NOTICE TO MARINERS.

Port of Akyab, Coast of Arracan.

Fort William, Marine Superintendent's Office, January 9, 1847.

THE trade of the port of Akyab having rapidly increased, the attention of Mariners is now recalled to the existence of the light on Faqeer's Point, at its entrance, and to the following sailing directions for entering the harbour, by Captain Paterson, published in 1844. In these the light above referred to, which was not at that time quite

completed, was described as being erected on Mosque Point, but this designation is now altered to Faqeer's Point, which is understood to be that by which it is best known, and which is that applied to it by the Commissioner of the Province.

By order of the Officiating Superintendent of Marine,

James Sutherland, Secretary.

Sailing Directions for the Port of Akyab, in the Arracan River.

Ships sailing for Akyab, during the south western monsoon, should steer for the south end of the Western Bolongo, in latitude $19^{\circ} 50' N.$ longitude $93^{\circ} 3' E.$, then standing along the coast to the northward and westward about five or six miles off shore, until the light is sighted on the Great Savage, at the entrance of the Arracan River, then steer so as to bring it to bear N. by East, or N. N. E., and if they intend to run in during the night, with either of these bearings they will cross the bar in the best water, in three fathoms low water spring tides.

After deepening across it, the course should be altered to N. by W., or even N. N. W., according to the state of the tide and sea at the time, to avoid the Western Rocks (above water) bearing from the light S. W. $\frac{1}{2}$ S, distant nearly half a mile; the flood tide sets in on these rocks.

When the light bears east in six to nine fathoms on the edge of the flat to the westward, the course must be altered to N. N. E. and N. E. by N., having brought the light to bear S. E. by S. $\frac{1}{2}$ S., the ship will be inside of Passage Rock, which is five to seven feet above water, and bears from the Savage Light N. W. $\frac{1}{2}$ N. distant a quarter of a mile, and should then steer N. E. Easterly, to avoid the reef projecting from Faqeer's Point, a mile in extent to the south; some of the rocks are above water at half ebb. There is a red buoy placed on the southern entrance, in about nine fathoms, which, with attention, may be seen in a clear night without the moon, and after bringing Faqeer's Point to bear N. W. by N. to N. W. the ship should anchor.

On Faqeer's Point a small light-house is nearly finished, the light of which will be a deep red, and will be seen about six miles, or three miles beyond the bar, as a leading mark to clear the Western Rocks, keeping it a little open to the westward of the Savage Light, when steering in or out, also to point out, when the ship is inside of the reef off Faqeer's Point. With this light bearing N. W. by N. to N. W. is good anchorage, having excellent holding ground, and perfectly sheltered from the sea.

A stranger should not attempt to run in at night, particularly in the rains, except at high or low water, as the ebb tide runs very rapidly in strong eddies off the Passage Rock over the dangerous flat to the westward, and the flood in strong eddies upon the rocks.

During the N. E. monsoon, ships bound to Akyab from the northward should endeavour to make the Table Land of the Western Bolongo in

latitude 20° 1' N., then steering due east they will avoid the Oyster Reef in latitude 20° 5' N. longitude 92° 40' E., which is distant from the Savage Light fifteen miles due west. This course is recommended, as although in favourable weather the Savage Light is seen outside the reef in sixteen to seventeen fathoms water, the depth suddenly decreases, and the probability of hazy or rainy weather would prevent the light being seen, and steering boldly in to sight it to the northward of latitude 20° 1', would endanger the safety of the vessel, by suddenly falling upon the Oyster Rock or Reef before sighting the light-house.

I would not advise strangers, on any occasion, to make use of the channel inside of the Oyster Rock or Reef.

James Paterson, Commander
H. C.'s ship Amherst.
