Copy of a Letter from Admiral Sir Charles Cotton Bart. Commander in Chief of His Majesty's Ships and Vessels in the Mediterranean, to John Wilson Croker, Esq; dated on board His Majesty's Ship San Josef, off Toulon, 24th July 1810.

SIR,

A Continuance of strong Gales from the North West since the 15th Instant, obliged me to take Shelter under the Levant Island with the Fleet, from which, however, we were driven as far to the Eastward as Villa Franca. I have been at length enabled to gain the Rendezvous off Cape Sicie; and having had Communication with Captain Blackwood, the senior Officer in Shore, have received from him an Account of his Proceedings with the detached Squadron under his Orders, upon a Division of the Enemy's Fleet, consisting of Six Sail of the Line (one a Three-Decker with the Commander in Chief's Flag), and Four Frigates, coming out of Toulon on the 20th Instant, for the Purpose of enabling a Frigate and Convoy to get from Bandol, and no less, to endeavour to cut off the Euryalus and Sheerwater; and, in justice to the Captains of His Majesty's Ships named in the Margin*, I cannot desist from transmitting to the Lords Commissioners of the Admiralty the enclosed Copy of Captain Blackwood's Letter on the Subject, and I doubt not their Lordships will view with no small Degree of Satisfaction the Gallantry and Steadiness of these Ships, and, under the existing Circumstances, the determined Measure that Officer adopted by bringing to in order of Battle, with His Majesty's Squadron, against so superior a Force, and engaging the headmost Ships of the Enemy's Line, which had the Effect of completely frustrating their Intentions, as regarded the Euryalus and Sheerwater, though the latter was under their Guns, and received Three broadsides from one of the Line of Battle Ships, besides a Frigate, but without being struck by either.

The Enemy's Ships remain in the same State as usual in the outer Road of Toulon; Five or Six Sail daily stand out off the Harbour's Mouth to exercise

* Warspite, Ajax, Conqueror, Euryalus, and Sheerwater.

His Majesty's Ship Warspite, off Toulon, 20th of July 1810.

SIR,

IN a former Letter I did myself the Honour to acquaint you of the Enemy having twice come out in great Force, and failing in an Attempt to detach a Store Ship to the Eastward, and liberate a Frigate in Bandol, where we had forced her to take Refuge. This Morning they again came out with Six Sail of the Line, one of them of Three Decks, bearing the Commander in Chief's Flag, and Four Frigates; and as the Weather was light and variable I found it impossible to prevent the Junction of the Frigate in Bandol; I therefore endeavoured to collect the Squadron, and place ourselves without the Enemy in as good a Posture of Defence as I could, but owing to the Situation of the Euryalus and Sheerwater, who were obliged to cross their headmost Ships, and the Wind rather failing them, whilst the Enemy preserved it so entirely as to render the Capture of the Sheerwater certain, if not that of the Euryalus.

It became a Matter imperatively necessary that I should risk an Action, though at the Door of the Enemy, and with a Force so superior; a Step which, without such an Object, I should not have considered myself authorized in taking, particularly as you had been unavoidably blown off and out of Sight by the late heavy Gales.

I therefore brought to, with the Conqueror and Ajax altern of me, in such a Position as evinced my Determination to protect the Frigate and Brig, and I am happy to inform you, that the Result has proved as creditable to the British Flag as I could have wished or expected; for although the Enemy appeared equally as decided to endeavour to cut them off as we were to defend them, the Moment they came within reach of our Fire they hauled up in Succession their headmost Ships, giving us their Broadsides, and then tacked, in which we followed their Example, by also tacking; a Movement for which I am entirely indebted to Captain Otway's Promptness and good Judgement, who being the sternmost Ship in our Line, and perceiving the Enemy began to retreat, became the more anxious to endeavour to disable them, when after a few more Shots passing, and we had some Time previous to this Movement secured the Retreat of the Euryalus and Sheerwater, and the Wind rather failing us, we

wore and stood a little away to the Southward, which the Enemy most politely permitted us to do unhurt and unmolested, at a Time too when they had it fully in their Power to bring us to a decisive Action, under Circumstances as highly advantageous to them as they were the reverse to us; their Conduct therefore puts in a flattering and clear Point of View the Respect in which they hold the British Navy; and from the determined Conduct of the Squadron you did me the Honour to place under my Command, I am fully persuaded, had the Ambition of the Enemy permitted him to make a bolder Attack, the Result would have been still more honourable to His Majesty's Arms.

And I trust it cannot escape your Notice that, although the Disparity of Force was conspicuously encouraging to the Enemy, yet from the Moment that the Situation of the Euryalus and Sheerwater became doubtful, and for a long Time after, we never declined an Action, but on the contrary lay to receive them for more an Hour and an Half. I have now, Sir, to perform a Task most grateful to my Feelings, which is that of reporting to you, that in Proportion as Difficulties and Dangers presented themselves, the patient, active, and undaunted Conduct of the Squadron was such as to merit my warmest Approbation, and I feel most particularly sensible of the Exertions of Captains Otway and Fellowes, in preserving such compact Order, which evidently deterred the Enemy from making a further Attack.

The Honourable Captain Dundas of the Euryalus, and Captain Sibley in the Sheerwater, situated as they were, did every Thing I could either wish or expect; the latter I dispatched by Signal to apprise you of our Situation.

To the Officers and Crew of this Ship I shall ever feel much indebted for their steady and active Conduct, but particularly to Lieutenant Calloway, from whose Judgement, Zeal, and Activity, as well as that of Mr. Bower, the Master, I derived a most essential Aid.

Captains Otway and Fellowes have also reported to me, that the same Coolness and Activity manifested itself in all Ranks in their respective Ships; and that they feel equally sensible of the Assistance they received from their First Lieutenants Messrs. Lowry and Fitzmaurice.

I have the Honour to be, &c.

in Chief, &c. &c. &c.

Copy of a Letter from Captain Malcolm, of His Majesty's Ship the Rhin, addressed to the Honourable Rear-Admiral Stopford, and transmitted by Admiral Lord Gambier to John Wilson Croker, Esq.

SIR,

I HAVE the Honour to inform you, that at Four P. M., after a Chace of Two Hours and an Half, I captured off the Lizard, the French Schooner Privateer San Joseph, of St. Malo, of about One Hundred Tons, pierced for Sixteen Guns, but only mounting Fourteen, and Sixty-eight Men, commanded by Joseph Wittevronghel, a Dane; she sailed last Evening at Six o'Clock, and had taken nothing; she is only One Year old, Cop-

per-bottomed and fastened, a most beautiful Vessel, and sails remarkably well. His Majesty's Sloops Little Belt and Wolverine were in Company, the latter, I find, had been in Chace of her from Eleven A. M.

I have the Honour to be, &c.

J. W. Croker.

Navy-Office, June 25, 1810.

THE Principal Officers and Commissioners of His Majesty's Navy hereby give Notice, that a Plan of Education has been established, at the Royal Naval College at His Majesty's Dock-Yard at Portsmouth, for a Superior Class of Apprentices to Shipwrights.

That the Number of Students in the Superior Class of Shipwrights' Apprentices shall, in the first Instance, be limited to Twelve, but will gradually be increased to Twenty-five. The period of Apprenticeship shall be Seven Years, but for a Student who may have previously served in the Inferior Class of Apprentices in His Majesty's Yards for the Space of Two Years, it shall be only Six Years, and only Five Years for a Student who may have previously served in the said Class for the Space of Three Years.

An Instructor in the Theory of Naval Architecture will be added to the present Establishment of the Royal Naval College, to assist particularly in the Instruction of this Class of Apprentices.

The Candidates for Admission must produce Certificates from two respectable Physicians or Surgeons that they are of sound Health and Constitution, and likewise Proof from the Register of the Parish in which they were born, of their being at least Fifteen, and not more than Seventeen Years of Age, excepting Candidates from among the Shipwrights' Apprentices of the Yard, who may be admitted if they shall not have served more than Three Years of their Time: Candidates shall be examined on the first Wednesday in November in each Year, by the Professor of the Royal Naval College, assisted by the Instructor in the Theory of Naval Architecture, in the Presence of the Commissioner of the Yard, the Lieutenant Governor of the College, and Master Shipwright, who shall jointly report the Result of the Examination to the Lords Commissioners of the Admiralty, carefully inserting the Names of the Candidates in Succession according to their respective Merits.

The following shall be the Subjects of Examination, with which every successful Candidate must be perfectly acquainted.

- 1st. Reading English, and writing it with Facility from Dictation.
- 2d. The first Four Rules of Arithmetic, and the Rule of Three in whole Numbers, and also in Vulgar and Decimal Fractions.
- 3d. The first Three Books of Euclid's Elements by R. Simson, with the Exception of Propositions 42, 44, 45, Book I. and of Propositions 8, 9, 10, 11, 14, Book II. In this Part of the Examinations, besides giving the most precise Demonstrations, the Candidates will be expected to make the Constructions in a practical Manner with Compasses and a Ruler.
- 4th. The French Language, a Knowledge of which, although not absolutely required in the Candidates who may present themselves at the first Examination which is to be held, will nevertheless give a Preference to those, who are in all other Respects equally qualified; at all subsequent Examinations, however, the Candidates will be required to read and translate French with Facility.

After Admission into the Superior Class, the Apprentices shall attend at the Royal Naval College Three or Four Hours on the Mornings of every Day in the Week, except Sunday and the established Holidays, where they shall be instructed in such Parts of the following Subjects as shall appear to the Professor of the College to be best adapted to the Object of the Establishment, viz. the Formation of able and useful Ship Builders:

Geometry	Fluxions
Algebra	Theory of Naval
Plane Trigonometry	Architecture
Mechanics	Drawing
Hydrostatics	The French Language

On Mondays, Tuesdays, and Wednesdays, the Apprentices shall be employed at the College during the Hours above-mentioned, in the Study of Mathematics, under the Professor or the Instructor; on Thursday and Friday Mornings in Drawing; under the Drawing Master, the Art of Perspective being most particularly applied in drawing the different Parts of a Ship; and the Morning of Saturday shall be appropriated to the Study of such Books and

Exercises in the French Language, under the French Master, as may perfect them therein, and at the same Time advance their professional Knowledge. This Division of Time allotted for their Studies, is, however, to be subject to such Alterations as shall appear to the Professor best calculated for promoting the Object of the Institution.

In the remaining Part of the Day, when not attending at the College, they shall be employed under the Master Shipwright or Instructor of Naval Architecture, in the Mould Loft, in the various Kinds of manual Labour connected with Ship-building; in the Acquirement of a complete Knowledge of the different Parts of a Ship, and of the Method of constructing and fastening the same, as well as in discriminating her different Properties deducible from theoretical Calculations; also in the Management and Conversion of Timber, and generally, in such other Manner as the Master Shipwright may consider as best adapted to make them fully acquainted with all the Detail of the Duties of a practical Shipwright.

To ensure the Punishment of Offences committed by them during their Attendance at the College, a Book shall be kept by the Instructor, in which such Offences shall be entered; and at the End of each Week, or oftener if there be Occasion, this Book shall be sent to the Office of the Commissioner, who will order such Punishment to be inflicted, as may be conformable to the usual Treatment of Apprentices in the Dock-Yard.

And at the End of each Year, a Public Examination shall take place, in the Presence of the Officers mentioned in the 3d Article, and a general Statement of the Improvement of the respective Apprentices in the theoretical Part of their Profession, shall be transmitted by the Professor of the College, and of their Progress in the practical Part by the Master Shipwright, through the Commissioner of the Dock-Yard, to the Admiralty-Office; to the End that, if it shall appear that an Apprentice has particularly distinguished himself in any of the Departments of his Profession, the Lords Commissioners of the Admiralty may confer on him such Mark of their Approbation, as their Lordships may deem expedient.

The last Year of their Apprenticeship, or such Part thereof as the Lords Commissioners of the Admiralty may think proper, shall be served at Sea, in such of His Majesty's Ships as their Lordships shall direct, with a view of obtaining some practical Knowledge in the steering, sailing, trimming, and ballasting of a Ship, in making Remarks on the Motion and working of a Ship, in all her Parts, in bad Weather, and on a high Sea, the standing and straining of the Masts and Yards under such Circumstances, the placing of the fixed Blocks, with a view to the proper leading of Ropes, &c. and, generally, in obtaining such Information, as the Captain, Carpenter, and other Officers of the Ship may, by their Experience, communicate, and such as their own Observations may suggest.

During the Time that such an Apprentice shall be on board a Ship, he will be required to keep a Journal of his Remarks and Observations, arranged under distinct Heads, noting such Improvements in any Part of the Ship, or any Thing connected therewith, as may suggest themselves to him, from a

minute Attention to the Circumstances by which a Ship is affected at Sea; a Copy of which Journal is to be transmitted to the Admiralty.

A Cabin or Berth will be allotted to him in the Gun-Room, or in some other suitable Part of the Ship; he shall mess with some of the Officers, and be treated in all respects as a Gentleman.

Salaries to be allowed Apprentices of the Superior Class.

If the Apprentice shall not have served Two Years in the inferior Class.	If the Apprentice shall have served Two Years in that Class.	If the Apprentice shall have served Three Years in that Class.	Sum.
1st Year			60
2d Year	1st Year		70
3d Year	2d Year	1st Year	80

6th Year	5th Year	4th Year	110
7th Year	6th Year	5th Year	130

Upon their Return from Sea, until they can be appointed Officers in consequence of Vacancies having occurred, they shall be employed as Overseers of Ships building, in assisting the Master Shipwright in the different Yards, and their Assistants or Foremen; in the Mould Loft, under the Timber Master, or in any other Situation in which the Master Shipwright may have Occasion to employ them, with the Approbation of the Commissioner; during that Interval they shall have 150l. per Annum, and if such Vacancies should not happen for Three Years after their Return, they shall then have 180l. per Annum until they be provided for.

In order that the Services of young Men, whose Education has been obtained at a considerable Expence to Government, may not be lost on the Expiration of their Apprenticeship, they shall each of them, previously to their Entry in the Yard, be required to find two Sureties, to enter into Bond to the Amount of 500l. subjecting them to the Forfeiture of the said Sum if the Apprentices shall leave His Majesty's Service within Ten Years after they are out of their Time; and in the Event of an Apprentice being discharged for Misconduct, the Amount of the Bond, or so much of it as may indemnify Government for the Expence incurred in his Education, shall be forfeited.

The Object of this Institution is to improve the Qualifications of the Shipwrights in the Dock-Yards, and thereby to ensure a Succession of Artificers, from among whom Officers of the Description of Master Measurers, Foremen, &c. will be selected, and from those the Appointments of the superior Officers in His Majesty's Dock-Yards, and Sur-eyors of the Navy, will ultimately be made.

The Day of Examination is fixed for the First Wednesday in November next (7th November 1810). A certain Number of Apprentices now in the Dock-Yard are to be excused from manual Labour, to prepare themselves for the Examination; and this public Notice of the Qualifications expected from those who intend to become Candidates, and of the Day on which such Candidates will be examined, is given, in order that the Number to be entered in the Superior Class of Apprentices (which in the First Year is to be limited to Twelve) may be selected from those best qualified, whether belonging to the Dock Yard or not.

Such Persons of the Description before mentioned, who may be desirous of becoming Candidates for Admission to the Superior Class of Apprentices to belong to His Majesty's Dock-Yard at Portsmouth, are therefore hereby informed, that they will be required to send Notice of their Intention to the Navy Board, or the Commissioner of His Majesty's Dock Yard at Portsmouth, on the 24th of October 1810, and they must be prepared with every Document and Qualification mentioned in this Advertisement, and be at Portsmouth Dock Yard at Eight o'Clock on the Morning of the Day of Examination, viz. 7th November 1810, and wait for further Directions from the Commissioner for their Proceedings.
