*Board of Trade, Whitehall,
Marine Department, Sept. 8, 1854.*

THE Right Honourable the Lords of the Committee of Privy Council for Trade and Plantations have received, through the Secretary of State for Foreign Affairs, the translation of a Proclamation (a copy of which is subjoined) issued by the Swedish Royal Administration of Marine, relative to the exhibition of a Light on the new lighthouse at Winga Skeir, on the west coast of Sweden.

(Copy.)

(Translation).

THE Royal Administration of Marine announces, for the information and guidance of mariners, that since a lens apparatus of the 4th degree "à courtes éclipses," or, as it is also called, "à feu fixé, varié par des éclats," has been put up on the newly constructed lighthouse at Winga Skeir; the lighting of the same will commence on the evening of the 1st of next September, and be kept lighted at the same times as the other royal lighthouses. This new lighthouse is constructed in the direction of N.E. by W ½ E, 400 feet distant from the Old Winga Lighthouse. The new light burns at a height of 90 feet above the surface of the water, or at the same height as the present one. The two lights appear to ships open or separated from all points of the compass between S.S.W. south over and N.W. by W., and from N.N.W. north over to S.W. by W.

In connection with the same the light in the lighthouse of Buskor, situated within Winga, has been altered so as to present a red appearance on the sea side, and the points which look that way, but a white one where the light is seen towards the Archipelago.
