ANNEX: STATEMENT OF THE NATURE OF MODIFICATIONS AND REASONS THEREFOR

Condition	Nature of modification	Reason(s) for modifications
New Condition Condition 19a Balancing Market Principles Code of Practice	Introduce a new condition requiring the licence holder (where it operates as a Demand Side Unit) to comply with the Balancing Market Principles Code of Practice (BMPCOP) in formulating and submitting Commercial Offer Data to the Single Market Operation Business in the Balancing Market. The Commission will publish the BMPCOP and will make provision to secure that Commercial Offer Data are reasonably reflective of short run marginal costs (thereby facilitating, contributing to the mitigation of market power in the SEM, the efficient operation of the Balancing Market). The Commission will also have powers to issue directions and request explanations from licensees. The licensee will be obliged to retain records for a period of four years and will be required to provide annual certifications to the Commission that it has acted independently.	The modification is required to implement the SEM Committee decision to establish a generic licence condition to require supply licence holders that operate in the Side Unit to comply with the Balancing Market Principles Code of Practice (Decision Paper “Complex Bid Offer Controls in the I-SEM Balancing Market” (SEM-17-020). In light of representations received, the condition now specifies that the BMPCOP will make provision securing that Commercial Offer Data are reasonably reflective of short run marginal costs (thereby facilitating, by contributing to the mitigation of market power in the SEM, the efficient operation of the Balancing Market). Similarly, in light of representations received the power of the Commission to modify the BMPCOP is now also made subject to any additional requirements as regards modification set out in the BMPCOP.
New Condition Condition 23 Capacity Market Code	Introduce a new condition requiring licence holders to sign up to and comply with the Capacity Market Code insofar as applicable to them.	Insofar as licence holders have obligations under the Capacity Market Code, it is important that they are subject to a licence condition to comply with the code.
