Genova, Nov. 25.

THis Week departed from hence the Hope Captain Ravens, for Evizza. The 22 Instant arrived from Civita-Vecchia, and Legborne, the ten French Gallies, bound for Marseilles. Yesterday arrived from Legborne the Katherine, Captain Grist. By the way of Legborne we have advice, That Admiral Herbert had Confirmed the Peace with the Government of Argiers, That he had done the like at Tunis, and was going on the same design for Tripoli.

Vienna, Nov. 26. Count Teckeleys's Deputies, after having had several Conferences with the Ministers here, and been admitted to an Audience of the Emperor, parted from hence the 24th Instant, with very advantageous Offers, as is said, from his Imperial Majesty to Count Teckeleys, in order to a Peace. The said Deputies were Presented with a Medal and Chain of Gold each of them, and seemed to leave this place very well satisfied; and it's hoped, That upon their Report to Count Teckeleys things will be disposed to an accommodation. We likewise persuade our selves that the Peace will be prolonged with the Turks, and it's said that Commissioners are for that purpose to meet at Raab; but this does not agree with our advices from Turkey, which all say that the Turks are bent upon a War. Our last Letters from Hungary gave us an account, That Count Teckeleys had been before Leventz, had summoned the place, and brought his Cannon against it, but hearing that the Emperor had Ratified the Cessation, he thereupon retired, and put his Troops into Winter-Quarters. Orders have been likewise sent to Count Caprara to separate the Imperial Army, which is to Winter in the Emperor's Hereditary Countries, except such Troops as it's thought necessary to leave in Hungary, to secure the Country against the Incursions of the Enemy.

Strasbourg, Nov. 27. Monsieur de Chamilly, our Governour is returned hither, and as we are informed brings with him Orders from Court for the hastening the new Fortifications that are making here with all possible diligence. The Dragoons that are to Winter in Alsace arrive daily. The Foot that are posted on the Preusch have Orders to go into their Winter-Quarters.

Hamburg, Dec. 1. From Zell they write, That the Marriage of the Prince of Hanover with the Princess of Zell would be solemnized very suddenly, but that the day was kept secret. From Stockholm we have no particular account of the Proceedings of the Dyet assembled there. The Letters only say, That what they have hitherto done is very much to that Kings satisfaction.

Brussels, Dec. 1. The Deputies from the States of Flanders are still here, soliciting his Excellency

to set aside the late Reform he made in the Civil Government of that Province, and to settle it upon the ancient Foot; and their Instances are likely to have the Success they desire. The Garrison of Namur has been reinforced with several Troops drawn out of Gelderland, his Excellency being particularly careful to provide it at place, as likewise Luxemburg, with all things necessary for its defence. From Lille they write, That the Marechal de Humieres had leave to be absent from his Government for three Months, which is lookt upon as an Argument that the most Christian King will prolong the Term. Not long since arrived here a Spanish Officer from Spain, with Letters of Recommendation to his Excellency, by whom he was therefore very well received; but upon the Arrival of the last Spanish Ordinary, he was seized, and committed to Prison, where he was three days after strangled by the Common Executioner, pursuant to a Sentence that had passed upon him in Spain, and was sent over hither, for Poisoning his Wife. His Name is kept secret for the same reason, that the Execution was thus private, viz. to avoid publick Scandal, he being a Person of Quality.

Brussels, Dec. 3. The Marquis de Grana has received advice from Paris, That the most Christian King, upon the Instances that have been made to him, has prolonged the Term which he had given the Crown of Spain, for the accepting the Arbitrage, till the 15th of January next. Six hundred Spaniards arrived lately at Ostend, and now we have an account of the arrival of 400 more, being sent from Spain to Recruit the Spanish Regiments in the Service of these Countreys. The Bars of Silver which his Excellency has received from Spain, are sent to Antwerp to be Coined. From Lille they write, That the Marechal d'Humieres was gone for Paris, and that he had given liberty to a great many Officers to be absent from their Commands for a Month. Our Letters from Vienna of the 26th past, speak as if they had great hopes that matters will be accommodated with Count Teckeleys, and the Peace with the Turks prolonged for four Years. The last Spanish Ordinary brought the Marquis de Grana Bills of Exchange for five hundred thousand Crowns. Don Michael de Suave, Quarter-Master General in these Provinces, is a Prisoner, and his Process is forming for causing his Coachman to be killed. From Liege they write, That their Deputies at Cologne had demanded more ample Instructions, which had been sent to them, and that in the mean time the Magistrates of Liège are endeavouring to re-establish the Payment of the Tax of the 40th Penny, which his Electoral Highness insists to have done before they enter upon any Treaty.

Hague, Dec. 4. The States of East-Friesland have written a Letter to the States-General of the United Provinces, giving them an account of the Elector of Brandenburg's having put a Garrison into

Graveling,

Greitzki, which they say they are satisfied his Electoral Highness has done with a good intention, viz. to facilitate an accommodation of the differences that have so long depended between their Princes and them, and therefore they hope this State will not have any jealousy of this proceeding: The States-General have put this Letter into the hands of their Deputies for Foreign Affairs. The said States, among other matters, have now before them that concerning the sending an Extraordinary Ambassador to the most Christian King, about the War of Orange. From Vienna, of the 22nd inst, they write, That Count Tereley's Deputies had declared, That their Majesty could not Treat of a Peace without the consent of the Porte; and that it was said the Emperor intended to go in the Spring to *Rainbonne*, to pass some time there. We are informed, That by the late Alliance concluded between the King of Denmark, the Elector of Brandenburg, and the Bishop of Munster, those Princes have obliged themselves to employ their utmost endeavours for the establishing at this time a firm Peace between the Empire and the Crown of France, and in order whereunto, to do what in them lies to dispose the Emperor and the Princes of the Empire to accept of the Proposals which were made many Months since by the French Ambassadors at *Frankfort*: And it's said that the Electors of *Mentz* and *Cologne*, and the Elector Palatine, will likewise come into this Alliance.

Paris, Dec. 4. From *Rome* we have advice, That the Abbot *Favoriti* did there the 13th past: He was lookt upon as a great Fomentor of the differences between this Crown and the Pope, with whom he was in great credit. The King has sent the Marquis de *Bebrune* for Poland, and it's said he has taken Bills of Exchange with him for very considerable Sums of Money. The King has prolonged the Term which he had given the Crown of Spain to declare it self in, till the 15th of January.
