fed the Rhine ; the Imperialist's keep still their Bridge ! over that River at Rhinfeldt.

Liege, Odleb. 23. Some days fince a party of Dutch Troops came trom Haffelt (where is their head-quarter) to Tongres, by made no long flay there, their business being onely to lecure a number of Waggons, who came hitnes from Haffelt to fetch Coals : after they were sone the French of Macffricht came to Tongres, and threatned to burn the place, for failing to pay their Contributions ; but at the request of feveral Religious, the faid execution was deferred for fome days longer. Since the Dutch are come again to Tongres, though we know not whether it is with intention to remain there or not. This day arrived here a Deputy from Haffelt, with a guard of 4000 Horfe, who are now lodged in our Suburbs ; we know not as yet the reason of their coming. I he other day happened a Rencounter between a French and Spanish party near Hove, in which feveral were killed on both fides.

Vliffingen, Octob. 20. The 18 inftantarrived here two of the fix Capers which deftroyed the French Fishing Fleet at Newfourdlands having with them 3 PriZes ; they parted from their Companions near the River of Canada.

Amsterdam, Octob. 26. In the Texel is arrived the Ship called the King David, being one of the Prizes taken by the Sieur Binche, from the French at St Damin go, and by it we have the confirmation that these following French Ships were taken at St Domingo, by the faid Sieur Binche : The Crowned Lille, mounted with 24 Guns, the Queen with 14 Guns, the Alcion with 18 Guns, the Hope of 6 Guns, the Floriffant of 16 Guns, the Dolphin with 24 Guns, the Briftol 10 Guns, and the Fortune 12 Guns ; but two of the faid Ships were afterwards burnt. Most of the Man of War of this State that were employed in the Balticke this Summer are arrived in the Texel, under the command of the Vice admiral Cornelis Eversz. The Sieur Engel de Ruyter is already here in Town.

Hague, Octob. 27. This day his Highness came to Town, from h is House at Sorguliet, his Guards du Corps arriving here two days before. The Regiment of Footguards is ftillat Bergen-op-Zoom, expeding farther orders. The Fiscael having been fent from hence by order of the States to Rotterdam, to feize the principal Authors of the late diforders there, on occasion of the Letting to Farm the Excize upon Wine, we are told that those Magistrates opposed at first the faid Fiscael in the executing his Commission, and seemed resolved to protect their Burghers, but afterwards, upon farther confideration, permitted him to do his Office, who apprehended fome of those Mutineers, the reft being fled. The Forces in Flanders are now actually separated; 16 Dutch Regiments will winter in those Provinces, belides those that have their quarters at Haffelt. We have nothing new by the last Ordinary from Germany, the Armies not having made any motion fince our laft; but what is most wondred at is, that the Munster and Lunenburg Troops have not yet paffed the Rhine , fo that we begin to believe that they defign not to enter upon any action this Campagne, but onely to provide for themfelves good Winter-quarters. From Zealand we have the confirmation of the arrival of two Capersar Vliffingen, who, with the affiftance of four others, took and de-Aroyed about 20 fail of French Ships, that were fifting at Newfoundland, and afterwards landed and took the Calle of Canada.

Brafels, Odeb. 27. All our Troops are finally fepa-

rated, and marching to their feveral Winter-quarsers? Those of the Duke of Ofnabrug are gone with a Convoy towards Guelderland, where they are to winter; but the Troops defigned for Cambray, under the commint of Don Francis o Maries de Velasco, have not been able to get farther than Va enciennes, for that the French are fo posted about Cambray, that there is no poffibility of getting into the place; the French stem to hive a defign to block it up this Winter, that the taking of it may be the more easie the next Campigne; and as we hear they intend to do the like with St Omer. We are affured that the Duke de Villa Hermofa parted this morning from his quarters at Mortaigne, on his way to Animerp, from whence his Excellency is expected in a day or two. Marcfchal d' Humieres bas fent a confiderable Body of Mea to Leffines, which they are fortifying, and when that is done, wil, it's faid, do the like to the Calile of Leikerke and Aloft. This afternoon arrived here his Excellency the Lord Berkley, Am biffador Extraordinaly of His Majefty of Great Britain, on his way to Nimeguen, having been received with all imaginable honors and respects. We have advice that the Lunenburg and Munster Troops have passed the Rhine at Coblentz.

Paris, OHob. 28. We have not at prefent any thing new from abroad, our last Letters from Alfacetelling us, that the Duke of Luxemburg continued encamped near Mulbauf n, and the Imperial Army between Bafle and Fribarg, on the other fide of In the mean time preparations are making here the Rhine. againft Spring, and, as we are told, Commiftions have not been onely given out for the recruiting the Regiments already on font, but likewile for the railing of new. The Elector of Bava in, we hear, continues firm in his Neutralit, and to the De-puties that were fent to him from the Electoral Colledge affembled at Ratticonne answered, that he would not be wanting in. any thing on his part which might contribute to the procuring a ge ieral Peace. irbit.bs.!! Offob. 19 This day, about noon, His Majefty,ac-

irbit.kall Ofteb. 19 This day, about noon, His Majefty,ac-companied by his Royal Highness, returned hither from News market.
