Rom Sicily we hear, that the French having held a Rendezvous of their Forces at St. Stefano, without the Gates of Mefsina, and made a countenance as if they would attack the Scaletta, had on the folden difcovered their defign to be upon Melazzo, and were accordingly marched thither, and had already blocked up the place on the Land-fide, and at the fame time befieged it by Water with eight Gallies; That the Viceroy of Sicily, who happened to be there, was retreated with his Forces, fufficient to maintaim it into the Caffle. Upon this advice, our Viceroy has ordered fix Gallies to be put forthwith into a politure to fail to Palermo, to join with 15 Gallies more that are there, and fo go together to the relief of Me-Lezzo.

On Monday last the Count of Lamberg took possible of his place of Great Master of the Emperors Houshold, and was thereupon accordingly complemented by all the Persons of Quality about Court. The Sieur Pieger having compleated the new Regiment he raifed, is marched with it towards Silesta, to join the other Imperial Troops there, under the command of General Cops. The Emperor has given Commission to the Count of Kauniz to raile for thwith a Regiment of Horse.

Hamburg, July 16. From Rensburg in Holftein we receive the confirmation of the Dukes having fubmitted to the demands of the King of Denmark, mentioned in our last. And our Letters add, That the King had put part of his Troops into quarters, in Holftein, and purposed himself to return to Copenhagen, without making any mention of any rupture intended with the The Magistrates and Inhabitants of this City Suedes. cannot quit the apprehensions they have, that the King of Denmark will attempt fomething upon them; the Deputies they fent to the King having not as yet been able to obtain any favourable answer from his Majelty, and our feurs are encreased by the news we have of two Danish Men of War being come into the Elle, and that part of the Kings Army advances this way. The Eleftor of Brandenburg having held a Rendezvous of his Army near Perleberg, and found it to confift in above 16000 Men, has caufed it to advance towards Wifmar ; and from Luberk comes a report, that they have al-ready inveiled that City. The Suediffi Army is about Demmin in Pomerania, expecting there feveral confiderable recruirs from susden and other parts ; It is fuid, That in-five or fix days the Imperialists under the Command of General Cops, will be some up with the Brandenburgs.

From the Imperial Camp at Renchen, July 11. The Imperial Army has its head-quarter here, the River Renclean dividing ours and the Enemies Camp. Our parties go out daily, and return with good fuccels. This evening the Major General Harrant has brought in 150 Pri-Ioners and a good booty, having totally routed a French Regiment of Dragoons ; the faid Prisentest rell, på, thát the French are very much incommoded for wish of Foe rage.

Treves, July 12. The 27 paft our Governor the Count de Vignory, understanding that the Sieur de Louvigny, who commands at prefent in the Province of Luxemburg, had for some design drawn our the Garison that was in Echternac on the Source, the forthwith marched thither with 200 Horfe, as many Foot and fome Dragoons, and made himfelf Mafter of the place without any difficulty, and having demolifhed it, and taken away what Arms he found there, returned hither again. The 28, the Mareschal de Crequi arrived with the Forces under his command in our Neighborhood j the next day he fent out a party with two pieces of Can+ non, who took the Caffle of Romestin, the Garifon furrendring upon diferention, and demolifhed it ; the 30, the Count de Vignerylikewise possessed himself of the Castle of Efebe, and the day following of the Town and Caffle of Willicke, the Garifons in neither making any relifiance; our Governor demolished all the faid places, and hath brought hither what Artiliery, Ammunition or other military provision he found these. The fixth inflant, the Mareschal de Crequi marched with his Troops through this City, and having paffed the Sarre went and encamped at Tauerne, where he continued till this morning, when he decamped again, and is marched towards Alfaria, with intention to go and join Monfieur de Turenne. Yesterday went out from hence a party of 400 Horfe, with orders to go and burn four great Villages on the fide of Bonne, who have omitted to pay their Contributions,

Strasburg, July 12. The Imperial Army under the command of General Montecuculi continues encamped from Renchantock to Lichtenaw, and from thence as far as Buhel at the foot of the Mountains, the head-quar's ter being at Renchen : On the other fide, the French had their quarters from Bifcheim to Altenheim : The Imperialifis have fortified Renchenlock, as being a Poft of great importance for the fecurity of their Camp, and for that reason, Monsieur de Turenne endeavoured to disposses them of it, but the Troops that were commanded on that defign were repulfed, though they made: their attack with a great deal of vigor. The eight infant the Troops of the Citcles of Suabia and Franconia which affembled at Hailbron, and are faid to make up together between 3 and 4000 Men, joined the Imperial Army. And besides the 1500 Foor that are already: come to the affiftance of the French under the conduct. of the Chevalier du Bleffys; we have advice, that the Marelchal. de Crequi is coming with another reinforcement, and that he is at present not far from hence. Upon the advice Monfigur de Turenno received that 3000 Imperialists had passed the Rhine below Raftadt, with defign to give him a diversion on that fide, and to cut off the Provisions which come from Haguenan and those parts, he immediately caused two Regiments of Dragoons' to pass the Rhine yesterday over his Bridge at Altenheim ; who were followed the last night by 3000 more, with order

orders to have a watchful eye upon the Imperialis. We rre told, that yesterday Major General Harrant fell upon a party of French Diagons not far fiom Renchenleck, of which near 150 were killed upon the place, and as many made Prisoners. The general opinion here's, that the Armies will after all come to a Battel ; and in the mean time, the Imperialills fay, that the French is already very confiderably diminished, that many Soldiers gefert daily, and many die; and more particularly they tell us, that the ninth instant, three whole French Companies, who had deferted, came with their complete Arms, Colors and Baggage to Biden, and defired Passports to pass farther; which they obtained, with a fum of Money for their sublishence.

Cologne July 16. The 13 inftant, the Lunenburg Troops came and lodged at Vrechim, two Leagues from hence, where they continued the next day, and yesterday they decemped again, and marched towards Breail, with intention to continue otheir march towards the Mosche, whither the Lorrain Troops are gone before, and on Saturday last the old Duke parted from hence to follow them. The Munster Troops, to the number of 3000, to 4000 Men, are likewife coming up, they take their march through the Countrey of Bergh, and will pass the Rhine at Bonne, and so join the other Confederates, who are likewife to have added to them 1000 Imperialist, to be drawn out of Bonne, and 3000 Men of the Elector of Treves, and thefe together; will, its faid, make an Army of 22000 Men; their defign is generally faid to be upon Treves, and, we are told, that the Elector of Treves hath taken upon him to provide the Army with Corn, and all necessaries for its subfiflence, fo long as it is employed for the recovering of his Countrey out of the hands of the French. The Letters we receive from the Imperial Army, affure us of the the good condition it is at prefent in, and endeavor to perswade us, that the French cannot truely say so, and that they are in great want of Forage, and other Provisions, to that degree, that the Soldiers die, and defert daily.But the French tell us as much of the Imperial Ar-

my. Bruffels, July 19. The Prince of Orange has his quarters still near Louvaine with his Infantry, but his Cavalry is advanced within half a League of this City; it has been reported these two days that the Army would march, which has been done to give the Countrey people leifure to retire with their Goods and Cattle out of the way, which the Army is to take; to morrow it'is certainly faid it will decampy and march near this City by Vueren towards Hall and Tubife. His Highnefs, we hear, has given orders to his Soldiers to provide themfelves with Bread for three days, and the Duke de Villa Hermofa has fummoned 1000 Wagons to come hither the beginning of the next Week, from the feve-ral Diffricts of Flanders, and this Province; feveral Spanish Regiments of Foot are likewise to be drawn out of our Garifons, and Dutch Regiments to be put in their flead, and it is generally believed that about the litter end of the next week, the Army will march to attempt fomething confiderable. The French Army is at prefent encamped near Flerus, about three Leagues from Charleroy, much weakned, as is faid, by the feveral parties that have been fent out towards Lorrain and the Mense, and now lately by a body of 6000 Men that are marched, as is faid, towards Alfatia. It is reported here, that on Wednefday last, the King parted from Charleroy, on his way to Paris, leaving the command of his Army to the Prince of Conde. From Liege they write,

· * ...

That the Count d' Estrades Governor of Macsicht, had been to visit the Cittadel of Liege, from thei ce was gone to Huy, and fo would continue to vifit his Majeffies other late Conquelts, which are all annexed to his Government. From Germany they tell us, I hat the Imperial Army is encamped at Renchen, and the French at Bischeim ; That Monficur de Turenze has made another Bridge over the Rhine at Hanam, fo that he has now one above, and the other beneath Strasburg; That the Country is all defiroyed and eaten up by the two Armies, that the Imperialifis want Bread, and the French Forage, which makes us think they will not be able to continue much longer in this posture. The Lunenburgs Ofnabrug and Lorrain Troops are gone, as is faid, to befiege Treves.

The tenth, his Majefty came and encamped near Wafeges, from whence his Majefty parted again the next day, and marching through very bad ways, by reason of the con-tinual rains, encamped at Perusz ; where his Majefty continu-ed the next day, to refter his Soldiers The twelfth, the Army diffedeed again and marched to Velamis, from whence the diflodged again and r arched to Vilams, from whence the King parted the 14 inftant early in the morning, to Charleroy, teing about three Leagues from the Camp, to vifit the works there, and the beginnings that are making for the building a new Town, on the other fide of the Sambre, his Majefty purpo-fing to be back in the Camp that evening. Our advices from Monfieur de Tarennes Army, are dated the twelfth inflant, at Bi-him or Bi-Glufing where is the Word question, for while or Bifthefbeim, where is the Head-quarter; they fay, That Monlieur de Turenne was come thicker, upon the remo-val of the Imperial Army from Urlef towards Lichtenan on the fourth inflant, and had immediately fent out two Squadrons of Horfe, and 500 Foot, under the command of the count de Lorge, and the Count d'. avergne to attack a certain retrench-ment which the Impriali fis had made at Renchaloch; That our mont which the Imprial if is had made at Renchenloch; That our Troons had made the Attack with a great deal of bravery, but that Monfieur de Tureenne underflanding the difficulty of the enterprize, had commanded the Connt de Lenge to retreat, which he had done in very good order not having loft above 25 or 30 Men; That to prevent all communication between the Imperi-alifs and the City of Strashing by Water. Monfieur de Turenne had pofted 500 in two fmall ifles in the River; with thice fmall pieces of Cannon, and has fince reinforted them with 100 Mufqueteers more; we are affwred that the Imperial Army is in order want of Provificus.
