miles.

The Point of the S. W. Prong, in 6 fathoms foul ground, bears north about 2 miles. The Middle of Thull Shoal, E. S. E. 2 miles.

When approaching the harbour, if the floating light vessel is seen bearing upon any point from N. by E. round to the eastward as far as S. E. by S., a ship might steer directly for it, and when up with the light vessel should steer from her N. E. easterly, so as to pass about three quarters of a mile to the eastward of the other light vessel, which is moored about a quarter of a mile to the southward of the Sunken Rock. After rounding the Rock Light Vessel, you may steer more northerly, and if it be at night, should anchor about one mile to the N. E. by N. from it, where the water will be smooth. The south point of the Middle Ground Shoal bears N. N. E. distant two miles from the Rock Light Vessel.

Both light vessels are painted red, each carrying a ball on the light mast, and during day light they

hoist a red flag when a sail is in sight.

The Outer Floating Light burns a blue light at the end of each hour during the night, and displays a torch at the half hours.

The flood tide comes in from S. W. and ebb from the N. E. It is high water at twelve hours on full and change of the moon.

James C. Melvill, Secretary.

Note.—The Floating Light was tried during the last monsoon, and rode well, but in the event of her breaking adrift, the Fair Way Buoy is continued at its station.
