From Thursday May 3. to Monday May 7. 1683.

Turin, April 21.

THe 19th Instant the two new Regiments of Dragoons, the one under the Command of the Count de *Verriue*, and the other, of the Count de *Berné*, each 300 Men, were drawn out in the Duke of *Savoy's* Presence, who was very well pleased with them; Yesterday they both Marched, the first to *Ast*, and the other to *Perceil*. All the Military Officers have received Orders to repair forthwith to their respective Commands.

Vienna, April 25. All things are preparing for the general Rendezvous of the Imperial Army near *Presbourg*, and the Duke of *Lorraine*, who is made General of all the Emperor's Forces, does cause a very strict Muster to be taken of the Regiments that are to compose the said Army. The Train of Artillery Marched from hence two days ago for *Hungary*; it consisted in 63 Pieces of Cannon, great and small, seven Mortar Pieces, and a very great number of Wagons, laden with Ammunition, &c. The Elector of *Bavaria* is expected here on Thursday next, and his Imperial Majesty has sent some of the Officers of his House to receive him at a place called *Melocke*. Their Imperial Majesties part from hence to-morrow for *Luxemburg*, where they will stay five or six days, and from thence go to *Presbourg*. The Elector of *Saxony* is expected at the general Rendezvous, which will be held the third or fourth of the next Month. They write from *Hungary*, That the main Body of the Ottoman Army marches very slowly, but that the *Bassa* of *Buda*, and the other *Bassa's*, are drawing together the Troops which are in *Hungary*, and have called upon Count *Teckelej* to make haste to join them, and that in the mean time they have caused all the Forage to be carried into the fortified places, that the Imperialists, in case they should be the first in the Field, may not have the Benefit thereof. The Emperor has conferred the Office of Great Master of his House upon Count *Albert* of *Zinzendorf*, and that of Great Marschal of the Court, upon Count *Francis Wallestein*. The new Fortifications that are making here will be very speedily finished.

Vienna April 29. Their Imperial Majesties parted from hence on Monday last for *Luxemburg*, where the Elector of *Bavaria* is expected this Evening. On Monday likewise arrived here the Secretary of the Count de *Saponara*, and with him Count *Teckelej's* Secretary; we know not yet the business they are sent hither about, but are willing to believe they bring some new Proposals in order to an Accommodation. This Day parted from hence the Duke of *Lorraine* for *Hungary*. The general Rendezvous is fixed for the fifth of the next Month. From *Hungary* we have Advice, That Count *Teckelej* has sent a Body of his Troops to Attack the Castle of *Dunawitz*;

That they had already made an Assault upon it, and that it was feared the place would fall into their hands, having no expectation of Relief.

Berlin, April 18. The 16th Instant the *Sieur Bierman*, Envoy Extraordinary from the King of *Denmark*, had his first Audience of the Elector of *Brandenburg* at *Potsdam*; he has had several Conferences with his Electoral Highness's Ministers, but we cannot say with what Success. Some days since arrived here an Express, being dispatched by the Baron de *Crakaw*, his Electoral Highness's Ambassador at *Warsaw*, with the news of the Conclusion of the League between the Emperor and the Crown, which it's believed will very much influence the Councils at this Court.

Ratisbonne, April 26. Things continue here in the same state, the Colleges of Electors and Princes remaining firm in their several Conclusions, which obstructs as well the intended Treaty with the Crown of *France* as the Point of the publick Security, though the latter is very much pressed by the Imperial Commissioner. The Elector of *Bavaria* was to begin his Journey as yesterday for *Vienna*, from whence we have an account, that the Duke of *Lorraine* has acquainted the Emperor, That having made enquiry concerning the Troops that are designed for the composing the main Army his Imperial Majesty will have in *Hungary* this Summer, he finds they will not amount to more than 30000 Men; and that his Highness had commanded the Commissaries of the Musters to take a strict Muster of all the Regiments before they appear at the general Rendezvous, when his Highness will take an exact view of them himself.

Brussels, May 7. The Marquis de *Grana*, our Governor, went from hence yesterday for *Flanders*, to visit the Fortifications of *Newport* and *Ostend*; before his departure he appointed the Duke de *Haure* the Kings Commissioner for the renewing the Magistrates in the several Towns of *Flanders*. His Excellency's Marriage with Mademoiselle d' *Areberg*, the Duke d' *Archeb's* Sister, is Concluded, and will be Consummated immediately after his Excellency's return from *Flanders*. They write from *Namur*, That the French have provided at *Sedan* Thirty large Boats, and laden them with all sorts of Ammunition. Things are at present managed at *Liege* with great moderation, and there is a fair Prospect of an accommodation of the differences between that City and their Prince, the chief Obstrucster of it, the *Burgermaster Loos*, being Banished from *Liege*. They write from *Luxemburg*, That the French Cavalry in those parts are marched to the several places of Rendezvous upon the *Saar* and the *Soane*, and that there is no appearance of any action on that side. All is likewise very quiet in the French Conquests, which may change his Excellency's Resolution of Encamping his Troops in *Flanders*.

Brussels, May 11. His Excellency returned hither
