*Board of Trade, Whitehall, November 24, 1866.*

THE Board of Trade have received from the Secretary of State for Foreign Affairs a copy of a Despatch from Her Majesty's Minister at Stockholm, relative to Lights at Oresund, the Island of Oland.

NOTICE.

The Marine Department desire hereby to inform Mariners that at Ispendd, on the north coast of Oland, N.E. from Calmar, and in latitude 56° 44' 7" North, and longitude East from Greenwich 16° 30' 8", a lighthouse has been constructed and lighted with an apparatus, the lens of which is of the 5 Order, placed on the west side of the building where the Lighthouse staff reside, and which is painted red, having over the said side a white ball. The Lighthouse exhibits a white light from about N.E. by N., North and West, over to about S.W. by W. by the compass.

The radiance of the light northwards being so determined that it extends outside Ekerum's reef, and southwards the navigable channel between Krongrundel and the South Bredgrundel. The Lighthouse is about 25 feet above the sea level, and its light ought to be visible from the deck of an ordinary vessel at a distance of about 9 minutes.

The Light is exhibited at the times and seasons during which the other Lighthouses of the Crown are illuminated.

The Lighthouses of Borgholms and Ispendd, on the west coast of Oland, and Grimskarrs, at Calmar Sound, are for the guidance of Mariners in Calmar Sound.

Stockholm, October 26, 1866.

NOTICE.

The Marine Department hereby inform Mariners that a Light Vessel has been moored at the northern extremity of Oresund, to mark the shoals which, under the name of Svinbadarne, Jungnäsbadan, &c., lie along the coast of Scania, outside the fishing grounds of Wik and Höganas.

The Light Vessel which is moored south, according to compass, of Kullen's Lighthouse, and E.N.E. of Nackehufonds highest Lighthouse, is situated in latitude 56° 10' 8" North, and longitude 12° 30' 8" East Greenwich.

This vessel, like the other Light Vessels belonging to the Crown, has a red painted hull, on either side of which is painted in white letters the word Svinbadan. She has two masts surmounted with red drums, and from sunset to sunrise side lanterns, one on each mast, with red lights will be burnt; these lanterns are at a height of 26 feet above the sea level, and are visible at a distance of 6 minutes.

The shoals along the coast, within the radiance of the vessel's lights, lie all to the east of the lines drawn from the Light Vessel to the north, over Kullen's Lighthouse, and south over Kronsberg's Lighthouse.

Mariners must pay attention to the fact that the Light Vessel's lamps give a decided red glare, which must not be confounded with the reflection from the chimneys of the Höganas's works.

A bell will be sounded on board the Light Vessel in hazy and foggy weather, three strokes in succession at short intervals.

Stockholm, October 12, 1866.
