NOTICE TO MARINERS.

(No. 102.)—UNITED STATES—RHODE ISLAND.

Fixed Light at Connimicut Point.

The United States Government has given Notice that, from the 5th day of November 1868, a light would be exhibited from the granite day-beacon which has heretofore marked the shoal extending from Connimicut Point, Providence River, Rhode Island.

The light is a *fixed* white light, elevated 50 feet above the sea, and in clear weather should be seen from a distance of 11 miles.

The illuminating apparatus is dioptric or by lenses of the fourth order.

In foggy or thick weather a fog bell will be sounded.

And that, from the same date, the light now exhibited at Nayat Point (opposite Connimicut Point) would be discontinued.

Alteration in position of Block Island Light.

Also that, from the 15th day of September, the light on Block Island, off the eastern entrance of Long Island Sound, would be exhibited from the new dwelling of the keeper (grey granite), situated 400 yards south of its former position.

The light is a *fixed* white light, elevated 75 feet above high water, and in clear weather should be seen from a distance of 12 miles.

The illuminating apparatus is dioptric or by lenses of the fourth order.

MARYLAND—CHESAPEAKE BAY.

Lights for the Brewerton Channel.

Also that, from the 1st day of November, three lights would be exhibited from lighthouses recently erected on Hawkins and Leading Points, Patapsco River.

The lighthouses bear from each other N.W. and S.E., distant one mile and an eighth.

The S.E. or Hawkins Point lights are two lights elevated respectively 28 and 70 feet above the sea.

The N.W. or Leading Point light is a light elevated 70 feet above the sea.

The Hawkins Point Lighthouse is white, on an iron screw pile foundation, in 6 feet water.

The Leading Point light is exhibited from the summit of a brick dwelling, painted brown, and 40 feet above the ground.

When a vessel is on the proper course coming up or going down the Brewerton channel the three lights will be in one.

GEORGIA.

Re-establishment of Wolf Island Lights.

Also that, from the month of October 1868, the two lights on Wolf Island, Doboy Inlet, would be re-established.

The front light is a *fixed* white light, elevated 31 feet above the sea, and exhibited from a skeleton frame tower, painted brown.

The other, 480 feet from the front light, is a *fixed* white light, elevated 38 feet above the sea, and is exhibited from the keeper's dwelling, painted white.

Both lights in clear weather should be seen from a distance of 10 miles.

By Command of their Lordships,

GEO. HENRY RICHARDS, Hydrographer.
Hydrographic Office, Admiralty, London,
9th November 1868.
