From Honday November 15. to elititstap November 18. 1680.

Milan, Octob. 23.

Ur Governor the Count de Melgar having received Orders from Spain, to transmit thither an exact Account of the Forces which the King has an foot in this Country; his Excellency has appointed a general Mußer of the faid Troops. on the 30th Inflant, that he may be able to comply with the faid Orders. His Excellency has likewife ordered some thousand of Arms to be provided for the Soldiers that are already arrived, as well as those that are expected from Spain. From Turin they write, that they were expecting at that Court an Ambalfador from the Crown of Portugal.

Genoua, Nov. 6. The 3 Inflant arrived here feven French Ships laden with Poor-Jack: The fame day came in two Dutch Merchant Ships, laden with Maßs, Canon, and Canon-fhot, And yefterday two Dutch men of War, that had convoyed fome Merchant Ships of that Nation to Leghorne, returned hither, having on board 300000 Dollars for this place. The Britton, the only Englifh Ship in this Port, is haltening for Leghorn, to goe from thenced under the Convoy of Captain Story in the Anteloge, for Zant.

Dantzick, Nov 9. From the Frontiers we have Advice, that the Turks have during the Treaty, which is ftill depending for the adjusting the Limits, poffeffed themfelves of Czarkiew, and two other fmall places belonging to the Crown of Foland. And from Wilda, the chief City of Livonia they write, that the Polish Ambassador was returning home from Moskow, not having been able to effect any thing at that Court, the reason of which is sufp. cted to be, that the Mofcovites are fecretly Treating with the Turks concerning a Peace, while there are those that fay it is already concluded; however, the Czar is fending, as we are informed, an Ambal fador to the King of *Poland*, to fatisfie him of the fincerity of his intentions, and to make fresh Propolals concerning the Alliance, which has been fo long in agitation, but it is probable this Ambaffador will have the fame fuccels at the Polifh Court, as the Polish Ambassador had at that of Moscow; for the Poles finding, that they are not to exp ct any confiderable affiftance from the Princes of Chriflendom, and that they can have no confidence in the Molcovi es its believed they will wholly apply themfelves to Peace.

Copenhagen, Nov. 9. The Matter concerning the Evacuation of Wifmar is wholly adjusted, the Moneys are paid, and the Or lets iffued, so that that place will now in few days be put into the hands of the Swedes. The Lord Bodmin, 'Ervoye Extraordinary from the King of P g'and, has some days fince given in a Memorial, to which he is expecting an Answer. \* Rafisbonhe, Nov. 12. The States of the Empire Affembled here, have received a Letter from the French King, in anfwer to that they writ to him fome time fince, complaining of the refractions of the Peace of Nineguen, in which that King justifues, his proceedings, but at the fame time feems to 1 have a great regard for the Frinces of the Empire Who in the mean time continue forms of them to fuffer very much.

<sup>a</sup>Lintz. Nov. 12. The new Levies which the Emperor has refolved to make, are begun, as well in the Empire, as in the Hereditary Countreys; and that fuch diligence will be ufed, as it is hoped they will be figlified before Spring, when the Emperor will have 60000 Men in his Pay. Count Taff, whem the Emperor, as we told you in our laft, is fending to feveral Princes of the Empire, will be difpatch'd in few days. From Hungary we have an Account, that the Treaty wi hate Malecontents was for ar advanc'd, that it was not doubted, but it would be fpeedily concluded; and the reafon that is given for their being for much difpoled to a Peace, is, that they have not of late had that countenance at Conflantinople, as they had promifed themfelves.

Strasburg, Nov. 15. Our Bilhop is now at Zabern, from whence he intends in few days, to continue his journey for France. The laft week a great many pieces of Canon were carried by water by this City to Brifac, where they are to be new Caft. We are told, that the Emperor is fending feveral Troops towards the Rhine, for the fecurity of the Princes boldering upon it.

Berlin, Nov 16. The Elector, who we told you in our last was ill of the Gout, is now to well as to go abroad, and its believed, will in a short time come hither, to fpend the rell of the Winter in this place. The Plague is at laft come into a Village in the Countrey of Maegdebourg, belonging to this Elector, by a very firange accident. In the Countrey of Saxony wh ch lies next to it, and where the Plague has lo g been, there is is great-want of Provisions, that the Inhabitants of an infected Village, were forced through Hu iger, to com? and plunder a Village belonging to this Elector, and nave by that means communicated the Infection, which & Gode be thanked ) is not come into this Counarch Hif its does, the Court will remove to Koningsberg in Pruffia, of which there has been tome dutcourfe al-ready. Here is exp-fied to marrow i sthis Town a Duchefs of Ho flein, Niede tothis Elect cis, who comes from the Emperors Court, where her Huss band was in Employmen, as G neral-Ma or during There are fill great Reports of new Lc. the War vice, which the Emperor is making in the Empirity and Court Taff is lent to the Circles of Suabia and Franconia to follicite them. 'The Printed News from Leipfick fays, that the Plague Continu's there with the fame violence as formerly 3 but the Report of the Town is, that it decreases confiderably, which if it does not, that City will be qui e ruined a And

it is faid that the Elector of Mayence is endeavouring to get the Fair removed from thence to his Town of Erfort; which if he does, it will be a great loss to all the Countrey of Sarony. Every body here is in great expectation of the Answer from spain, to the Electors Letter of the 22 of September, justifying his Reprilal; upon that Answer it is thought will depend the good or bad fuccels of that Affair.

Cologne, Nov. 1.9. Two days fince arrived here Mr. Bartue, Envoye Extraordinary from the Kiegof England to the Princes on the Rhine. The Affair concerning the old Burgermalters, who are accused by the Commonalty, make a great deal of flir, and many people apprehend, it will not be determined without fome diffurbance (the ordinary fort of people being vory much incenfed) to prevent which, flict Guards are kept every night.

Hamburg, Nov. 19. From Saxony we have an Account, that the young El. ctor had made a great Reformation in his Court; that he had discharged a great many of the Officers of his Fathers Houthold, intending in that, and in his whole way of living, to leffen his Expences: Inflead whereof he was refilved to keep up an Army of 20000 men, b, ing a Prince of a very Martial Di'polition, and that he had already made choice of the general Officers to Command it. From Poland they write, that the Conferences concerning the adjulling the Limits, were put off till Spring; and that therenpon the Polifh Troops were going into their Winter Quarters. The Duke of Hanover came two days fince to Zell, to take his leave of his Brother, before his departure for Italy, whither he is going. Wifmar will certainly be reftored to the Swedes in few days,

Amsterdam, Nov. 22. The States of Holland met the 20th Inflant; we do not expect this Seffion will produce any thing of great moment, it being intended chiefly for Domestique Affairs. It has been reported that the Elector of Brandenburg was fo much diffatisfied with the Placaet publiched by the States General, for the recalling their Subjects out of the Service of Forreign Princes, which he lookt upon as chiefly meant against himself, that he had refolved to recall fuch of his Subjects as are in the fervice of this State : The affair of Liege may have great confequences, for that City is refolved to perhft in the Refolutions they have taken not to fubmit to the new Impositions laid upon them by their Prince, and have written to the States-General, to acquaint them therewith, and to defire them to fland by them in it.

Haque, Nov. 22. The City of Liege has written a Letter to the States-General, in which they acquaint them, that they are politively refolved not to fubmit to the Imposition of the 60th penny laid by the Elector of Cologne upon all Merchandizes, and defire their Affiftance, in cafe they shall have need of it; upon which we do not hear that the States have as yet taken any Refolution. The States have answered the Letter written to them by the Duke of Neuburg, concerning the Arrears of Sublidi s due to him, by which they promife the payment thereof. The flate of the War for the next year, having been formed by the Council of State, the fame was yefterday prefented to the States-General, who have ordered it to be communicated to the feveral Brovinces, for their approbation. We are told that it differs very little from that of the laft year.

Bruffels, Nov. 20. The Provinces having prefented the Prince of Parma with feveral fums of Money, as they have accustomed to do to all their Governors, upon their coming to the Government; his Highness has been to generous, as to employ the fame for the publick fervice, and particularly, for the providing new Cloaths for the Soldiers in this Province. At Liege things are in the fame pollure we gave you an account of in cur former, and they go on to make Levies, and to provide for their Defence and Security, in cafe their Prince the Elector of Cologne shall employ force against them, as it has been reported he intends to do; though as yet we do not hear that any Troops are in Motion for that purpole. The Prince of Parma's Son is gone for England.

Verfailles, Nov. 15. The 12th Inflant the Marquis de Ferrera, Ambassador from the Duke of Savoye, had his publick Audience. Here has been a report of great diffurbances at Lubon, and that the Prince Regent had cauled the chi-f Magiltrate of the City to be fecured, which our next Letters from Portugal will let us know what ground there is for.
