detailed

financial management of the licence activities: such as the dates on which the parties' contributions are to become due (but subject to the arrangements agreed whereby BNOC is to pay its share of development and operating costs), provisions for default in such contributions, and accounting and auditing procedures.

Disposal of petroleum

13 The operating agreement may provide for arrangements between BNOC and its co-licensee(s) whereby respective shares of petroleum produced may be transferred to any (or all) of the other co-licensee(s) or to other persons (subject to the restrictions contained in the terms of the licence): and other mutually acceptable arrangements in respect of up-take of production.

Appointment of Operator

14 BNOC should not solely by virtue of its share of the licence be entitled to determine that it should itself be the operator. Neither is BNOC ruled out from being the operator. The appointment of the operator (which under the licence will need the Secretary of State's approval) should for the purposes of the operating agreement be determined by majority decision such as outlined in paragraph 5.

Assignment of Licence interests to State Corporations

15 The operating agreement should recognise that in the event of the Secretary of State directing BNOC or BGC to assign its interest in the licence, together with all associated rights and obligations, to the other corporation or its subsidiary, BNOC or BGC will be entitled so to assign its interest.

Disputes in respect of the Operating Agreement

16 There should be satisfactory arrangements for the resolution of any disputes between the parties to the operating agreement.
