

# The London Gazette.

Published by Authority.

From **Sunday** February 19 to **Thursday** February 22. 1682.

*Copenhagen, Feb. 9.*

**T**HE *Sieur Lemfort*, a Gentleman of good Quality in this Country, and whose Father is at present in a very eminent Employment in *Norway*, was some days since condemned to die, for having sent a Challenge to the *Heer Heugh*, Ambassador from this *Crown* to the Most Christian King, as he passed through *Flanders* in his return home; his Judges declaring, that he had not only violated the Right of Nations, but likewise his Allegiance and Duty to his Prince, by offering so high an Indignity to him in the Person of his Ambassador; and because the said Gentleman is fled, he will be Executed in Effigie. The new Levies are continued here. The Differences between the King of *Denmark* and the Duke of *Holstein* are in the same state.

*Genoa, Feb. 10.* This Morning arrived here the *Rebecca of Plymouth James Bartles* Commander, from *O-Porto* and *Alicant*. Since our last sailed from hence the *Exchange* for the *Riviera*, to lade *Oyl*. In Part are the *Friendship*, Captain *Shasta*, bound for *Genoa*, the *Phoenix* for *London*, and the *Lyon* and the *Hope*.

*Vienna, Feb. 11.* We are informed, that there was a Debate on *Thursday* last in the Emperors Council concerning his Imperial Majesties Journey to *Ratisbonne*, and that his Imperial Majesty resolved, seeing all the Ecclesiastical, and two of the Secular Electors have excused their repairing thither in the present conjuncture of Affairs, and that on the other side his Presence will very much quicken the Preparations for the approaching Campaign, to remain here, at least till his Army takes the Field. The *Palatine*, and some of the great Men of *Hungary*, who are now here, have frequent Conferences with the Imperial Ministers concerning the Affairs of that Kingdom, and among others things, it has been proposed to them, that the Emperor in stead of obliging the Nobility and Gentry of *Hungary* to take the Field, and to serve in their Persons in the War against the *Turks*, will be content that they contribute a Sum of Money for the raising 10 or 12000 Men, which will be an Ease to them, and a Service to the Emperor. From *Hungary* we have Advice, that the *Plague* being broke out at *Caschau*, *Count Teckley* has removed the Assembly of the States from thence to *Eperies*; That he has issued new Summons to those that were absent to repair to the Diet, and in case they will not, has Commanded them to leave the Country, and declared, that he will otherwise proceed against them as Enemies; That there is a *Turkish* Chiasus at the Diet, that *Count Teckley* Treats him with all the Respect imaginable, and gives him the Precedence on all Publick Occasions, that he is present in all their great meetings, and that nothing is done

without his Concurrence and Approbation; That *Zatmar* is closely block'd up, and that *Count Teckley* will not suffer any Provisions to be carried thither, and that the Grand Vizier is expected at *Belgrade* about the latter end of this Month. We have not in a long while had any news from the *Count de Caprara*, the Imperial Minister at the *Port*, which is very much wonder'd at. The *Count de Lamberg* is returned hither from *Betin*, where he has resided some time on the part of the Emperor.

*Vienna, Feb. 12.* The Ratifications of the Treaty now lately concluded between the Emperor and the Elector of *Bavaria* have been exchanged, and the *Baron de Leydel* is thereupon gone home, having been presented before his departure with the Emperors Picture set with Diamonds. The *Count de Schutz*, in which are about 30 Markes Town and Villages, is quite abandoned by the Country People, who, it seems, were not able to live any longer in the constant fear they were in of the *Turks*; or else could not bear the Company of the Imperial Troops that were sent thither for their Protection. From *Poland* we have Advice, that the Diet was opened at *Warsaw*; That the *Count de Wallastat*, the Emperors Ambassador, was arrived there, and had had his usual Audience, and several Conferences with the Ministers at that Court; That the King of *Poland* seemed very well disposed to enter into the League proposed by him, but that most of the great Men were engaged in a contrary Interest, and did oppose it; so that he was like to advance but slowly in his Negotiation. From *Hungary* they write, that *Count Teckley* had ordered the Estates of such of the Nobility and Gentry, that would not acknowledge him to be confiscated; And at the same time his Secretary, who lately arrived here, assures the Imperial Ministers, that his Master does sincerely desire to accommodate matters with the Emperor, and that he does all he can to prolong the Peace between the Imperial Majesty and the *Turks*. The President of the Council of War will part hence in few days for *Raab*, and *General Rabata* is ordered to go and visit the fortified Places in *Evodia*. Some days since an Express was sent to the *Count de Caprara*, the Emperors Minister at the *Port*, and the *Baron de Sponara* is dispatched with new Instructions to *Count Teckley*, which shews us he believes there is a Negotiation still on foot, and we are willing to hope it will end in an Accommodation between the Emperor and the *Hungarians*, and a prolongation of the Peace with the *Turks*.

*Ratisbonne, Feb. 15.* Nothing of moment has passed in the Diet since our last. The Electoral College and that of the Princes cannot yet agree concerning their treating with the *Count de Caprara*; They both adhere to their former Conclusions. The Electoral College would Treat upon the *French Kings* Proposals, but that of the Princes would

would go on with the Negotiation, where it was broke off by the departure of the French Ambassadors from Frankfurt. The Letters from Vienna inform us, that the Baron de Waldsdorf, whom the Emperor had sent to the Electors on the Rhine, was returned, and had made Report to his Imperial Majesty of the success of his Commission, and that his Imperial Majesty had thereupon changed his Intention of coming hither.

**Frankfort, Feb. 20.** The new Alliance between the Emperor and the Elector of Bavaria is Ratified, and the general belief is, that it will in a short time be farther confirmed by his Electoral Highnesses Marriage with the Emperors Daughter. From Vienna they write, That the Emperors Ministers had lately had several Conferences with the Marquis de Seppville, the French Envoy, concerning the Affairs of Germany; and that the Baron de Saponara was sent back to Count Tercley, with an Answer to some Proposals he had made to the Emperor, for the Establishing a Peace, as well with the Turks as the Hungarians.

**Cologne, Feb. 23.** Things are here very quiet again, the Magistrates having given the Burgers satisfaction upon their demands. It is said that the Elector of Cologne has drawn his Troops together, to employ them against the City of Liege, and that Orders have been sent to Lieutenant General Lansberg, who Commands them, to march thither.

**Brussels, Feb. 26.** We told you in our last that the Commonalty of Liege had agreed to the Tax of the 6<sup>th</sup> Penny, imposed by their Prince, which proves a mistake, for the Letters we have since received from Liege give an Account, That the Magistrates had indeed consented thereto, but that the 33 Trades or Companies, who Assembled the 21<sup>st</sup> Instant, had absolutely refused to submit to the said imposition, and that the Magistrates durst not press them in it, fearing they might thereby occasion some great disturbance. What Resolutions the Elector of Cologne will take hereupon, we must expect to hear. Our last Letters from Cologne said, that his Electoral Highness had declared, that he will not make use of the Troops which the French do offer him for the reducing his Subjects of Liege to his Obedience. The French we hear are making great Provision at Philipville, where several Convoys have arrived very lately, which makes us believe they design some Action, so soon as the Season will permit; whereupon, the Marquis de Grana has ordered several Regiments to march for the reinforcing our Frontier Garrisons on that side. His Excellency has demanded a Sum of Money of the City of Antwerp, which, it's not doubted, but he will obtain.

**Brussels, Feb. 23.** The Members of the States of Holland, who have been to consult their Principals upon some important Affairs at present before them, are come back. It is said the said States will separate the latter end of this week till the 15<sup>th</sup> of the next Month, and that the Prince and Princess of Orange intend to go to Breda, and to stay there till the said States do meet again. The Sieur Heinsius, whom the States General are sending in Quality of their Envoy Extraordinary to the Most Christian King, has not yet begun his Journey, being with some indisposition. There is no Disscours at present concerning the fitting any Ships to Sea this Summer, save those which the Admirals do employ for Convoys.

**Paris, Feb. 24.** The necessary Orders are given out for the Kings Journey to Compeigne, which he will begin the fourth of the next month: The Court will return from thence to Versailles on the 26<sup>th</sup>, and it's said that this Journey will be followed by another of greater importance. The Doctors of the Sorbonne are to meet on Monday next, to conclude on an Answer to the Proposition they lately received from the Parliament of Paris, concerning the Authority of the Pope. The 27<sup>th</sup> Instant the King, the Queen, the Dauphin, &c. after having Dined under Tents in the Plain d'Achere near St. Germain en Laye, saw several English Horses run, which they were very much pleased; The King gives 1000 Pistoles to him that won.

**Deal, Feb. 18.** Yesterday arrived in the Downs from the River the Henrietta, Commanded by Sir John Berry, and the Happy Return; Besides these, there are in the Downs His Majesties Ship, the Dragon, the Foresight, the Ruby, the Woolwich, and the Mary-Rose, all out and about.

#### Advertisements.

**B**elow Dartford in Kent, there is a convenient piece of Ground to be let for whiting of Linnen Cloth, which may be conveyed by Water to the Ground; Enquire of Mr. Francis Brown at Dartford at the Iron Mills, and you may be farther Informed.
