PL8732/0001	Gel-kam (UK) Limited	Gel-Kam 0.4% Stannous Fluoride Gel	Stannous Fluoride USP 0.4% w/w	To aid in prevention of dental caries and decalcification to the teeth. Gelkam 0.4% stannous fluoride gel will prevent caries, decalcification and demineralisation of the teeth when used on a daily basis. Gelkam will also treat and arrest active surface caries in enamel and dentine preventing further carious breakdown of the dentition. Gelkam should be used daily before retiring to bed, or as part of the last regular tooth brushing regime. Use Gelkam as you
