G. LAWRENSON, Major, 2d Brigade,
Horse Artillery, Commanding Artillery
1st Division Army of the Sutlej.

N. B. The quantity of ammunition captured with the artillery, and found in the camp of the enemy, is beyond accurate calculation, consisting of shot, shell, grape, and small arm ammunition of every description and for every calibre. The powder found in the limbers and waggons of the guns and in the magazines of the entrenched camp has been destroyed to prevent accidents. Six large hackery loads have also been appropriated to the destruction of forts in the neighbourhood. As many of the shot and shell as time would admit of being collected, have been brought into the Park—The shells, being useless, have been thrown into the river. The shot will be appropriated to the public service.
