Published by Authority.

From Thursday April 21. to Monday April 25. 1681.

Lisbon, March 27.

THe 25th Instant was Signed the Contract of Marriage between the Duke of Savoy and our Infanta, by the Marquis de Dronero that Dukes Ambassador, and the Duke of Cadaval, who had for that purpose a Procurator from the Infanta, which being done, the Ambassador was conducted to an Audience of the Infanta, to whom he made his first Address kneeling, as to the Wife of his Sovereign, and presented to her a Letter from the Duke, wherein his Highness Declares his Resolution of coming hither the next year. The Express that was sent to Madrid to acquaint the King of Spain with the great Resentment the Prince Regent had of what had happened in America, and that it might have very ill Effects, and perhaps disturb the Friendship between the two Crowns, even here in Europe, if satisfaction was not given, is not yet returned; though in the meantime the Spanish Minister at this Court is not wanting in his Endeavours for the amicable composition of this Matter.

Turin, April 9. These Parts afford not at present any thing worth the Writing, all things being very quiet, and the Reports concerning Casal, which we have been so often Alarmed with, appearing to have no Foundation, so that People begin to be pretty well at ease as to that Matter, being satisfied that the Duke of Mantoua will not be prevailed with, to do a thing so prejudicial to the common Interest of Italy, as would be his parting with a Place of that Importance.

Genova, April 16. The 13th Instant parted hence the eight French Gallies on their return home. Our Letters from Rome do not as yet give us any hopes of an Accommodation between the Crown of France and that Court; but say, that things happen daily, which rather tend to the increasing the differences, and making the breach wider; and that there was a discourse of the Cardinal d'Estrees sudden return for France.

Vienna, April 17. The Emperor will part from hence on the 25th of this Month for Neustadt on the Frontiers of Hungary, and will continue there during the meeting of the Dyet at Oedenburg, at the opening whereof on the 28th his Imperial Majesty intends to be present. The Officers employed in making the new Levies, proceed therein with good success, and its not doubted but they will very suddenly have the number they are to raise, compleat. The Marquis de Bourgomano the Spanish Ambassador remains as yet incognito, however has frequent Conferences with the Ministers of

this Court, concerning the present state of Affairs.

Francfort, April 15. From Ratisbonne we have an Account, That on the seventh Instant the Dyet took into consideration the present State of the Empire, and after a long Debate concerning the most effectual means for the providing for its security; it was judged necessary to raise an Army, of sixty thousand Men, to be kept on foot for two years.

Strasburg, April 22. The French are drawing a body of an Army together at Saar Louis; several Regiments being on their march thither from Metz and other places. It is reported that the King of Sweden has made the Marquis of Baden-Dourlach Governor of the Duchy of Deuxponts.

Cologne, April 18. The Bishop of Munster is pretty well recovered of his late illness. We are told that endeavours are using to accommodate Matters between our Elector and the City of Liege; but they are not like to prevail, unless things be restored to the state they were formerly in, and his Electoral Highnesses Authority re-established upon its ancient foundation, and the Authors of the late troubles exemplarily punished. The King of Sweden being become Duke of Deuxponts, by the death of the late Duke, who dyed the 11th Instant, we are expecting to see how Matters will be ordered between him and the French, who are now possessed of that Country.

Hamburg, April 25. The Advice we received by the former Post is confirmed by the Letters come in this day from Warsaw, which say, That the Alliance between that Crown and the Moscovites was going to be concluded; and that the Elector of Brandenburg had promised to assist the Poles in the War they are now entering into against the Turks with 2000 Foot, 500 Horse, and 500 Dragoons. The King of Denmark has possessed himself of the Lards that belonged to Count Anthony of Oldenburg (who dyed not long since, leaving as is reported, his Wife, whom he Married not many Months before with Child) and has displaced all the former Officers, and put others in their rooms, against which some Commissioners of the said Lady and of Monsieur Guldenlieu protesting, they have by the Kings Order been secured. We do not hear that Monsieur Gourville the French Minister at the Court of the Duke of Zell is able to effect any thing.

Brussels April 29. On Sunday last the Prince of Parma received an Express from the Governor of Luxemburg, which gave an account that the Count de Bissy had received Orders from the French King to retire, with the Troops under his Command, out of that Country; and that he would in few days quit it accordingly, which makes us expect our next Letters

ters with some impatience. This Morning one of the Deacons of the Nations (as they call him) who was one of the most active in their late Assemblies in opposing their granting the Subsidies demanded by his Highness, was this morning seized by his Highness's Order, and sent Prisoner to the Castle of *Vilvord*, being charged with matters that deserve an exemplary Punishment. To morrow morning his Highness parts from hence for *Flanders*, will Lodge at *Dendermond*, and be the next day at *Gaunt*, and from thence will go to *Bruges* and *Ostend*, and will be back here by the end of the next Week; after which he will go to *Antwerp* and *Malmes*. The Duke of *Hannover's* youngest Son, who passed this place in his way to *Paris*, is returned, and intends to stay some days here: the Prince has presented him with a very fine Spanish Horse and a rich Furniture.

Hague, April 29. The States as we are informed have written to the Prince of *Orange*, To pray him to have a care of his Person, in the preservation whereof they have so great an Interest, and that he will return as soon as conveniently he can, for that they cannot dispatch the publick Affairs in his absence. According to the last Advice we had, his Highness will not return hither till about the middle of the next Month, and the Duke of *Zell* and other Princes of *Germany* intend to come with him. We have Letters from *Spain* and *Portugal*, which say, That according to all appearance the Action of the Governor of *Buenos Ayres* in *America* would have no farther consequence, and that the differences that are between the two Crowns about the Sovereignty of some Lands in those Parts, would be amicably determined. From *Paris* they write, That the Count *de la Fuente*, the Spanish Ambassador, had, in a late Audience he had of the King, been told, That Orders were sent to the French Troops that are in the Country of *Luxemburg*, to retire, which we are expecting to hear they have accordingly done. The States have desired leave of the Prince of *Parma*, That a Scotch Regiment, now at *Maestricht*, and which is ordered to *Breda* may pass through the Spanish Territories, that lye between those two places.

Marseilles, April 22. This afternoon arrived here a Vessel from *Alicant*, from whence she came on the 7th Instant, and tells us, That the *Hamphshire* Frigate was then there in Port, with twelve Merchant Ships under her Convoy, bound for *England*, and that they were ready to sail in a day or two. From *Cadix* we have Advice, That the Truce between the City of *Tangier* and the Moors was observed with great exactness; and that Sir *JAMES Leslie*, the King of *England's* Ambassador to the Emperor of *Morocco* was parted from *Tangier* for *Fex*, and that it was not doubted but that he would conclude a Peace for some years, the Moors seeming to be very desirous of it, and of living in such a Friendship with the English, as may open a Trade between the Town and the Country. The eight French Gallies are returned from the coast of *Italy*; there are ten others now sitting out with all diligence, and are its said, designed to the Westward, and will be Commanded by the Duke of *Mortemar* who is expected here in few days. Two men of War sailed the last week from *Thoulon* to cruise against the Tripolins, and the rest that are sitting there will be ready to put to Sea in a very short time.

Paris, April 30. The King has nominated Monsieur *de Cuvilly* and Monsieur *Courville* to be his Commissioners at the Conferences that are to be held at *Francfort*, for the adjusting all differences concerning the Limits and Dependencies of *Alsace*; and we understand that the Emperor has named the Bishop of *Gurck* and Count *Kinski* (two of his Plenipotentiaries at the Treaty of *Nimeguen*) to be there on his part; In the mean time Count *Mansfeldt* the Imperial Minister at this Court, has desired of the King, that things may be put into the same state they were in at the Signing of the Peace at *Nimeguen*; but he has been answered, That his Majesty will restore whatever shall be adjudged not to belong to him: but that in the interim the Chamber of *Metz* shall proceed according to the Method they are now in, and that he will cause the Decrees they make to be executed. The Moscowite Ambassadors are to make their publick Entry in few days, and are to have their Audience of the King at *Versailles*. The Bishops, who we formerly told you had had one or two Meetings concerning the Affair of the Regality, were to have met again on Monday last, to receive the Report of the Commissioners, to whose particular examination they had left the whole Matter, but it was put off till to morrow, by reason of the indisposition of some that were necessarily to be present. The Parliament of *Tholouze* has made a very severe Decree against the Grand Vicar of the Chapter of *Pamiers*, who we told you heretofore had done several things in favour of the Popes Pretensions, and thus there seems to be every day less hopes of an Accommodation.

Plymouth, April 19. Yesterday morning arrived here His Majesties Ship the *Phoenix*, Capt. *Blagden* Commander, with above 30 Sail of Merchantmen under his Convoy, bound to the Southward.
