Warsaw, Jan. 3.

WE have the confirmation from several parts, that *Dorosensko* hath put himself under the protection of the *Moscovites*, and renounced to that of the *Turks*; which if he hath in reality done, without any ill intention, will occasion a great change of affairs, for the use he was of to the *Turks*; but most people who know the cunning and artifice which this *Dorosensko* has all along made the guide of his actions, rather believe that some design lies hid under this pretended friendship, and that for the present his aim only is to gain time. The 16 instant, the *Persian* Ambassador had Audience of the King at *Zolkiew*, to whom he presented seven *Persian* Bowes with so many *Quivers* of Arrows. He then only entertained the King with matter of compliment, but has desired a private Audience, to deliver some things of importance, he says, he is charged with. An Ambassador is likewise arrived at *Zolkiew* from the Crown of *Sueden*; and an Envoy from the Prince of *Transylvania*: this latter, we are told, hath acquainted the King, that his Master has received command from the Port to raise 6000 Horse armed with Lances, and to furnish 7000 Pioneers, who are to be employed to make a Royal-way through the Woods to *Cracow*, for the march of the *Ottoman* Army this next Spring, the same advice his Majesty has received by the hands of the Bishop of *Cracow*. Their Majesties will now part suddenly for *Cracow*, whither they will take their way by small journies, because of the Queens being big with Child, and the badness of the wayes. A Body of 30000 *Tartars* have been lately as far as *Miedziboz*, and have made many slaves.

Naples, Jan. 7. This last week arrived here two ships from *Cavita Vecchia*, about 10 dayes since they met the French Fleet consisting in 20 stout Men of War, and six Victuallers, taking their course towards *Sicily*: And this day it is reported here in Town, that the said Fleet is arrived at *Messina*, without meeting with any opposition. Lieutenant Admiral *de Ruyter* is with his Squadron at *Melazzo*, where a Council of War hath been held, at which the Viceroy and *de Ruyter* assisted, and we are told that it hath been resolved to attack *Messina* both by Sea and Land; in order to which several Troops have been transported from *Reggio* to the *Scaletta*; and both Horse and Foot are to march from hence, to the number of 4000. The Prince of *Montesarchio* is at present with 11 Spanish Men of War at *Palermo*, where it's said he is obliged to continue, to awe those people, who, it's feared, would otherwise be somewhat unruly.

Cologne, Jan. 24. We are here in great apprehensions of the *French*, and particularly that they will possess themselves of *Rhinberg*, where is at present but a weak Garrison. The Regiment of *Croats* of Count *Rabata*, and some Companies of *Dragoons* are coming into this Diocess, and our Magistrates are about raising of Men for their greater security.

Bremen, Jan. 22. We have an account from *Stade*, that 500 *Munsterians* having taken their quarters at *Friburg*, with intention to set *Kedingerlant* under con-

tribution, the Count *Horne* sent out from *Stade* under the command of Colonel *Sidau* 200 Horse, 400 *Dragoons*, and 400 Foot, who fell upon the Enemy in their Retrenchments, and after a sharp Fight of two hours, wholly defeated the *Munsterians*, 300 having been killed upon the place, and 200 carried Prisoners to *Stade*; on the part of the *Suedes* about 50 were killed. This is the day that the *Suedes* in *Karelsburg* are to deliver it up according to the Capitulation made about 8 or 10 dayes since.

Hamburg, Jan. 24. A *Danish* Man of War of about twenty six Guns, happening some dayes since to come a-ground before the River *Swinge*, under the command of the Fort the *Suedes* have there, the *Danes*, after having used in vain all endeavors to get her off, quitted her; setting her first on fire. The *Suedes* batter *Wolgast* from several Batteries, on which it's said they have near 40 pieces of Cannon, and that Count *Coningsmark* is there in person to press the Attacks; but they not being above 1000 strong before the place, it is believed they will not be able to do any good. From *Berlin* they write, that the Velt *Mareschal Dorffirg* was marched from thence with a good Body of Men, but on what design not known. P. S. Just now we receive news that the *Suedes* having made an Assault upon *Wolgast*, they have been repulsed with the loss of Major *Wrangel*, 12 Captains, and 400 common Soldiers; and that *Hofes* are sent to carry off the *Suedish* Artillery, they being resolved to quit the Siege.

Brussels, Jan. 24. The supplies expected from *Spain* not yet arriving, and being told that we must not look for any till after the arrival of the Gallions, which are very late this year, our Governour is thinking of several ways to raise monies here to supply his necessities in the mean time; and amongst others, is going to add seven new Counsellors to those belonging to the States of *Flanders*, who are to buy those places, &c. It is said that instead of the Recruits and new Levies that were intended to be made for the reinforcement of our Forces against the next Campagne, his Excellency is treating with the Imperial Ministers about sending 8 or 9000 *Germans* to our assistance. The Prince of *Orange* will, as we are assured from *Holland*, act separately at the head of 40000 Men: it has been desired that our Governour would provide them with Bread during their being in the Field, but his Excellency is said to have excused it. We are this day somewhat alarmed with the news we receive that the *French* are drawing together a Body of 8 or 9000 men out of their Garrisons in *Flanders*, but their design we know not. The City of *Cologne* is in great fears of the *French*, insomuch that some of the Inhabitants have removed the best of their Goods and Householdstuff to *Dusseldorp* and *Francfort*. We have advice from *France*, that the Prince of *Conde* is to command the *French* Army in *Flanders* this next Campagne, and the *Mareschal de Schomberg* that in *Germany*. It is hoped some way will be found to compose the differences between the Elector *Palatine*, and the Elector of *Mayence*, about *Bockelheim*.

Ditto, Jan. 28. The Marschal d' *Humieres* having drawn 8000 Men together, marched with them on Tuesday last towards *Soignies*, and after having repos'd his Men there, caus'd them to attack two Castles called *Escossines*, and *la Folie*, situate between *Soignies* and *Nivelle*; the Soldiers that were Garison'd in *la Folie*, looking upon themselves unable to defend it, quitted it, and retir'd into *Escossines*, which held out 48 hours, several of the *French* having been killed before it, and then the Besieged, who were not above 50 strong, surrendred; and this afternoon we have advice that the *French* have sigh'd both these Castles, and are march'd on some other design, having thereby open'd the Communication between *Aeth* and *Charleoy*, which was before interrupted. The Duke d' *Aerschor*, Governor of *Mons*, upon the first advice he had of the Enemies intention, sent 50 Men with some Ammunition to reinforce those Garisons, but the Enemy being already before the places, they were forc'd to return again. And from *Liege* they write, of the 25 instant, that a strong Party was drawn out of the Citadel of *Liege*, which had join'd with some Troops of *Maestricks*, and made together 4000 Men, having with them several pieces of Cannon, and that it was believ'd they had order'd to attack the Castle of *Heer*, between *Liege* and *St. Tron*, into which the *Dutch* have lately put a Garison; that the *French* have taken the Castle of *Hamael*, situate about two Leagues from *Tongres*, to hinder the incursions of the *Dutch* at *Hassel*; though some are ready to believe that these motions of the *French* in the Countrey of *Liege*, are only to entertain the *Dutch*, and keep them from assisting us against the Marschal d' *Humieres*, whose designs are the more feared, for that the Governor of *Leuwe* has sent to acquaint his Excellency, that the *French* are drawing a great many Troops together out of their Garisons on the *Meuse*, to join the said Marschal, whose intention, some say, is only to conduct a great Convoy to *Liege* and *Mastricht*. Our Governor has sent orders to the Cavalry quarter'd in *Brabant* towards the Countrey of *Liege*, to draw together and join the *Dutch* of *Hassel*, to see if they can attempt any thing upon the Enemy. Amidst these Alarms on that side it is feared the Marquis de *Chamilly* may put his design in execution upon the Countrey of *Wass*, though all imaginable care is taken for its security.

Hague, Jan. 28. The Bishop of *Osnabrug* hath been some dayes incognito at the Princes House in the Wood, and having concluded the Treaty he had in hand with *Spain* and this State, by which he obliges himself to act with a Body of 8 or 9000 Men this Campaign by way of diversion, is returned home again. From *Sueden* we have the confirmation of the conclusion of the Treaty of Commerce between that Crown and this State, which is thought may be a great step to a Peace. From *Liege* they write, that the *Dutch* Troops had possess'd themselves of the Castle of *Heers*, where all the Countrey people of the Neighborhood had shelter'd a vast quantity of Corn, Cattle, Provisions; and the best of their Goods. Our Letters from *Bremen* of the 25 instant, assure us, that *Carelsburg* was surrendred the 22 instant, according to the Capitulation.

Paris, Jan. 25. The 15 instant, his Excellency my Lord *Berkeley*, Ambassador Extraordinary of His Majesty of *Great Britain*, made his publick Entry into this City, with the usual Ceremonies, accompanied with the Duke of *Luxemburg*, and the Sieur de *Bouvent*, Introducer of Ambassadors, who had been to receive him with the Kings Coaches at *Rambouillet*, and conducted him to the House appointed for the Reception of all Ambassadors, being followed with a numerous Train of Coaches. Arriving there, his Excellency was Complimented in the name of the King by the Duke de *Cruqui*, by the Count de *Montignac*

on the part of the Queen, and by the Count de *Plessys* and the Marquis de *Bron*; in the name of the Duke and Dutchess of *Orleans*. The 17, his Excellency was conducted to his first publick Audiences of their Majesty, with the several Respects and Ceremonies that are usually practis'd on such occasions. From *Alsacia* they write, that the new Fortifications which are making at *Saverne*, *Hagenaw* and *Schlusbadt*, advance apace; that at this latter place there are constantly 4000 men at work; that the other preparations for the next Campaign are very extraordinary, and in great forwardness; that the *French* Commissaries have bought up a great quantity of Horses in *Switzerland*, not without giving the Spanish Ambassador with the Cantons occasion to complain thereof. Our Letters from *Nancy* of the 18 instant, tell us, That the 4th instant, the Count de *Choisent*, Marschal de Camp, parted from thence, causing at the same time a report to be spread abroad, that he went to visit and change the Garisons of several places, the better to cover the design he had upon the City of *Dona Ponts*, fortified with a very good Wall, and with two deep Ditches full of Water. He took his way to *Sarbrucke*, and arriv'd there the 9th with 500 Horses, 150 Dragoons, and 1200 Foot, which he had drawn together in his march. The 11, about 3 in the morning, he parted with these Troops from *Sarbrucke*, having with him two pieces of Cannon, and 30 Wagons laden with Ammunition, and after a march of 10 hours, arriv'd before the City of *Dona Ponts*; he caus'd his Cannon to be several times discharged against the place, and those within during the whole night made the same return with their Artillery. The next morning the Count de *Choisent* approach'd nearer to the Town, afterwards his Troops pass'd the River, and under the Cover of certain Houses, advanced so opportunely, that they were come to the first Ditch, before discover'd: at which the Inhabitants and Soldiers in Garison there were so surpris'd, that they immediately deliver'd up the place, so which our Troops possess'd themselves without any loss, opening thereby a free passage to *Phillipsburgh*. The Marquis de *la Frislarie*, Lieutenant General of the Artillery, command'd in this Expedition under the Marquis de *Choisent*.

Whitehall, Jan. 22. This day His Majesty was pleas'd to cause the Right Reverend Father in God *Henry* Lord Bishop of *London*, to be Sworn one of the Lords of His Privy Council; and accordingly his Lordship took his place at the Board.
