### Offshore Petroleum Production and Pipelines (Assessment of Environmental Effects) Regulation 1999

Licence P.953 - Licence having effect under the Petroleum Act 1998 BLOCK 132/6

Pursuant to regulation 5(8) of above Regulations, the Secretary of State for Trade and Industry gives notice that, being content that the requirements of the above Regulations have been satisfied, he has, pursuant to Licence P.953 granted a consent to Conoco (UK) Limited to the drilling of an exploration well in block 132/6. The consent for well 132/6-A took effect from 26th March 2001.

Conoco (U.K.) Ltd. (CUKL) proposes to drill a single exploration well in their Tranche 21 licence area, located in the Atlantic waters to the west of the Hebrides. The well will be located within a 2 km radius of position 56°45'46"N. 09°50'38"W, in a water depth of about 1,920 metres, some 135 km from nearest land.

CUKL plans to start drilling the well in May 2001. After considering various drilling options, because of the deep-water location CUKL proposes employing a dynamically positioned *ultra deep water drillship*, using water-based muds for all hole sections.

The ES presents a comprehensive review of available environmental information of this deep-water region west of the Hebrides.

On completion of drilling, the well will be evaluated and then either suspended or abandoned. No well testing activities will be undertaken. If the well is to be abandoned this will involve cutting the well casings to a minimum depth of c.3 metres below the sea-bed, followed by debris clearance survey.

Four activities were identified as presenting the risk of potential impact and were assessed in more detail in the ES:

- discharge of drilling mud and cuttings;
- atmospheric emissions from power generation;
- noise associated with drilling operations.
- accidental spillage of hydrocarbons.

With reference to the discharge of drilling mud and cuttings the mud chemicals fall mainly into HOCNS Group E, with some 84% of the total mud chemical usage being PLONOR List Substances. Cuttings from the two top hole sections will be deposited immediately adjacent to the well, resulting in a small (25-40 metre) cuttings pile (average thickness of about 30 mm). Cuttings dispersion modelling suggests rapid dispersion in the deep waters, resulting in no expected impact beyond the immediate top-hole cuttings pile.

Atmospheric emissions are expected to be within routine drilling rig operational standards, with estimated emissions presented in the ES for drilling and support operations.

The ES discusses noise generation and potential impacts (section 6.5) and places emphasis on the short-term nature of the drilling operation. No significant impact was identified.

The ES identifies that the most likely spill risk arises from bunkering but states that spills of a light distillate fuel oil would disperse extremely rapidly, with 'negligible' environmental impact.

In addressing the risk of a blow-out, CUKL cites low probability based on drilling experience to date on the UKCS.

After a request by DTI, Conoco provided more adequate information regarding the basis to the selection of the drill-ship and its assessment of potential risks from the use of the vessel for drilling well 132/06-A, particularly in relation to oil spill risk.

No significant impact was identified from the drilling of this well. Both JNCC and FRS agree. The drilling of this well is unlikely to impact any future potential SAC.

(SR 2001 No. 127)

Notice is hereby given that the Department of Agriculture and Rural Development in exercise of the powers conferred on it by Section 2(2) of the European Communities Act and of every other power enabling it on that behalf, made on the 22nd March 2001, the Extensification Payment Regulations (Northern Ireland) 2001.

The Regulations prescribe rules for the administration and enforcement provisions of the scheme for holdings falling totally or partly in Northern Ireland where Department of Agriculture and Rural Development is responsible for paying the farmer's claim.

The rules provide for two Community methods for calculating stocking density, require producers to supply information to support their claims, define 'pasture land', and allows for withholding or recovery of such payments where the rules of the scheme are breached.

The enforcement provisions confer powers of entry, inspection and collection of evidence on authorised persons and also deal with offences and penalties.
