UK CONTINENTAL SHELF 16TH LICENSING ROUND

The Petroleum (Production) (Seaward Areas) Regulations 1988

1. Further to the Notice published on 29th April the Secretary of State for Trade and Industry invites applications, in accordance with the Petroleum (Production) (Seaward Areas) Regulations 1988 (SI 1988 No. 1213), as amended by the Petroleum (Production) (Seaward Areas) (Amendment) Regulations 1990 and the Petroleum (Production) (Seaward Areas) (Amendment) Regulations 1992 (in this Notice called "the Regulations"), for petroleum production licences in respect of the blocks specified in Schedules 1 and 2 to this Notice and delineated on maps deposited in the Library at the Department of Trade and Industry, 1 Palace Street, London SW1E 5HE. The maps may be inspected by prior appointment (telephone No. 071-238 3042) between 09.15 and 16.45 hours Monday to Friday until 21st March 1995. This offer will be known as the United Kingdom Continental Shelf (UKCS) 16th Round of Licensing. Nominations for the UKCS 17th Round of Licensing are also sought in this Notice (see paragraph 13 below).

CONSIDERATION FOR AND CONDITIONS OF LICENCES

2. Licences issued in respect of blocks shown on the maps at Schedule 1 and listed in Schedule 2 will have an initial term of six years with a second term of twelve years. This second term may be extended beyond twelve years for a further period of eighteen years. The Model Clauses set out in Schedule 4 to the Regulations shall be incorporated into these licences, together with any other conditions under which any particular licence has been granted.

3. The consideration required in respect of production licences granted as a result of this invitation will be:
 - (a) an initial payment, at the time the offer of a licence is accepted, of £410 for each square kilometre comprised in the licensed area;
 - (b) subsequent annual payments determined according to the following provisions:
 - (i) on the sixth anniversary of the date of commencement of the licence term (following exercise of the option to continue as to the remaining period of the licence) the sum of £470 will be payable for each square kilometre in the area to which the licence then relates; on the seventh anniversary £940 per square kilometre and so on, rising by annual increments of £470 until an annual sum of £7,050 is payable for each square kilometre comprised in the licensed area;
 - (ii) the payments specified in sub-paragraph 3(b)(i) above will be subject to variation as follows:
 - (aa) The annual payments will be increased or subsequently reduced at two-yearly intervals in line with movements in the Index of the Price of Crude Oil acquired by Refineries (published in the Digest of UK Energy Statistics) if the Secretary of State so determines. The Secretary of State will give notice of any such determination ("biennial determination") during the month preceding the eighth anniversary of the date of commencement of licences or any subsequent two-yearly anniversary, and will specify in the notice the increase or reduction in the amount payable. Movements in the Index will be calculated by reference to a comparison between the arithmetic mean of the Index levels for the two latest calendar years for which figures are available at the time when the determination is made, and the arithmetic mean of the Index levels for 1992 and 1993. In the event that the Index of the Price of Crude Oil acquired by Refineries ceases to be published, the Secretary of State may substitute arrangements for redetermination of annual payments having substantially similar effect to those set out above based on such other comparable Index as he may determine.
 - (bb) The increase or reduction specified in a biennial determination will be payable or take effect on the anniversary of the date of commencement of the licence next following the date of the relevant determination.
 - (cc) No biennial determination will have effect so as to reduce the annual payments below the levels set in sub-paragraph 3(b)(i).
 - (dd) The Secretary of State will not make a biennial determination increasing or reducing the amounts payable, where that increase or reduction would be 5% or less of the levels set following the previous biennial determination.
 - (c) A royalty (provided for in Clauses 10-13 of Schedule 4 to the Regulations) at the rate of 12.5% payable in respect of petroleum won and saved from any field which is neither:
 - (i) a relevant new field for the purposes of the Petroleum Royalties (Relief) Act 1983, nor
 - (ii) a relevant Southern Basin field for the purposes of the Petroleum Royalties (Relief) and Continental Shelf Act 1989.
4. Licences may be granted subject to special conditions governing the notice required for, and the timing and circumstances of, operations carried out thereunder. The Department of Trade and Industry will make copies of the indicative conditions available as soon as possible, and in any event prior to the date specified herein for the application for licences.
5. The special conditions mentioned in paragraph 4 above will include those which are designed to have regard to any particular environmental sensitivity identified in the particular block. These shall be incorporated into each licence awarded and may be made available to the public under the Environmental Information Regulations 1992. Applicants may wish to seek advice from the Licensing Branch of the Department of Trade and Industry on which specific conditions will be released.

there are two or more applicants for a block who would be equally acceptable to the Secretary of State as licensees for that block he may suggest that the licence should be held jointly by some or all of such applicants.

11. The selected applicants will be offered licences on condition that within 14 working days of the date on which the Secretary of State makes the offer of an award:

- (a) they confirm acceptance of a work programme proposed by the Secretary of State following discussion with the applicants concerned;
- (b) they remit to the Secretary of State the appropriate payment referred to in paragraph 3(a) above; and
- (c) they confirm in writing that they accept the licence on the basis that any conditions subject to which the licence is granted are terms and conditions of the licence.

12. Unsuccessful applicants will be notified in writing.

The Secretary of State will be prepared to consider nominations from companies in respect of any unlicensed blocks in frontier areas not listed in Schedule 2 (see paragraph 15 below) on the United Kingdom Continental Shelf that should also be offered for licensing. These Regulations implement Council Directive 91/674/EEC Official Journal No. L374 of 31.12.91, pages 7 to 31, on the annual accounts and consolidated accounts of insurance undertakings, in so far as that Directive is applicable to bodies corporate to which Part VIII of the Companies (Northern Ireland) Order 1986 ("the 1986 order") applies.

They introduce a requirement for insurance companies to prepare accounts in accordance with the new Schedule 9A, and define which companies are to prepare group accounts under the special provisions with respect to insurance groups.

Regulation 4 substitutes a new Schedule 9A to the 1986 Order, Schedule 1 to the Regulations. The new Schedule 9A sets out the form and content of accounts of insurance companies and groups. Part I lays down rules governing the content of the individual accounts of insurance companies, including prescribed formats to be followed, the valuation rules to be applied, notes to the accounts. Regulation 7 sets out a transitional provision whereby a company may prepare accounts in accordance with the unamended Part VIII as that Part applies to insurance companies and groups, rather than under the amended provisions for a financial year commencing before 23rd December, 1994.

8223/0224	Discepharm Limited	Ventolin Inhaler	Salbutamol 0.1 mg	Prescription Only Medicine Salbutamol is a selective Beta-2 adrenoceptor agonist. At therapeutic doses it acts on the Beta-2 adrenoceptors of bronchial muscle, with little or no action on the Beta-1 adrenoceptors of the heart. with its fast onset of action, it is particularly suitable for the management and prevention of attack in mild asthma and for the treatment of acute exacerbation in moderate and severe asthma. Salbutamol provided short-action (4 hour) bronchodilation with fast onset (within 5 minutes) in reversible airways obstruction due to asthma. It is suitable for long term use in the relief and prevention of asthmatic symptoms. Ventolin should be used to relieve symptoms when they occur and to prevent them in those circumstances recognised by the patient to precipitate an asthma attack (e.g. before exercise or unavoidable allergen exposure). Ventolin is particularly valuable as rescue medication in mild, moderate or severe asthma, provided that reliance on it does not delay the introduction and use of regular inhaled corticosteroid therapy.	31st October, 1994

12365/0003	Laboratories Ethypharm	Ethypharm Doxycycline Capsules 50 mg	Doxycycline Hyclate EP 57.70 mg (Equivalent to Doxycycline Base) 50.00 mg	Prescription Only Medicine As a bacteriostatic antibiotic, Doxycycline is clinically effective in the treatment of a variety of infections caused by a wide range of gram-negative and gram-positive bacteria, as well as certain other micro-organisms. Its principal indications are the following: <i>Pneumonia:</i> Respiratory tract infections: pneumonia and other lower respiration tract infections due to susceptible strains of streptococcus pneumoniae, haemophilus mycoplasma pneumoniae pneumonia. Treatment of chronic bronchitis, sinusitis. <i>Genito-Urinary tract infections:</i> Cystitis, urethritis, pyelonephritis, caused by susceptible strains of escherichia coli, neisseria gonorrhoeae, the klebsiella-enterobacter group, staphylococcus species and chlamydia trachomatis. A single large dose of doxycycline has effectively treated acute gonococcal anterior urethritis in the adult male. However, a more extended therapy elicited the highest cure rates. <i>Soft Tissue infections:</i> Infected traumatic and postoperative wounds, furunculosis, impetigo, cellulitis, abscess and paronychia, caused by susceptible strains of the klebsiella-enterobacter group, as well as susceptible strains of staphylococcus aureus, streptococcus species, E. coli and staphylococcus albus. Doxycycline treatment of soft tissue infections should always be carried out in conjunction with any necessary indicated surgical procedures. <i>Dermatological infections:</i> Acne vulgaris and acne conglobata. As Doxycycline is one of the tetracycline group of antibiotics, it may be expected to be useful in the treatment of infections which respond to other tetracyclines such as: <i>Gastro-Intestinal infections:</i> Caused by susceptible strains of such organisms as shigella species, salmonella species, entamoeba histolytica and enteropathogenic E. coli. <i>Ophthalmic infections:</i> Caused by susceptible strains of staphylococci, gonococci and haemophilus influenzae. Doxycycline is indicated for the treatment of inclusion conjunctivitis either alone or in combination with topical agents, doxycycline is also suitable in the treatment of trachoma. However, the infectious agent is not eliminated on all occasions, as tested by immunofluorescence techniques. <i>Miscellaneous:</i> Trigonitis and prostatitis caused by proteus species psittacosis, certain other infections caused by susceptible strains of bacteroides species, listeria species, rickettsia species, yersinia species, brucella species (in combination with streptomycin) and bordetella pertussis, calymmato-	11th August, 1994
