

Navy-Office, January 6, 1769.

Whereas the Right Honourable the Lords Commissioners of the Admiralty have thought proper, upon the Recommendation of the Commissioners appointed by Act of Parliament for the Discovery of the Longitude at Sea, to direct, that no Master shall be henceforward appointed to any of His Majesty's Ships or Vessels until he shall have learnt or perfected himself in the Use of a Nautical Almanack or Astronomical Ephemeris, annually published by the said Commissioners, in Tables (they have engaged proper Persons to compute) for shewing the Effects of Parallax and Refraction, in order to make the Lunar Tables constructed by the late Professor Meyer more generally useful, and thereby facilitate the above-mentioned Discovery, and in the Use of Hadley's Quadrant in taking the Lunar Observations; in all which Particulars they are to be instructed by the Head Master or Mathematical Usher of the Royal Academy at Portsmouth, or by Mr. Robert Bishop or Mr. Samuel Dunn, both living in London, from one of whom they are to produce a Certificate that they are properly qualified to make Use of the said Almanack, the Tables (when published) and Quadrant as above-mentioned: The Principal Officers and Commissioners of His Majesty's Navy do hereby give Notice to all Masters in the Royal Navy, that it is expected they take the earliest Opportunity of getting themselves instructed in these Particulars, in order to be able to produce to them the Certificate hereby required when they shall be called upon to serve, as without it they cannot receive any future Warrant.

This Day is published,

(To be continued on the 10th and 25th of each Month)

(Being the most complete Treatise on the Subject ever published in any Language)

## A Methodical Synopsis of MINERAL WATERS.

(Being a Work of Twenty-one Years.)

Comprehending above 260 of the most celebrated Medicinal Waters, both cold and hot, of Great-Britain, Ireland, France, Germany, and Italy, besides many other Parts of the World: Wherein the several impregnating Minerals being previously described, and their Characteristics investigated, each Water is reduced to its proper Genus; and, besides the particular Analysis, the Virtues, Uses, and Abuses of the Waters are described, in a Method intirely new; with a far more distinct and ample Account of the Sulphurous, Vitriolic, and Copper Waters, than has been published. Interspersed with Tables tending to throw Light upon this intricate Subject: And Abstracts of the principal Authors who have treated on Mineral Waters; and the Accounts of Waters, dispersed in the Acts of the several learned Societies in Europe, are collected and properly digested.
