From Thursday November 29th to Monday December 3rd 1683.

Naples, November 9.

THE Spanish Fleet under the command of the Marquis *d'Aquilar* continues still here, but we are told they will sail in few days, having orders from *Madrid* to return to *Cadix*. On Sunday last arrived here the Spanish Gallies, 26 in number, they saluted the Fleet and the Castle, and received the like from them. The *Banditi*, notwithstanding all the care our Viceroy takes to suppress them, are still very numerous and troublesome to the Country, from whence come frequent complaints of their Insolencies and Robberies. The Marquis *de Liebe* our Viceroy has given orders for the fortifying several places towards the Sea. He has resolved to augment the old Regiments of *Milan* and *Catagonia*, and for that purpose Levies are making.

Rome, November 11. On Sunday last arrived here an Extraordinary Courier from *Liniz*, with letters from the Emperor to the Pope, giving an account of the taking of *Graz* by the Imperial Army, under the command of the Duke of *Lorrain*: The Pope received the News with a great deal of Joy, and the next day gave orders for the remitting a considerable Sum of Money to his Nuncio at *Liniz*, to be employed in the Preparations that are to be made against the next Campaign. He hath likewise sent 30000 Crowns to the Viceroy of *Croatia*, who has undertaken to block up *Caniſta* this Winter.

Genova, November 14. From *Cadix* we have advice that three Men of War were arrived there from *Biscaye*, two whereof are to go out with the Fleet designed for *New Spain*. The Spanish Gallies are arrived at *Naples*, where they are to Winter. And the Marquis *d'Aquilar* has orders to return with the Armada to *Cadix*. The Count *de Melgar* Governor of *Milan*, continues to visit the Frontier places of that State.

Venice, November 21. We have Letters from *Constantinople*, which inform us, that an Ambassador was arrived there from the *Czars* of *Moscow*, that he had had an Audience of the *Calmac*, and had demanded the Restitution of *Czechow* and several other places in the same condition they were in when taken by the Turks, and that the answer the *Calmac* had given him, was, that he would acquaint the Grand Signior therewith. The Letters add, that the Grand Signior was returned from *Belgrade* to *Andrianople*, being resolved to employ the whole Force of his Empire, for the repairing the dishonour which his Arms have received in this last Campaign, and that for that purpose his orders have been sent to the Governors of the several Provinces, to send what men and Provisions they can to the Army, which is given out, that the

Grand Signior will command in Person. On Wednesday last arrived here a Saque from *Zara*, the Master whereof reports that the People of *Albania* have killed several Turkish Officers that were sent thither to raise men for the War in *Hungary*. The Moslaques continue their Incursions and Depredations upon the Turks.

Stockholme, November 14. The Moscovite Ambassadors parted from hence the last week, and embarked on a Merchant Ship which the Admiralty here had provided for the transporting them to *Reuel*. Here is arrived an Envoy from the King of *Poland*; He has had his Publick Audiences; and from hence he is to go to *Denmark* and several other Courts on the same Errand he comes hither upon, which is to demand assistance against the Turks. We have an account that one of this Kings Ships, carrying 64 Guns, having struck against a Rock as she was entering into the Harbor of *Careſſeroun*, immediately sunk, but the men were saved. The King is gone to *Coningfor*, where he intends to pass a fortnight or three weeks.

Vienna, November 21. Yesterday arrived here the Count *d'Aversberg* from *Hungary*, but made no stay in this place, continuing his journey with great diligence for *Liniz*. He reported that the Imperials have taken *Zeisbach*, *Zabrac*, and two other small places; and that it is not to be doubted but *Caschau* and *Esperies* will receive Imperial Garisons. We had a very strong report here the last week, that an accommodation was concluded with Count *Tecſley*, but it proves groundless. The freshest Letters we have from *Hungary* tell us, that Count *Tecſley* has demanded a very large Country for Winter-quarters for his Troops, though it is said they are not above 3 or 4000 men, but that it was not believed it would be granted him, and that there is great reason to suspect he holds a secret Correspondence with the Grand Visier at the same time that he seems desirous to make his Peace with the Emperor, his aim being to amuse both sides and gain time. The Turks make great Preparations against Spring, and we are told that the Grand Signior has commanded the third man to be raised throughout his Dominions.

Liniz, November 27. Many of the General Officers are come hither from the Army, and the Duke of *Lorrain* is every day expected, the Troops being, it is believed, by this time in their Winter-quarters: We are assured that Commissions will be given out very speedily for the making new Levies, and that the Monies lately remitted hither from *Rome*, will be employed for that Service, the Emperor resolving to have 80000 men in the field the next Spring, besides the Forces of the King of *Poland* and of the Empire. The Elector of *Saxony* will increase his Troops to 20000 men. The Elector of *Saxony* we are told, will likewise add several new Regiments to his Army, which has now on Foot, and the

the King of Poland has, it's said, promised the Emperor to bring the next year a much greater Army into the Field than he could do this. We seem here very confident that the Moscovites will be brought into the War against the Turks, with whom they have great Differences about several places which were some years since taken by the Turks, and ought, as the Moscovites pretend, to have been restored to them upon the last Peace. And we hope the Republick of Venice will likewise enter into the League against the Turks, to which great endeavors are used, as well by the Pope as the Emperor, the King of Poland and other Princes to dispose them. The Elector of Bavaria having made choice of Count Serini to be General of his Forces, the Emperor has at the same time made him one of the Lieutenant-Generals of his Army: His Imperial Majesty has likewise given Count Palsi a Commission of Lieutenant General. Count Raba is made General of the Horse, Prince Louis of Baden General of the Artillery, and Count Souches and Colonel Diependael, and Colonel Walis, have Commissions to be Scout-Masters-Generals.

Frankfort, November 29. The Elector of Bavaria is returned to Munich: It is reported with much confidence, that the Marriage between his Electoral Highness, and the Archduchess the Emperor's Daughter, is concluded; and that a Marriage is treating between the Prince of Poland, and the Princess of Neuburg the Emperor's Sister. The last Letters from Hungary told us, that the Polish Army was still in a Body some Miles beyond Cschaw, but that it was every day expected the Troops would separate and go into their Winter-quarters, which they are to have in a very good Country on the other side the River Tibisque. That Count Teckley has sent to the Duke of Lorrain, to desire him to grant his Troops several Counties for their Winter-quarters, and a Cessation of Arms that so Hostilities ceasing, he may employ his whole time to dispose the Hungarians that are in Arms, to submit themselves to the Emperor; but we cannot believe his demand will be granted.

Hamburg, November 30. They write from Dresden that an Envoy was arrived there from the King of Denmark, but that he had not yet seen the Elector of Saxony. That it was very confidently reported, that his Electoral Highness will increase his Forces against Spring, and that in order thereunto, Commissions will be given out before Christmas. We have Letters from Schonon which tell us, that the Swedish Fleet which consisted of 18 men of War, sailing from Calmar to Carelskrona, had met with very bad weather, and that a Ship of between 60 and 70 Guns, had been cast away, but all the men were saved. From Copenhagen we are told, that the King of Denmark raises men, not only in his own Territories, but likewise in Prussia, Courland, and other Countries.

Cologne, December 2. From Linz they write that the Count of Aversperg was arrived there from Hungary, being sent by the Duke of Lorrain to give the Emperor an account of several matters relating to the Affairs of that Kingdom, and to receive his Imperial Majesties directions thereupon; and that among other things, he had acquainted the Emperor that his Troops have taken Zeschin a very strong Castle between Fillegg and Erla. From Strasbourg we are told that the French are going

to rebuild the Walls of Buschweiler, Ne. weiler, Paffenboven, and some other small places in Alsace; and that the Country People have orders to provide themselves with Arms, and keep Guards. The Bishop of Strasbourg is not as yet returned from Liege, where he has composed the Differences that have so long disturbed the Peace of that City.

Amsterdam, December 6. Our last Letters from Hamburg speak of the loss of three Swedes Men of War in their passage from Calmar to Carelskrona; but give us a certain account that one, called the Bleeking, a Ship of 65 Guns, struck against a Rock in the entry of the Harbor of Carelskrona, and presently after sunk, the men having only time to save themselves. There are Letters from Teneriffe, of the 18th of October, which tell us, that Monsieur Sommerdike passed by four days before in his Voyage to Surinam.

Hague, December 7. The States of Holland are not yet come to a Resolution concerning the new Levy of 16000 men, and it's said that some Towns that before were for it, begin now to incline to the Sentiments of the City of Amsterdam in this matter. From Hamburg they write, that a Marriage is treating between the Electoral Prince of Brandenburg, and the Princess of Hanover, and that they doubt not but it will be very suddenly concluded.

Whereas there is a considerable Sum of Money already paid in, to Mr. Child at Temple-Bar, towards the Lottery of the Jewels of His late Highness Prince Rupert. Now for the satisfaction of all such as have any doubt of the fair and equal Proceeding, in the drawing thereof; These are to give Notice, that it is intended to be drawn in manner following. As soon as the Money is all come in, a day will be prefixed, and published for the drawing thereof, as has been formerly notified. In the Morning of which day His Majesty will be pleased, publicly in the Banqueting-House to see the Blanks told over, that they may not exceed their Number, and to read the Papers (which shall be exactly the same size with the Blanks) in which the Prizes are to be written; which being rolled up in his presence, His Majesty will mix amongst the Blanks, as may also any of the Adventurers there present, that shall desire it. This being done, a Child appointed by His Majesty or the Adventurers, shall, out of the Mass of Lots so mixed, take out the number that each Person adventures for, and put them into little Boxes; (which shall be provided on purpose) on the covers whereof each Adventurers Name shall be written, with the number of Lots He or she adventures for; the Boxes to be filled in Succession as the Moneys was paid in. As soon as all the Lots are thus distributed, they shall be opened as fast as may be, and the Prizes then and there delivered to those that win them; all which, it is hoped, will be done and finished in one day.

Advertisements.

Certain Miscellany Tracts, written by Sir Thomas Brown Knight, and Doctor of Physick late of Norwich: Printed for Charles Mearns, and are to be sold by Henry Bonwicke at the Red Lyon in St. Paul's Church-yard.
