12. *How do you feel about the way the company is doing?*

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

11. The following table shows the number of people who attended the concert in each age group.

95. *Environ. Biol. Fish.* 1997. 48: 171-180.

1. The first step is to identify the problem. This involves understanding the current situation and the goals that need to be achieved.

the same time, the number of people who are able to work has declined. The result is that the economy is producing less than it could.

The solution is to get more people working. That means creating jobs faster than they disappear. It also means making sure that the people who are working have the skills and training needed to do the job.
