NOTICE TO MARINERS.

Edinburgh, October 12, 1816.

**T**HE Commissioners of the Northern Light-Houses hereby give notice, that for the improvement of the Navigation of the Irish Channel, and Frith of Clyde, a Light-house is erected upon Corsewall Point, from which a light will be exhibited on the evening of Friday the 15th of November ensuing, and will thereafter continue to be lighted every night, from the going away of day-light in the evening, till the return of day-light in the morning.

The following is the Specification of the Position of the Light-house, and Appearance of the Light, by Mr. Stevenson, Engineer to the Commissioners :

Corsewall Point Light-house is situate in the county of Wigton, and district of Galloway, in north latitude 55. 1 and west longitude 5. 5. It bears by compass, from Millour, on the western side of the channel leading into Loch Ryan, W. by S. distant about two miles; from Turnberry Point S. W. 21 miles; from the Craig of Ailsa S. S. W. 15 miles; from the Mull of Kintyre S. E. by S. 31 miles; from the Hulin, or Maiden Rocks, off the coast of Antrim, in Ireland, E. by S. 20 miles; from Copeland light-house, near the entrance of Belfast Loch, N. E.  $\frac{1}{2}$  E. 22 miles, and from Laggan Point, in Galloway, N. E. distant  $3\frac{1}{2}$  miles.

The light will be from oil, with a reflecting and revolving apparatus. To distinguish it from the other lights upon this coast, it will be known to Mariners as a single revolving light, with colour, and will therefore exhibit, from the same light-room, a light of the natural appearance, alternating with a light tinged with a red colour. These lights will respectively attain their greatest strength, or most luminous effect, at the end of every two minutes. But in the course of each periodic revolution of the reflector-frame, both lights will become alternately fainter and more obscure; and to a distant observer be totally eclipsed for a short period.

The light-room at Corsewall is glazed all round, but the light will be hid from the marine by the high land near Laggan Point towards the south, and by Turnberry Point towards the north; and being elevated 112 feet above the medium level of the sea, its most luminous side may be seen like a

star of the first magnitude, at the distance of five or six leagues, but the side tinged red, being more obscured by the colouring shades, will not be seen at so great a distance.

By order of the Commissioners of the Northern Light-houses. C. Cunningham, Secretary.

WOOD, Mayor.
