From Monday December 21. to Thursday December 24. 1685.

Genova, December 8.

**T**his Week arrived here the Benjamin with Poor Jack. The Dutch Convoy pretends to sail in a day or two for Legorno, Messins, and Smirna. The Prince of Monaco is come hither, intending to pass the Carnival in this City. The Senate have given Orders for the demolishing the Fortifications of Savona, except the Castle, in which will be kept a Garison. The 6th instant parted from hence one of this States Gallies for Marseilles, to bring from thence the Marquis de Marini late Envoy Extraordinary from this Republick at the Court of France.

Turin, Decemb. 8. The 6th instant the Dutchess of Savoy was brought to Bed of a young Princess; and the same day the Marquis de la Pisserre parted from hence, to carry the News of it to the Court of France. The Popes Nuncio and the French Ambassador have Complimented the Duke of Savoy on this occasion. The Cardinal Mellini is arrived here in his Return from Spain. This Court is gone into Mourning for the death of the Prince of Conti.

Venice, Decemb. 8. We have Letters from Corfu of the 19th. past, which confirm the Account we gave you in our last, of the arrival there of Captain General Morosini with the Gallies of this Republick, and that in his way thither he had taken and Demolished the Castle of Gumenizza. The Senate have named Signior Girolamo Cornaro to be Proveditor General of Dalmatia, in the place of Signior Pietro Valier, who has desired leave to return hither. By a Vessel arrived from Dalmatia, we have Advice, That the Bassa of Scutari, having drawn what Troops he could together, marched with them towards Cattaro, with a design to attack that place; but that the Proveditor Zew having notice of it, assembled a Body of between 3 and 4000 Men; upon which the Turks retired with all the haste they could. We have an account by a Vessel come from the Coast of Barbary, That two Aga's are arriv'd with a considerable sum of Money at Tunis, to require that Government to fit out a certain number of Ships, for the Service of the Grand Signior, besides those they have already sent to his assistance; and that they were to go from Tunis with the same Commission to Tripoli and Argiers. A Vessel is arrived here from the Levant, having met 15 Venetian Men of War off of Miso, which were looking for the Turkish Ships that were bound with the Provisions they had laded at Cyprus for Constantinople, and several places in the Aegrea;

Vicna, Decemb. 16. General Caraffa has taken his Head-quarters at Diosecke a great Town in Transylvania, not far from Great Waradin; He has under his Orders four German Regiments of Foot, six of Horse, and two of Dragoons, and 8000 Hungarian Hussars and Heydukes, which are likewise quartered within the Principality of Transylvania, of which the Envoy who is here from Prince Abafsi makes great Complaints, protesting his Master will be forced to draw his Troops together to oblige the Imperialists to dislodge, but he has, it's said, been answered, that the said Prince cannot expect any favour from hence, till he has quitted his Engagements with the Turks. General Caprara has block'd up Montgatz, and intends with the first hard Frost to attack that place with his Cannon and Bombs; In the mean time several Germans that were of that Garison have deserted, and coming into the Imperial Camp, have reported that they want in the said Castle Fuel and other Necessaries, and that the resolution of the Garison begins very much to abate. We have an account that a Party of the Garison of Giula having met some Imperial Troops who were conducting a Convoy of Provisions to Sarum, they fell upon them, and exceeding them very much in number, forced them to retire in great Disorder, which the Baron de Mercy having notice of, he sent immediately a detachment of Horse and Dragoons from Zolnocke to their assistance, upon whose approach the Turks fled, and were so closely pursued by our Horse, that they entred with them into the Town of Giula, and made themselves Masters of it, putting most of the Turks that were there to the Sword; of which we must expect a Confirmation. The Turkish Aga who is still at Comorra, has received new Instructions from the Visier of Buda, of which he has sent an account hither, but all the Advances the Turks do make towards a Peace will not be able to divert the Emperor from the Resolutions he has taken for a vigorous prosecution of the War. There is a report that Teckelej has been strangled at Belgrade.

Ratisbonne, Decemb. 11. The 24th past, the Imperial Commissioners at the Dyet delivered to the Electoral Colledge a Letter from the Emperor, wherein his Imperial Majesty declares to them, that the Count de Windisgratz is his Principal Commissioner, as well as the Bishop of Passau, and ought to be treated as such, and then Complains to them of the loss of so much time, as hath been spent in disputes about matters of Ceremony, to the prejudice of those important Affairs which ought to be treated of in the Dyet; but at the same time the said Commissioners declared, that the Count de Windisgratz being gone to Vienna, the States of the Empire to avoid all farther Contest
