PRODUCT LICENCES GRANTED

Product Licence No.	Company Name	Product Name	Active Ingredients	Indications (Non-Prescription Items)
PL 0011/0066	Wyeth Laboratories	Trinordiol	6 tablets each containing 0.05 mg levonorgestrel and 0.03 mg ethinyloestradiol. 5 tablets each containing 0.75 mg levonorgestrel and 0.04 mg ethinyloestradiol. 10 tablets each containing 0.125 mg levonorgestrel and 0.03 mg ethinyloestradiol.	
PL 0015/0072	Boehringer Ingelheim Limited	Catapres PL (Perlongets)	Clonidine HCl 0.25 mg/capsule - each pellet or mini-tablet containing 0.050 mg.	
PL 0015/0075	Boehringer Ingelheim Limited	K Longules	Each capsule will contain 600 mg potassium chloride BP.	Indicated in all circumstances where Potassium supplementation is necessary, but particularly during prolonged or intensive diuretic therapy. Other situations where relevant electrolyte depletion may occur are: Intensive treatment with steroids, ACTH or carbenclozone; Cushing's syndrome, chronic vomiting or diarrhoea, prolonged fasting, diabetic ketosis, ulcerative colitis, ileostomy, renal tubular disease, and cardiac decompensation. Other patients at special risk from hypokalaemia are those with advanced hepatic cirrhosis, chronic renal disease, or gross oedema and those receiving cardiac glycosides (Potassium lack aggravates the toxic action of digitalis). Also to be considered for potassium supplementation are patients on a salt restricted diet or with megaloblastic anaemia.
PL 0029/0145	Imperial Chemical Industries Limited	Sorbitrate Oral 20 mg Tablets	Isosorbide Dinitrate 20 mg	Prophylaxis of angina pectoris.
