

1900

The year 1900 was a significant one for the United States, marked by the Spanish-American War and the beginning of the Progressive Era. The war, which ended in 1898, resulted in the United States acquiring territories in the Pacific and Caribbean, including Puerto Rico, Guam, and the Philippines. This expansion of the nation's reach led to a period of imperialist debate and the establishment of the United States Department of War in 1900. Domestically, the Progressive Era began to take shape, with reformers advocating for social and political changes to address the problems of industrialization and urbanization. Key events of the year include the passage of the Tamm Amendment, which established the United States Department of War, and the signing of the Jones Law, which granted self-government to Puerto Rico. The year also saw the beginning of the Progressive Era, with reformers advocating for social and political changes to address the problems of industrialization and urbanization.
