Rome, Aug. 10.

**P** Rince *Radzewille*, the Polish Ambassador, appears now with a great and Magnificent Train. He had some days since his publick Audience of the Pope, who afterwards entertained him and all his Attendants at Dinner, the Pope and the Prince Dining in the same Room, though at several Tables. The French Ambassador has had divers meetings with Cardinal *Cibo* and others concerning the matters in difference between the Pope and the French King, about the Regalij, which it's believed an expedient will be found to accommodate to that Kings satisfaction. This Afternoon dyed Cardinal *Nini*; so that there are now 20 places vacant in the Colledge of Cardinals.

*Florence, Aug. 15.* The Duke of *Mantoua*, we hear, is perfectly recovered of the Bruise he received by a fall from his Horse. From *Milan* they write that a late Tempest has very much destroyed part of the Country of *Cremona*, several peole and a great number of Cattle having been killed. It is reported that the Turks are drawing considerable Forces together in the *Morea*, of which the *Venetians* as well as the Spaniards are jealous, the latter being concerned for *Sicily* and *Naples*. From *Rome* they write, That there was no good understanding between the French Ambassador and Prince *Radzewille*, Ambassador of *Poland*, the latter pretending to be Treated with the Title of Highness, which the French Ambassador refused to give him.

*Warsaw, Aug. 17.* We are expecting to hear of the arrival of the Ambassador sent by the King to the Czar of *Moscovy*, to assure him of the readyness of this Crown to enter into a League Offensive and Defensive, provided it may be upon equal and reasonable Terms, which those the *Moscovite* Ambassadors, that were lately here, proposed, were not looked upon to be; and that the Czar will restore to this Crown *Smolensko* and *Kjovia*, which he was obliged by Treaty to have done several years since. When we know what reception this Ambassador has at that Court, we shall be able to make a judgment of the Czar's intentions in this matter of the League, with which we have been so long amused.

*Lintz, Aug. 25.* The Emperor has declared that his Resolution is to return to *Vienna* the beginning of *October*, and it's said that the 6th of *September* is fixed for his departure from hence. In the mean time we receive an account from *Hungary*, That several Skirmishes and rencounters have lately happened between the Imperial Troops and small Parties of the Rebels, in which divers have been killed on both sides without any considerable advantage to either; the misfortune is that the dispositions appear not to be such as is necessary they should be before it can be hoped things should be accommo-

dated, of which, as matters now stand, there is no great Prospect. From *Poland* we have an account that the Polish and Turkish Armies were Encamped not far from each other, and that the Commissioners were to meet between the two Camps for the regulating the Limits, in which the Turks did shew much forwardness, declaring that the Grand Signiors desire was to live in Peace and Friendship with the Crown of *Poland*, and that he would prosecute the War he was engaged in with all his force against the *Moscovites*. But the Poles do not think fit to rely upon those kind of assurances, and are therefore resolved to be upon their Guard.

*Berlin, Aug. 28.* Yesterday the Elector of *Brandenburg* came hither from *Postdam*, and was present at the review of Collonel *Wangelin's* Regiment of Foot, after which the Officers entertained the Elector at Dinner in the Park, under Tents set up for that purpose, the Colonel, Lieutenant Colonel, and Captains serving him instead of the Officers of his Household. The Count *de Thun*, Envoy Extraordinary from the Emperor to the King of *England*, not having been able to obtain a passage through the Elector of *Bavaria's* Territories, without first performing a Quarantine, has sent hither to desire liberty to pass this way, which it's believed will hardly be granted him, for the Apprehensions (people have of the Plague, which is very much spread in *Saxony*, there being about 50 Villages Infected) are very great. The Rebels in *Hungary* are said to increase in strength, and that they promise themselves an assistance from the Turks, who it's feared will next Spring employ their Arms on that side.

*Strasburg, Aug. 27.* The Sieur *de Monclar*, who went to wait upon the King at *Stenay* is coming back; his Troops continue encamped about three Leagues from this City, where people have for two or three days past been in some little disorder upon a report that has been spread abroad, as if the Bishop of *Strasburg* had said publicly, That in case this City did not give him satisfaction, as to the Rights and Jurisdictions which he pretends, he would make use of the Assistance which the French King had promised him to oblige them to do it; but whatever is published of this kind, we cannot think that the said Bishop has any other design than in a friendly manner to adjust the matters in difference, having to that purpose appointed Deputies to meet and Treat with those of this City.

*Cologne, Aug. 30.* It has been noised about for these three or four days past, That the City of *Strasburg* was invested by the French; but the Letters we receive from thence this day make not the least mention of any such thing, nor of any danger they apprehend themselves to be in. The Bishop of *Strasburg* has been at *Bonne*, and has had a meeting with the Prince of *Saxe Eysenach*. Prince *William* of *Furtemberg* is preparing for his return to *France*, having as is said advanced very little in his endeavours

to dispose our Elector to consent to the choosing a Coadjutor, which could he have done, he would then have employed his Interests in favour of his Brother the Bishop of Strasburg.

*Hamburg Aug. 30.* The Velt Marshal *Conningsmarke* is still here, and two days since came hither the Duke of *Holslein Gottorp*. It's supposed he will make no long stay.

*Amsterdam, Sept. 3.* The difference between the Provinces of *Holland* and *Zealand* having gone so far, as that the latter had appointed one or two Men of War to require of all Vessels coming from *Holland*, that passed within their Jurisdiction, a certain Toll, which gave a great disturbance to Trade, the Prince of *Orange*, who as their Stadtholder is labouring to compose this matter, has already, as we are informed, prevailed with the States of *Zealand* to withdraw those Men of War, and to send their Deputies to the *Hague*, in order to the accommodating the said differences. The Prince, as we are told, is going to *Zell* to hunt: some report that it's probable he will see the Elector of *Brandenburg*, or at least the Electoral Prince, his Son, before he return. The States-General have sent a Deputation to the States of *Groningen*, to press them to satisfy their part of the subsidies which they are still owing to the Princes of *Lunenburg*.

*Hague, Sept. 3.* To-morrow being the day appointed for the meeting of the States of *Holland*, several of the Members of that Assembly are already come hither, and the Pensioner *Fagel* has been in Town since last Saturday to prepare matters for them. Their chief business will be to endeavour to compose the difference which is at present between this province and that of *Zealand*, and to inform themselves how far the late Tax of the 200th penny has answered the intention in raising it, that they may thereupon take their measures accordingly. The Prince of *Orange* is not expected here till Friday next, and designs within few days after to make a step to the Duke of *Zell's* Court, where great preparations are making to receive his Highness, and particularly to entertain him with Hunting, which is said to be the chief occasion of his Journey. The Swedish Envoy Extraordinary, Monsieur *Guldenstolp*, is preparing to appear publicly, his Equipage being almost in a readiness. From *Ratisbonne* they write, That some of the Princes of the Empire who have suffered the most by the late proceedings of the French, did by their Deputies at the Dyet very earnestly press the States to take some vigorous resolution, such as may be able to remove those heavy pressures they lay upon, which though the Dyet is sufficiently sensible of, yet it seems they do not think this a proper conjuncture to shew their resentment in, and have therefore resolved to endeavour by amicable means to induce the French King to give satisfaction to the Princes injured. Mr. *Sidney* returned from *Dieren* the last night.

*Brussels, Sept. 3.* The Heer *Dyckvelt*, who in his late return from *France*, where he was Ambassador from the States-General of the *United Provinces*, was ordered to stop here, is gone with the Duke de *Villa Hermosa* into *Flanders*; part of his Business is to solicit the Payment of the moneys which the Spaniards are owing to the Prince of *Orange*, to whom they were obliged to pay 40000 Guilders a Month while he was in the Field with the Army,

for the defraying several necessary Expences. The Duke de *Villa Hermosa* will return hither in time the next week. We have Letters from *Spain* by the way of *France* which say a thing of the departure of our new Governour the Prince of *Larima* from *Madrid*.

*Paris, Sept. 7.* We are now expecting to hear what the Kings final resolution is in the affair concerning the Title of *Burgundy*; for the last Term which His Majesty granted the Spaniards at the instance of the States-General of the *United Provinces*, will now quickly expire; and in the mean time the French Commissioners at *Courtray* have cas'd to have any Conferences with those of *Spain*. The 4th Instant the Dutch Ambassador, the Heer *Van Varenberg* had his first Audience of the King. And the next day the Sicur *Heug*, Ambassador from *Denmark*, had a private Audience of his Majesty.

*Plymouth, Aug. 27.* Yesterday morning came in here the *Oxford* Frigate Captain *Mason* Commander, and Sailed again in the Evening to Cruise.

*Windsoer, Aug. 31.* This day in the Afternoon a Chapter being Summoned in the usual Form, and in the usual place, of the Knights Companions of the most Noble Order of the Garter, the Sovereign being present, there were Elected into the Vacancies of that Order his Grace the Duke of *Grafton*, who is now at Sea, and the Right Honourable the Earl of *Salisbury*; but the Inveiture was not proceeded upon, by reason of both their absence. After that, His Majesty went in his Mantle only into the Royal Chappel, and there, attended by the Knights Companion's likewise in their Mantles, made the usual Offerings during the Service of the Church appropriated to that Ceremony.
