

The London Gazette.

Published by Authority.

From Monday October 2. to Thursday October 5. 1682.

Tangier, Aug. 37.

THis day arrived His Majesties Ship the *Woo-wich*, on Board of which was the *Morocco* Ambassador, who was received here with all the Solemnity of Firing great and small Shot, of drawing out the Garison, and with all other respects that could be shown him by our Governour.

Tangier, Sept. 5. Admiral *Herbert*, with the *Fames* Galley, the *Saphir*, and a Fire-Ship, Sailed this day for *Argiers*.

Naples, Sept. 8. The Marquis *de los Peles*, our Viceroy, has received an account from *Spain*, That the King has appointed the Marquis *de Liche*, at present his Ambassador at *Rome*, to succeed him in the Government of this Kingdom, that he will be here very speedily; upon which he is making the necessary preparations for his departure. The new Levies that are making here for the assistance of the State of *Milan*, go on but slowly, and our Viceroy has frequent Consultations with the Collateral-Council, in order to the raising of Moneys for that Service. Since the last account we gave you of the irruptions of the Mountain *Vesuvius*, we have heard very little more of it, and People are come to themselves again.

Florence, Sept. 19. A few days since at night there happened in the Country, 18 Miles distant from this City, which Borders upon the Mountains of *Bologna*, such a terrible Tempest of Wind, Rain, Hail, and Thunder, that for the space of eight Miles in length, and two in breadth, it swept away all the Branches from the greatest Trees, as Oaks, Chestnuts, and Olives, and much more from the smaller Fruit-Trees: It destroyed all the Autumn-Harvest that was upon the ground, and left not a Vine standing; it carried away all the Roofs and Coverings of the Country-mens Houses, and some were quite beaten down to the Ground, and several people killed in their Beds. A Church and Steeple quite ruined, and the Bells carried above a quarter of a Mile. Many Wild-beasts and Fowl, as Deers, Hairs, Foxes, Partridges, and small Birds, were found dead: and if it had happened in the day, as it did in the night, much Cattel and many Christians must have Perished, for the Hail stones were found to be from three to five Pounds in weight, the like not known in these Parts; and the loss is esteem'd the greater, because not to be recover'd in seven Years time.

Madrid, Sept. 19. The beginning of this Month arrived at *Cadix* the Fleet of Galeons, consisting in 47 Ships; their Lading is valued at thirty Millions of Crowns, but there are not above 23 Millions Registered, of which 22 are on the account of the Merchants and Private Persons. Three Galeons and a *Petache*, with three other Ships that

came out with this Fleet, are wanting. Two Galeons, and the *Petache*, were so leaky that they were forced to return to *Cartagena*, and the third, called the *Santa Teresa*, foundred at Sea the day after the Fleets departure from *Cartagena*, and of 600 Men, that were on Board, only five were saved; the other three Ships were Cast away within four Leagues of *Portobelo*, most of the men being saved; and the whole loss is valued at four Millions of Crowns. The King is much dissatisfied with the General of the Fleet, and Orders have been sent to *Cadix* to make him a Prisoner; from whence we have an account, That the Merchants have agreed with the Marquis *de Manera*, to give the King four hundred thousand Crowns for his Duties on the Moneys and Merchandizes which these Ships have brought for them.

Vienna, Sept. 24. We have of late had nothing but ill news from *Hungary*, where the Turks and the Rebels are so strong that the Imperial Troops are not as yet able to make head against them; but we hope that when the Forces that are now on their March from *Bohemia*, *Silesia*, and other the Emperor's Hereditary Countries, have joyned General *Caprara*, he will be in a posture to put a stop to the farther Progress of the Enemy, which we hear have demolished *Villecke*, and are marched towards *St. Bedoist*. The Count *de Strassolds*, who commanded a Body of the Emperor's Troops in *Hungary*, is expected here in few days; it is said the Emperor is much dissatisfied with his Conduct; but the particulars are not known. The Emperor's Order for the Exercising the Burghers of this City in their Arms, begins to be put in execution, and several new Fortifications are to be added to this place, and the old ones repaired, that so we may be provided against the worst that may happen. There are Letters from *Hungary* which advise, That Lieutenant-Colonel *Heisser*, being abroad with a Party of Imperialists, had met with 700 of the Rebels, and after a sharp Engagement, had defeated them, and taken some Prisoners.

Strasburg, Sept. 25. There passes at present nothing of moment in these parts; the Troops are in their Quarters, and are like to continue there. The Baron *de Monclar* and the Bishop of *Strasburg* are expected here from *Saverne*, where the latter has been very ill. The Marquis *de Courcivaux*, Son to the Marquis *de Louvoy*, is returned hither from the upper *Alsace*.

Francfort, Sept. 27. The Conferences here do not produce any thing worth the writing, nor can it be expected they should, till the differences that do still remain are quite removed. There have been some very warm Speeches Between the Deputy of *Austria* and the Deputy of *Mentz*, of which the latter does very much complain. From *Vienna* they write, That they feared the Turks and the Rebels would fall into the lower *Hungary*, and Attack some important place, before the Imperial Troops are

all joined together, and in a posture to oppose them; The General *Caprara* was retired from *Asfol* to *Trenchin* in the *Waag*, to expect there the coming up of the Imperial Troops that are on their March. There are some Letters, which, notwithstanding these Hostilities of the Turks, speak with some confidence of a prolongation of the Peace between the Emperor and the Grand-Signior, for 20 Years.

Cologne, Sept. 29. The Affairs of the City of *Liege* remain in the same posture, and it's believed there will not be any alteration in them till the Bishop of *Strasbourg* (who is at present at *Saverne* in *Alsace*, very much indisposed with the Gravel) arrives here; he and the *Sieur Tambonneau*, the French Envoy, intending, as is said, to employ their interposition for the accommodating the present differences, and for that purpose they will go to *Vifet*, or some other convenient place near *Liege*; which the *Sieur Fodoci*, the Imperial Minister, does not very well like, and that the Emperor's Mediation may not by this means be excluded this Negotiation, he is resolved to be present at the Conferences, which the said Bishop and French Minister shall have with the Magistrates of *Liege*, or their Deputies, in order to the said accommodation. We are told, that the Duke of *Fuliers*, who has 6000 Men actually in his Service, has resolved to send part of them to the assistance of the Emperor against the Turks and the Rebels.

Cologne, Octob. 2. We are expecting 1000 Men from the Circle of *Westphalia*, who are to remain in Garrison here; they will be composed of the Troops of *Brandenburg*, *Nieuburg*, and *Munster*: Those of *Nieuburg* and *Munster* are ready, but the Elector of *Brandenburg* has not yet given Orders for the march of his; wherefore our Magistrates have sent a Deputy to *Cleves*, upon whose return we shall know when we may expect the said Troops here.

Hamburg, Octob. 2. Great preparations are making at *Zell* for the solemnizing the Marriage between the Prince of *Hanover* and the Princess of *Zell*, proportionable to the joy which this new Alliance, between the two Brothers, the Dukes of *Zell* and *Hanover*, gives the Subjects of both Princes.

Brussels, Octob. 6. On Sunday the Marquis de *Graas* returned hither from *Flanders*, having made a great Reform in the Civil Government of that Province, and settled things very much to his satisfaction. His Excellency has likewise adjusted the matter in difference with the French for the Damages they pretend to have suffered by the opening of the Sluyces at *Newport*, and has paid the Money agreed upon by the Commissioners on both sides. His Excellency, after he has dispatched the Spanish Ordinary, intends to go for *Guelderland*, to look into the State of things there.

Brussels, Octob. 9. Monsieur *Dickfeldt* is coming hither from the *Hague*, in his way to *France*, whether the States-General are sending him upon the business of *Orange*. Our Letters from *Vienna*, of the 27th past, inform us, That the Turks, who were Commanded by the Vizier of *Buda*, were separated from Count *Teckley*, except 4000 *Fanzaries*, who continued with him; That the said Vizier, as was reported, was making Bridges over the *Danube* at *Graas*, and that it was believed he intended to fall into the lower *Hungary*, while Count *Teckley* finishes the Conquest of the upper, which the Grand

Signior has given to him; That the said Count *Teckley* had possessed himself of *Asfol*, *Neusol*, *Schemnitz*, and other of the Berg-Towns, where are the Mines of Gold and Silver; That Count *Strasoldo* was brought a Prisoner to *Vienna*, and that the Emperor was going to raise more Men.

Hague, Octob. 9. The States of *Holland* are Adjourned till the 15th of the next Month. The *Heer Citters*, Ambassador from this State in *England*, has leave to make a turn hither, to look after his private affairs. Two days since arrived here Prince *Casimir*, Stadtholder of *Friseland*, who has been lately in *France*, to Treat, as is said, about a Marriage with a French Lady.

Paris Octob. 10. Their Majesties will part, the 12th Instant, from *Chambor* for *Fountainbleau*, where it's believed they will not make any long stay. We have advice, That the *Sieur du Quesne* parted from before *Argiers* the 16th of the last Month, leaving a small Squadron to Cruise on that Coast. There are Letters from *Turin*, which say, That the Duke of *Savoy* is relapsed.

Powsmouth, Octob. 3. Just now came to Anchor at Spithead His Majesty's Ship the *Bristol*, Captain *Eleat* Commander, from the *Downs*.

London, Octob. 4. The Poll, in order to the Election of a Lord Mayor for the year ensuing, was closed yesterday in the Evening; and this Morning the Books having been cast up, and the disparity of Voices being but 25, my Lord Mayor and Court of Aldermen, at the request of both Parties, Ordered that the Books should be examined by the Lists of the several Companies, before his Lordship declares the Election.

Whitehall, Octob. 3. This Morning His Majesty and his Royal Highnesses parted from hence for *Newmarket*, to pass some short time there.

W Hereas in *Benskin's* Domestick Intelligence published on Monday the second instant. Numb. 142. it is said that the Lady *Henrietta Berkeley*, baib in a Letter to her Father given an Account of her departure, and that she is Married, &c. It is thought fit to give Notice, That this is a false Report, and in all probability spread on purpose to hinder the Discovery of her; and it is desired that no Report of this kind may have any Credit, it being intended, as soon as she is found, to give notice of it in the Gazette.

These are to give Notice, that since the 29th day of September last, there is and will be a Post continued, as usual, from *London* to *St. Albans*, and so to *Luton Barton*, *Amphill*, *Bedford*, and from *Bedford* to *Carleton*, *Wellingbrow*, *Kettering*, *Thrapton*, and *Oundle*; to which said Towns will be particular Care for their conveyance, as also of the Towns adjacent, and to back again to *London* three times a Week: and all persons concerned are desired to insert at the bottom of their Letters the Post-Town nearest to the place their Letters are directed, for their speedy Conveyance.

Advertisement.
