06745/0097	Pasteur Merieux MSD Limited	HB-Vax II Paediatric	Hepatitis B Surface Angiten 5.000mcg	Prescription Only Medicine This vaccine is indicated for active immunisation against hepatitis B virus infection caused by all known subtypes in subjects of all ages considered at risk of exposure to hepatitis B virus. Groups identified at increased risk of infection: Children frequently receiving blood products. Children in haemodialysis and oncology units, children suffering from thalassaemia, sickle cell anaemia, haemophilia, and children receiving frequent blood transfusions or clotting factor concentrates, organ transplants. Infants born of mothers who are HBV carriers. Children residents of institutions. Children residents of institutions for mentally handicapped. Travellers' children to areas with a high endemicity of HBV. Children originating from areas with a high endemicity of HBV. Adoptees, immigrants and refugees. Others: Children through their personal lifestyle may be exposed to HBV. Household contacts of any of the above groups and contacts with acute or chronic HBV infection. Nevertheless, the recommendations should be adjusted in line with national vaccination policies since in some countries generalisation of vaccination is highly recommended.	1st January 1999
