From the Imperial Camp near Verowitz, Octob. 28.

Our General Count *Leslie* returned hither the 26th Instant from his late journey to *Vienna*, having met near *Copraniz* the Count *d' Erdendi* Viceroi of *Croatia*, returning home with the Militia of that Countrey, whom he endeavoured to persuade to continue in the Field some short time longer, till the Enemy were retired into their Winter quarters, but could not prevail with them; At his arrival here he found only two Regiments of Foot, which were left to guard the Camp, the Count of *Herbersteyn* Governor of *Carlsbad* being abroad with the rest of the Troops, who returned last night, having burnt the Towns of *Soppia* and *Scladin* which were not tenable, and the Suburbs of *Weitzchein*, and put a Garison of Germans and Croats into *Bresowitz*. This Morning Count *Leslie* marched with a detachment of Horse to visit the place where our Bridge was laid over the *Drave*, and where 200 Men are posted in two Forts for the security of the Provisions that are brought to our Camp by Water; but as for the repairing the said Bridge, which was broken by the overflowing of the River, it is judged impracticable at this time, and therefore our Gen-

ral has resolved quite to ruine it, and to cause the Materials to be carried to *Verowitz*, which place is fortifying with several new Works.

*Vienna*, Nov. 12. This day arrived here two Officers from *Gran*, who report, that they had been informed by the Countrey people, that the day after the raising the Siege of *Buda*, the *Serafquier* Bassa entred the Town, with all the Principal Officers of the Army, and with 100 Camels and 40 Wagons laden with Provisions, and was received there with several discharges of their Cannon, and Volleys of small Shot, accompanied with hideous Shouts and Cries, and other their usual expressions of Joy; That the *Serafquier* had immediately given Orders for the making a new Bridge over the *Danube* a little below *Pest*; and that all the Countrey-people of the neighborhood were summoned in to repair the Fortifications. From *Hungary* they write, that Count *Terkley* was gone to *Esperies* to put that place in a posture of Defence. The Count *de Thaur*, whom the Emperor is sending to the Elector of *Cologne*, will part in a day or two.

*Vienna*, November 16. The Winter Quarters are assigned for the Troops that were before *Buda*; Those of *Bavaria* and *Suabia* are, as we have already told you, to have theirs in *Upper-Hungary*; and the Imperialists are to Winter in the *Lower-Hungary*, in *Silesia* &c. The Army according to our last advices was encamped in the Neighborhood of *Gran*, from whence they intended to march towards *Arsol*, where the Troops would separate in order to their going into their said Quarters. From *Upper-Hungary* we have advice that General *Schultz* was likewise about putting his Troops into their Winter Quarters, the season not permitting him to enter upon any farther Action this Campaign. Our Letters from *Poland* give us an account that the King was returned to *Ruffenberg*, having ordered his Troops to go into their Winter Quarters. The Imperialists have not yet abandoned *Pest* or *Vaccia*; but its feared they will not be able to keep these places this Winter. There are Letters from *Newsol* which give an account, that the famous Rebel *Petenbasi* having got together 4 or 500 Hungarians, was marching with them to attack some of the Berg-Towns, but that a party of Hussars and Heydukes who happened to be abroad, meeting the Rebels, had entirely defeated them, most of them being killed, and *Petenbasi* himself taken prisoner.

*Cologne*, November 21. Yesterday arrived here from *Vienna* the *Sieur de Meyersheim* Envoy Extraordinary from the Emperor to the Electors and the Princes on the *Rhin*, and understanding that the Elector of *Cologne* is still at *Leige* he has continued his Journey thither; It's said that his Electoral Highness has offered to assist the Emperor with 6000 Men against the Turks, and that he will maintain them till towards Spring, when his Imperial Majesty will first have occasion for them. The Affairs of this City are not yet settled; The present Magistrates are sending Deputies to *Vienna* to represent to the Emperor the true grounds and reasons of their late Proceedings, and to frustrate the
