From Monday January 15. to Thursday January 18. 1682.

Florence, Decemb. 29.

**F**rom *Turin* they write, That three Regiments more of *French* Horse are arrived in *Piedmont*; and that a Marriage is Treating between the Duke of *Savoy* and *Mademoiselle* Sister to the Queen of *Spain*. Our Letters from *Rome* tell us, That Count *Martenis*, the Emperors Envoy, did not yet appear in publick; and that the Pope was dissatisfied that the Emperor had laid a Tax of one per Cent. upon the Ecclesiasticks in the Hereditary Countries, without his leave. The River *Po* has lately overflowed and done much mischief to the Neighbouring Countries. The *French* we hear are sitting out several Men of War at *Toulon*, to be employed against the *Algerines*, who will not hearken to any Overtures of Peace; The *Tripolines* have followed their example, and have begun a War with the *French*.

*Copenhagen*, Jan. 5. Great endeavours are used to compose the Differences that are depending between the King of *Denmark* and the Duke of *Holsheim*, and the Queen Mother does particularly employ her good Offices therein, being much concerned that there should be such a mis-understanding between the King and his Brother-in-Law. The *Suedish* Envoy at this Court having taken notice to some of the Kings Ministers of the preparations that are making here as well by Land as Sea, we are told, he was answered, That the King of *Denmark* had no other design than to continue a perfect and sincere friendship with his Brother the King of *Sueden*; that he did Arm because he saw his Neighbours did so; and that he might with as much reason be jealous of the preparations that are made in *Sueden*; That after all, what has been done here was not worth speaking of, the King having only caused some Recruits, and a few Dragoons to be raised, but had not as yet given out any Commissions for Horse; That hereupon the *Suedish* Envoy had replied, That the King his Master would always value and cultivate the friendship of the King of *Denmark*, that his design was only to establish the Militia of his Kingdom upon the ancient foot, and that to repair the losses he had sustained at Sea, he was obliged to build several new Ships.

*Vienna*, January 7. The Letters we received yesterday from *Hungary* did not confirm the news we had of the death of Count *Tockeley*; but there are some which speak of his being ill at the Castle of *Mongatz*. It is very confidently reported, that a great many People die of the Plague at *Caschau* and other places in *Upper Hungary*, and for this reason, the *Turkish* Garrison that was designed for *Caschau*, has, as it's said, not yet entered the place, but is quartered hard by. The Imperial Troops that are quartered on the *Waag*, receive frequent

alarms from the *Turks*, which very much wearies them, and therefore several Regiments are on their march to relieve them. Several Troops are likewise ordered to march to the Berg-Towns, under the Command of Colonel *Diepenthal*, to secure the Miners against the Invasions of the *Turks*, who, there is reason to believe, may make some attempt upon them. The Inhabitants of this City have received strict Orders to furnish themselves with Provision for a year; and besides, the Magistrates are providing several publick Magazines, from whence such as are not able to make so large a provision at present, may be supplied. The Burghers are Exercised in their Arms, and nothing is omitted that may add to the strength and security of this place. We are told, that the Emperor has sent Orders to his Forces that are on the side of *Germany* to move this way, designing to employ them in *Hungary*; and that there is at present a better prospect of an accommodation of the Differences between the Empire and *France*, than there lately was. We are assured that the King of *Sueden* has offer'd to assist the Emperor with 10000 Men against the *Turks*, upon condition the Emperor do pay them; The Electors of *Bavaria* and *Saxony* have likewise promised to assist his Imperial Majesty in this War. The Count *de Caparra*, the Emperors Minister at the *Port*, has Orders to return home.

*Ratibonne*, Jan. 7. On the 23 of the last Month the electoral Colledge writ a Letter to the Emperor, wherein they express their trouble at the unsuccessfulness of the Conference at *Frankfort*; and declare, that their concern is so much the greater, for that five Electors situate on the *Rhine*, will, in case of a Rupture, be most exposed to danger, and cannot expect any thing else than to see their Countries and Subjects involved in the greatest Miseries and Calamities, and themselves at last separated from the Empire, which may the easier happen, for that the Empire is at present in a very ill condition, and more divided and disunited than ever, and besides, has, at its door, the Troubles of *Hungary*, and the impending War with the *Turks*; That in this dangerous Conjunction and Circumstance of Affairs, they have recourse to his Imperial Majesty, as to their Head, knowing the great care his Imperial Majesty has of the happiness and preservation of the Empire, and being fully persuaded that his Imperial Majesty cannot have any thoughts of precipitating the Empire into so evident a danger, but that his Imperial Majesty will himself judge it more expedient to yield something to the present Conjunction and Circumstance of Affairs, and to establish a firm Peace with *France*, than to oblige the Electors and other Princes that are most exposed to danger, to make use of all the means they can in such an extremity think of, for their own security, rather than to suffer themselves to be utterly ruined by a War; and therefore pray his Imperial Majesty

Majesty, that the time limited by *France* to the first of *February*, may not be spent fruitlessly, as at *Frankfort*, and things thereby made more difficult and dangerous, but that his Imperial Majesty will be pleased to give such Orders to his Ministers at *Ratibonne*, and every where else, that without any delay, a Treaty may be begun upon the Conditions offered by *France*, and the Peace of the Empire preserved.

*Cologne, Jan. 15.* Nothing has been, as yet, done here upon the Emperors Letter in favour of Burghermaster *Krebs*, and considering the temper the Companies or Trades of this City are at present in, he cannot expect much kindness from them, Levies are made here, as well as at *Aix* and other places for the Emperors Service.

*Hamburg, January 15.* The new Levies that are making by the Princes of *Lunenburg* are carried on with great diligence, From *Berlin* they write, That the Elector of *Brandenburg*, considering the posture his Neighbours are putting themselves into, had likewise resolved to raise four new Regiments of Horse, two of Foot, and one of Dragoons; That however his Electoral Highness did continue his endeavours for Peace, and that it was believed he would be very unwilling to make any steps that might engage him in a War. From *Denmark* they write, That the Queen Mother had proposed an Expedient for the reconciling the Differences between that King and the Duke of *Holstein*, which, it was hoped, would be accepted; and that the Levies in *Denmark* are not now made with that vigor they were at first.

*Brussels, Jan. 19* We have Letters from *Liege* of the 16 Instant, which inform us, That one of their Deputies was returned from *Cologne*, and that in the Report he made to the Magistrates of his and his Colleagues Negotiation at *Cologne*, he told them, That his Electoral Highness did manifest at present more inclination than ever to accommodate Matters with that City, provided they make on their side the necessary steps thereunto; And that at the same time it has been declared to the City of *Liege*, on the part of his Electoral Highness, That in case they do not make the Submissions that become them, within eight days, his Electoral Highness will make use of force to compel them. The Commonalty however continue very obstinate, Whereupon the States General have sent Deputies to persuade those People to Compliance, to prevent the Troubles which are otherwise to be feared. The matter concerning the letting the Customs to Farm is not yet settled, it meeting with great opposition, but his Excellency is resolved to proceed in it. From *Vienna* they write, That the Plague begins to be very violent in *Upper Hungary*, and that Count *Tockeley* was sick at the Castle of *Mongatz*.

*Hague, Jan. 19.* Two days since arrived here the Heer d' *Amerongen*; he has made Report to the States of his Negotiation at the Courts of *Brandenburg* and *Saxony*, with which they are very well satisfied. The Deputies of the States of *Holland* are gone to consult their Towns in some important Matters that are before them. We do not yet hear that the States have taken any final Resolutions concerning the Equipage of 24 Men of War. From *Hamburg* they tell us, That great endeavours were used to compose the Differences between the King

of *Denmark* and the Duke of *Holstein*, and that there was reason to hope they would be successful.

*Paris, Jan. 20.* On *Thursday* last the Abbot *Menard* was committed Prisoner to the *Bastille*, for having, as is said, held a Correspondence with some Persons at *Rome*, which displeased this Court. The Sieur *Fayet*, who was lately a Prisoner at *Vienna*, being arrived here, Count *Mansfeld's* Secretary is released out of the *Bastille*. It is said that the King has sent Orders to *Thoulon* to fit out several Men of War to be employed against the *Algerines*.

*Portsmouth, Jan. 14:* On *Friday* last a Fleet of about 25 *Dutch* Merchant Ships outward bound, came to an Anchor in *St. Helens* Road, and this day they sailed again with a fair Wind.

*London, Jan. 16.* This day the Lord Mayor, Aldermen, and Commons of this City in Common-Council Assembled, gave Thanks to Sir *John Moore* (who was Lord Mayor the last year) for his good Service to his Majesty and this City in the Administration of his Mayoralty.

#### Advertisements.

Mr. John Spilberg having with much Trouble and Charge drawn a Prospect of Albemarle-House, as likewise of the Banqueting-House at Whitehall, His Majesty has been pleased to grant him his Royal License for the sole Printing and Publishing of the same. The Prospect of Albemarle-House is accordingly published, price 3 s. and sold by the Author, living at the Crown and Anchor in Hungerford Market in the Strand, and by some Print-sellers.
