For Hospital-Assistant *Thomas James* to be Assistant-Surgeon,
Read Hospital-Assistant *Thomas James Maharey* to be Assistant-Surgeon.

THE following Address has been presented to His Royal Highness the Prince Regent; which Address His Royal Highness was pleased to receive very graciously:

To His Royal Highness the Prince of Wales, REGENT of the United Kingdom of Great Britain and Ireland.

The Address and Congratulation of the Chancellor, Rector, Principal, Professors and Masters of His Majesty's Marischal College and University of Aberdeen.

WE, His Majesty's most dutiful and loyal subjects, the Chancellor, Rector, Principal, Professors and Masters of the Marischal College and University of Aberdeen, beg leave, with all humility and respect, to present to your Royal Highness our lively and sincere congratulations on the happy restoration of Peace between His Majesty's dominions and the enemy with whom he had successfully waged so long, so expensive, and so desolating a war. While we feel all the value of the blessings of Peace, we look back, with those sentiments which become the British character, on the splendid energies which our countrymen have displayed during the arduous contest; and we contemplate, with the delight of patriotism, that pre-eminent rank among the nations which this happy termination of it has assigned to Great Britain.—We bless that adorable Providence which, by a gracious and unexpected interposition, arrested the course of boundless ambition and tyranny, and opened the way to that safe and honourable Peace, which we trust we shall long enjoy. We pray that the same gracious and omnipotent Power may speedily restore universal peace, conciliate the two contending nations, which are descended from the same origin, and remove the only ground of regret, amidst our present exhilarating prospects, — our apprehensions of the revival of the Slave Trade, abolished by the British Legislature, as repugnant to justice, humanity and religion, as well as to the views of enlightened policy.

We beg leave to assure your Royal Highness, that we shall continue to instil into the minds of the youth committed to our care, the principles of sound morality and religion, which are the great foundations of the prosperity of States and Empires, and of that pure and rational liberty which our excellent Constitution of Government dictates and inspires.

That the Supreme Governor of the world may look down, with an eye of consolation and mercy, on our gracious Sovereign the King, and that he may direct and prosper the administration of your Royal Highness, is the fervent prayer, may it please your Royal Highness, of His Majesty's most dutiful and loyal subjects, the Chancellor, Rector,

Principal, Professors and Masters of His Majesty's Marischal College and University of Aberdeen.
Marquess of Huntly, Chancellor.

Admiralty-Office, October 1, 1814.

VICE-ADMIRAL Sir Alexander Cochrane has transmitted to *John Wilson Croker, Esq.* a letter from Rear-Admiral *Hotham*, inclosing one from Captain *Sir Thomas Hardy*, of His Majesty's ship *Ramillies*, dated off *Stonington*, the 12th August, giving an account of an attack made upon that place by the said ship, with the *Pactolus*, *Dispatch* brig, and *Terror* bomb.

The *Dispatch*, on the 9th August, anchored within pistol-shot of the battery, but the *Pactolus* not being able to approach the shore, near enough to support her, the brig was recalled, having had two men killed and twelve wounded.

On the 11th, after the *Terror* had thrown in some shells and carcasses, the *Ramillies* and *Pactolus* anchored as near as the shallowness of the water would allow, and fired several broadsides into the town, from which it suffered great damage. At the commencement of the fire the enemy withdrew the guns from the battery to the outside of the town, where they had assembled three thousand militia.

The town of *Stonington* had been conspicuous in preparing and harbouring torpedoes, and giving assistance to the enemy's attempts at the destruction of His Majesty's ships off *New London*.

Sir Alexander Cochrane has also transmitted a
