SHEFFIELD	<i>Mr. George Atkin</i>	Park Chapel, South-street.

Council Office,
1st December, 1859.

Wm. L. Bathurst.

Memorandum of Arrangements made in England for the Public Teaching of Vaccination, and for the granting of such Certificates of Proficiency in Vaccination as will qualify the bearers (if otherwise eligible) to be contracted with by Guardians and Overseers for the performance of Public Vaccination.

The Stations at present established for educational purposes are all in places where there are recognized medical schools. They are stations where the appointed public vaccinator uniformly attends in person, and where the annual number of vaccinations, as compared with the number of vaccinating-days, is sufficiently large to promise that the student, during his period of attendance, will, as a rule, always find many cases together for observation. They are stations from which vaccine lymph is furnished for the public service; the Vaccinators in charge of them having, for this purpose, been selected by the National Vaccine Board to be Members of the National Vaccine Establishment.

The Vaccinator of an educational vaccinating-station, during his attendance thereat, will exhibit and explain the course and characters of the vaccine vesicle, will practically teach the best method or methods of performing vaccination, and of taking lymph for present or future use, will inculcate all precautions which are necessary with regard to the health of subjects proposed for vaccination, and with regard to the selection and preservation of lymph, and will give all such other instruction as is requisite for the scientific and successful performance of vaccination and re-vaccination. During his course of instruction, he will make provision to ensure that always some cases come for inspection on the 10th, as well as on the 8th day; and, for the purpose of shewing these cases to his pupils, he will give, on the day appointed for their coming, a second weekly attendance at his station. He will further enable

and direct each pupil to see at least six cases of vaccination on at least two other days of their progress: viz., both before the 8th and after the 10th day. In the Teacher's presence, and under his direction, any Pupil, aged not less than 18 years, may take part in vaccinating; but not till he have attended the station on at least two vaccinating-days.

Any person, desirous of being admitted as pupil at an educational vaccinating-station, shall pay a fee not exceeding one guinea, and thereupon receive a ticket entitling him to attend the public vaccinations of the Teacher. When the Pupil has attended at the station, during the times of vaccinating and teaching, for at least six weeks, the Teacher, if satisfied of his proficiency, shall, on receiving back his ticket, but without further payment, give him a certificate in the appointed form.

At stations where the Teacher is also authorized to give certificates of proficiency in vaccination to persons whom he has not himself instructed therein, such persons will, on appointed occasions, be examined by the Teacher, on payment of a fee not exceeding one guinea, and if he find them competent, receive certificates accordingly. In case of failure to pass this examination, the Candidate may be admitted to a second examination on payment of a fee not exceeding half a guinea.

The Certificate of Proficiency will be understood to imply—and therefore the Teacher who signs it will have taken care to ascertain, that the person to whom it is given can skilfully vaccinate, both with liquid lymph (including such as is preserved in capillary tubes) and also from ivory points;—that he can properly charge ivory points or capillary tubes with lymph;—that he is aware of the relative advantages of recent and preserved lymph, and of all precautions which are requisite in using the latter;—that, from among vaccinated subjects presented for eighth-day inspection, he can select,
