08829/0074	Trinity Pharmaceuticals Limited	Nimodrel 5mg	Nifedipine 5.000mg	Prescription Only Medicine Used in the prophylaxis of chronic stable angina pectoris and in the treatment of hypertension and Raynaud's phenomenon. It is a potent antagonist of calcium influx through the slow channel of the cell membrane of cardiac and smooth muscle cells. It is known to be an effective and relatively well tolerated prophylaxis for chronic stable angina and mild to severe hypertension. The antihypertensive effects of nifedipine are achieved by causing peripheral vasodilatation resulting in a reduction in peripheral resistance. It reduces blood pressure in hypertension but has little or no effect in normotensive individuals. It has no therapeutic antiarrhythmic effect.	17th April 1998
