From Thursday December 30. to Monday January 3. 1680.

Zolkiew, Nov. 24.

THe King of Poland is still here. The 18th arrived an Envoy from the *Cham* of *Tartary*, to whom the King gave Audience the same day; he delivered a Letter to his Majesty from the *Cham*, who therein offers his good offices for the composing any differences that may be depending between this Crown and the *Turks*; intimating withal, that if care be not taken to determine them, they may give occasion to a War. The Provincial Dyets are holding in these parts, in order to the General Dyet that is to meet at *Warsaw*.

Warsaw, Nov. 29. Our last advices from the Frontiers confirm what we have already told you concerning the *Turks* having taken their winter quarters along the *Danube*, their head quarters being at *Budzwil*; the same Letters assure us, that they are making great preparations against Spring; that it is the general opinion, that the Grand Signior will be at the head of them himself, or at least the Grand Vizier; and that they have ordered the *Tatars* to come and winter in the *Ukrain*, that so they may be ready to join with them in the Spring: these advices does a little alarm this Kingdom, against which, we have reason to fear, the *Turks* have their designs, as well as against the *Moscovites*: but that which is very much wondered at, is, that though most of our great men seem to be of that opinion, yet no common measures have hitherto been taken between the *Moscovites* and Us, for our mutual preservation and defence; several Embassies have been indeed made for that purpose, but nothing has been done, of which we lay the fault on the *Moscovites*, and they on Us: But the great expectation now is, what the General Dyet, which is to meet the 15th of *January* next, will produce; amongst other Foreign Ministers that will be here against that time, will be Ambassadors of the *Czar* of *Moscovie*, who they say, will make very advantageous offers, in case this Crown will join with the *Czar* in the War against the *Turks*.

Madrid, Decemb. 12. We are told, that the King has demanded a Supply of Moneys of the several Councils, and particularly of ~~the~~ the *Eight* of his *Church*, for his Dominions in *Italy*, who, to raise it, have proposed to sell several Offices; but in that, great inconveniences will be found. This week the Duke de *Medina Celi*, the Chief Minister of this Court, received by an Express Letters from the Count de *Melgar*, Governor of *Milan*, in which his Excellency very much presses,

that he may be supplied with the Moneys, that have been promised him from hence, for the payment of the Troops; and for the carrying on the new Fortifications. The Duke de *Villa Hermosa*, late Governor of the *Spanish Netherlands*, is arrived at *Barcelona*, and will be here very speedily. We are told that a Squadron of 30 Ships of War, is ordered to be fitted out against Spring.

Genova, Decemb. 11. The weather having been extraordinary bad of late, no Ships have come into this Port these six days. The *Merchants Goodwill*, bound for *Trepany*, to lade Salt, is ready to S-yll so soon as the weather permits; and the *St. Malo's* men to lade Oyls in the *Rivera* for *France*.

Genova, Decemb. 18. This week arrived here two French Ships, one with Rye in 40 days from *Havre de Grace*, and the other in 10 days from *Marseilles* and *Lisbonne*, both lade Oyls for *France*. Four days since five of the *St. Malo's* men, we told you of in our last, parted hence for the *Rivera*. From *Marseilles* they write, that eight French Gallies were again fitting out there for these parts. Letters from *Argiers* give an account, That 13 of these Pirates are abroad, and four more preparing to go to Sea; and that two Dutch Ships, laden with Ammunitions, which the States General in pursuance of the Treaty of Peace, were to send to that Government, was arrived there.

Vienna, Decemb. 12. The Treaty that was concluded on the 15th of the last Month between the Imperialists and the *Hungarians*, for a Cessation of Arms for six Months, being ratified by the Emperor, the Troops are gone to their quarters, the three Counties of *Ugats*, *Bereczk* and *Zathmar* being designed for the *Hungarian* Troops; General *Caprara* is marched towards the River *Teisse*, and taken his Quarters in *Cassovia* and *Eperies*. There is a discourse, that the States of *Hungary* will meet in *March* next, and that the Emperor will be there in Person; And on the other side, it is said, That the *Turks* are tampering with Count *Teckelly*, and several other of the chief of the Malecontents, that they make them great offers, in case they put themselves under the protection of the Grand Signior; but it is to be hoped, that having found themselves so often abused by the fair promises of the Turkish Ministers, they do now know them too well to be influenced by them. The Duke of *Lorraine* is returned to *Innspruck*, where he will continue all the winter; But when the Emperor comes hither it's believed he will return to wait upon his Imperial Majesty.

Berlin, Decemb. 18. Preparations are making here against Spring; Orders being given for the casting several new pieces of Cannon; and a great many new Pontons are making for the passing of Rivers;

Rivers; so that though we do not hear our Elector has any design of offending others, yet will be in a condition not to be liable to be offended himself. It is said here, that Prince Louis was contracted to the Princess Radzeville in Prussia on the second instant, and that the Marriage may soon follow, but the time is not yet certain. The Plague at *Leipsick* and *Dresden*, decreases very considerably; and it is hoped, that this winter, which is like to prove a very hard one, will free those places from the infection. Lieutenant General *Spaen* parted hence some days since for the Country of *Cleves*; and the reason of his having staid so long here, was, the Duke of *Zells* refusing him a pass to go through his Countreys; so that he was forced to go through *Magdeburg*, where there is yet some small appearance of the Plague. Here is much discourse of the Comet which have been lately seen; and this Evening we have had much lightening here.

Strasbourg, Decemb. 22. There is at present little to write from hence, unless we repeat what we have so often told you, concerning the great preparations that are making, and the apprehensions we have here of them. Our last Letters from *Ratisbonne* give us an account, That it had been proposed at the Diet, that the Imperial Chamber ought to be removed from *Spire*, to some place of greater security; and that the Deputies seemed all of an opinion, that it was a thing very necessary, though they had not yet taken any formal resolution in it.

Hamburg, Decemb. 23. The Magistrates of *Leipsick* have acquainted the Neighboring Towns, that the Plague is wholly ceased in their City, and desire they will renew their Trade with them. We have nothing new from *Sweden* or *Denmark*, those Northern Crowns have a very good correspondence; and the reports that were spread abroad, as if the King of *Denmark* had a jealousy of the preparations that were making by the King of *Sweden* to put his Army, and his Navy into a posture, do now sufficiently appear to be groundless. There is now much discourse again of the likelihood there is, that the Crown of *Poland* will enter into a War against the *Turks*, we shall know when the Diet meets, what that Kingdom will do.

Cologne, Decemb. 27. On Friday last arrived here the Baron de *Leyen*, Envoy of the Elector of *Mentz*, who has had Audience of our Elector. From *Strasbourg* they write, that they very much fear a new War in the Spring, and that vast Magazines are providing by the French at *Schlestadt* and other places. And that the Baron de *Monclar*, the French Kings Lieutenant General in *Alsace*, had commanded all the principal Officers to repair to *Brisach*, to acquaint them with some design they were to be employed in. And from *Frankfort* they write, that the Bishop of *Wurzburg* apprehending the French may have a design upon *Phillipsburg*, which covers his Territories, had sent thither 400 Dragoons, and 400 Foot, to reinforce the Garrison.

Brussels, Decemb. 31. His Highness is now pretty well recovered, but still keeps his bed; However this night he is to give Audience to Mon-

sieur de *Corseil*, Intendent of *Tournay*, who arrived here yesterday in quality of Envoy from the French King: what his errand is, we as yet know not, though it's feared it may be some new demand. The Count d' *Archino* is still at *Antwerp*, but we expect him back in two or three days; for this is the day appointed by that people to give their final answer in the matter of the subsidies. The States of *Brabant* proceed in adjusting their proportion of the aydes; yet we must expect the resolution of those of *Antwerp*, before theirs can be made effectual. The Nations of this City are again Assembled, in order to the renewing of the Imposts; but before they will consent to it, desire his Highness to promise them that none be exempted from the said Imposts, either Forreigners or others. In the meantime the Troops of this Province, and some of the Generals, have received 2 Months pay, and it's believed the general Reform will soon follow. Mr. *Legg* having had his Audience of Leave of his Highness, parted hence yesterday for *Germany*. The Marquis de *Burgamenero* is still here.

Paris, Jan. 1. We are told that the King is going to augment his Troops, and that Commissions are preparing for the Raising 20000 Men. The King has given the Government of *Thionville*, vacant by the death of the Marechal de *Grancey*, to the Sieur de *Casaux*. The Spanish Ambassador has complained of an Hostility committed by some French Troops in *Luxemburg*, who attacked a Castle belonging to the Prince of *Chemay*, though they did not take it, some Spanish Troops being privately gotten into the Place before; but several Soldiers were killed on both sides. People here begin to talk of an approaching War, which, by the preparations that are making, and the Orders that are given to raise Men, and buy Horses, seem to give them some ground for.

Pendennis, Decemb. 26. On Monday last, the wind being at West North West, the *Leopard* Frigate, together with several Merchant men, Sailed to their several Ports. Since came into this Harbour the *Olive-Branch* of *Topsham*, 150 Tuns, 14 Guns, and 25 men, *John Tringmore* Master, with Fruits from *Malago*, bound home, also the *Phoenix* of *Topsham*, *Thomas Lovell*, with Salt for a Market.

Falmouth, Decemb. 27. The *Olive-Branch* of *Topsham* together with 18 Merchant Ships more, under the Convoy of the *Sweepstakes* and *Mermaid* Frigates, arrived here the 23d instant from the *Streights*; they tell us, that about a fortnight since they met with the English Fleet of Merchant men, bound for the *Streights*, off of the Southern Cape, and that they supposed the rest of the Fleet that came in company with them, are going up the Channel.

Advertisements.

THe Kings Arms at Holborn Bridge, a Large and well customed Inn, in a very good Trade (the person who lately kept it being dead) is to be Lett, and Information concerning it may be had of Mr. Nath. Newbery at the Griffin in Broad-street.
