TUESDAY, JANUARY 21, 1873.

AT the Court at *Osborne House, Isle of Wight*,  
the 16th day of *January*, 1873.

PRESENT:

The QUEEN's Most Excellent Majesty in Council.

WHEREAS there was this day read at the Board a Memorial from the Right Honourable the Lords Commissioners of the Admiralty, dated the 15th of January, 1873, in the words following, viz. :—

"Whereas, by your Majesty's Orders in Council dated the eighth day of June, one thousand eight hundred and thirty-eight, and twenty-fifth day of February, one thousand eight hundred and forty-one, a Royal Naval College was established at Portsmouth, for the purpose of affording additional means of scientific education to officers of your Majesty's fleet and Royal Marine Forces;

"And whereas we are humbly of opinion that it would be for the advantage of your Majesty's service to found a College in which the course of instruction hitherto carried out at the said Royal Naval College, as well as at the School of Naval Architecture at present established at South Kensington, will be continued; and further, with the object of securing, by bringing together in one establishment all the necessary means for affording to officers and others connected with your Majesty's navy, together with a limited number of officers of the mercantile marine and private students of naval architecture, the highest possible scientific instruction in all branches of study bearing upon their profession.

"We do therefore beg leave to recommend that your Majesty will be graciously pleased, by your Order in Council, to approve of the closing of the Royal Naval College at Portsmouth, and the founding of a College at Greenwich, to be styled 'The Royal Naval College,' accordingly; and the establishment of such regulations as regards the admission of students and courses of studies, as may appear to us, from time to time, to be desirable.

"We do further beg leave to recommend that your Majesty will be graciously pleased to sanction the following Establishment of Officers and others for the management of the College and instruction of the Students, viz.—

"A President, to be a Flag Officer in your Majesty's Navy;

"A Captain of your Majesty's Navy, to assist the President in maintaining discipline, and in other matters unconnected with study;

"A Director of Studies;

"A Professor of Mathematics;

"A Professor of Physical Science;

"A Professor of Chemistry;

"A Professor of Applied Mechanics;

"A Professor of Fortification;

and such Professors, Instructors, Lecturers, and others as we may consider necessary to assist in the courses of education to be pursued at the Royal Naval College and in the general maintenance of the Establishment.

"And we further propose that if your Majesty shall be graciously pleased to approve hereof, your Majesty will sanction our establishing such salaries and wages for the different persons to be employed for these purposes as may, from time to time, seem to us to be necessary, and may be sanctioned by the Lords Commissioners of your Majesty's Treasury, who have signified to us their approval of the foregoing proposals."

Her Majesty having taken the said Memorial into consideration, was pleased, by and with the advice of her Privy Council, to approve of what is therein proposed.

And the Right Honourable the Lords Commissioners of the Admiralty are to give the necessary directions herein accordingly.

*Edmund Harrison.*

MINUTE OF THE BOARD OF ADMIRALTY, DATED  
17TH JANUARY, 1873.

HER Majesty, by Her Order in Council, dated 16th January, 1873, having sanctioned the founding of a Royal Naval College at Greenwich, my Lords have determined to open the said College on the 1st of February next, at which date the instruction of the Gunnery Lieutenants and the Sub-Lieutenants will commence. The arrangements for the higher courses of study will not be complete till the beginning of the ensuing term on the 1st October, but special provisions have been made to prevent any interruption or disarrangement in the studies of any Class of Students who will hereafter be admitted to the College.

The College, subject to the subjoined Regula-

tions, will be open to Officers of the following ranks:—

1. Captains and Commanders.
2. Lieutenants.
3. Navigating Officers.
4. Naval Instructors.
5. Acting Lieutenants and Acting Sub-Lieutenants.
6. Officers, Royal Marine Artillery.  
Ditto, Royal Marine Light Infantry.
7. Officers of the Engineer Branch, viz.:—  
Chief Engineers.  
Engineers.  
1st Class Assistant Engineers.  
Acting 2nd Class Assistant Engineers.
8. A limited number of Dockyard Apprentices will be annually selected, by competitive examination, for admission to the College.

A course of instruction at the College will also be open to a limited number of—

9. Private students of Naval Architecture or Marine Engineering.
10. Officers of the Mercantile Marine.

It is not intended to provide at Greenwich for the education of the Naval Cadets.

My Lords intend that the Royal Naval College at Greenwich shall be so organised as to provide for the education of Naval Officers of all ranks above that of Midshipman, in all branches of theoretical and scientific study bearing upon their profession; but my Lords will continue the instruction given in the "Excellent" Gunnership Ship as heretofore, and arrangements for instruction in practical surveying will also be continued at Portsmouth.

My Lords desire, by the establishment of the College, to give to the executive Officers of the Navy generally, every possible advantage in respect of scientific education; but no arrangements will be made at all prejudicing the all-important practical training in the active duties of their profession.

The object of securing, in the interest of the Naval Service, the highest possible scientific instruction is, in the opinion of my Lords, most effectually to be attained by bringing together in one establishment all the necessary means for the higher education of Naval Officers and of others connected with the Navy.

The number of students at the College will render it possible, not only to carry out instruction by individual tuition, as hitherto, but to secure a staff of eminent professors, to arrange lectures and classes, and to provide chemical and physical laboratories, on a scale which has hitherto not been possible in any naval establishment.

Complete courses of study suitable for the different classes of students admitted will be organised, and will be carried out by professors, lecturers, and instructors. Officers and others admitted as *students* will have the advantage of these courses of study, whether they reside or not. But Officers and others who may not become students will, under certain regulations, have free access to separate courses of *lectures*, the benefit of which it is desired to extend as far as possible.

The following are the proposed courses of study.

#### *Subjects.*

1. Pure Mathematics, including Co-ordinate and Higher Pure Geometry, Differential Calculus, Finite Differences, and the Calculus of Variations.
2. Applied Mathematics, viz., Pneumatics, Mechanics, Optics, and the Theories of Sound, Light, Heat, Electricity, and Magnetism.

3. Applied Mechanics, including the Theory of Structures, the principles of Mechanism, and the Theory of Machines.

4. Nautical Astronomy, Surveying, Hydrography, with Maritime Geography, Meteorology, and Chart Drawing.

5. Experimental Sciences:—

a. Physics, viz., Sound, Heat, Light, Electricity, and Magnetism.

b. Chemistry.

c. Metallurgy.

6. Marine Engineering, in all its branches.

7. Naval Architecture, in all its branches.

8. Fortification, Military Drawing, and Naval Artillery.

9. International and Maritime Law; Law of Evidence and Naval Courts Martial.

10. Naval History and Tactics, including Naval Signals and Steam Evolutions.

11. Modern Languages.

12. Drawing.

13. Hygiene—Naval and Climatic.

A certain latitude in selecting such courses of study as they may prefer will be allowed to officers voluntarily attending the College. Officers and others required to attend by the Regulations will follow such courses of study as may from time to time be prescribed.

The general organization of the College will be as follows:—

A Flag Officer will be President; he will be assisted by a Captain in the Royal Navy in matters affecting discipline, and in the internal arrangements of the College unconnected with study.

A Director of Studies will, under the President, organize and superintend the whole system of instruction, and the various courses of study.

There will further be—

A Professor of Mathematics.

A Professor of Physical Science.

A Professor of Chemistry.

A Professor of Applied Mechanics.

A Professor of Fortification.

Such Instructors in Mathematics and the other branches specified as may be necessary to assist the Professors will be added to the Staff. Lecturers will be appointed to deliver courses of Lectures in Naval Architecture, Metallurgy, Civil and Hydraulic Engineering, Maritime Law, Naval History and Tactics, and Hygiene.

A Naval Officer will conduct instruction in Nautical Astronomy and Surveying, and there will be two instructors in Steam.

Such provision will be made for instruction in French and German and in Drawing, as the numbers of Students desirous of following courses in these branches may render necessary.

The following changes are introduced in the Regulations as regards the time of study in the case of Officers who are required to attend the College:—

- (a) The time allowed to Acting Sub-Lieutenants to qualify for their Examination in Navigation for Lieutenants will be extended from six weeks to six months.
- (b) Gunnership Lieutenants will be required to pass a term of nine months (from 1st October to 30th June) in the College at Greenwich before commencing their practical course in the "Excellent," instead of, as at present, a term of seven months after they have completed it.

Officers, on applying to qualify as Gunnership Lieutenants, if they have not already served one year at sea as Lieutenants, will be at once appointed to a sea-going ship, in order to complete the year's

sea-service required before they commence their studies.

- (c) My Lords propose that successful Candidates for Commissions in the Royal Marine Light Infantry should, before receiving their Commissions, have the advantage of a term of study in the College. They also propose to assign a longer term of study to Officers of the Royal Marine Artillery; but the final arrangements with regard to Marine Officers have not yet been concluded.

- (d) All acting Second Class Assistant Engineers will in future be sent to Greenwich, after leaving the Dockyards, for a period of study before their appointment to sea-going ships.

As regards Officers on half-pay, my Lords are particularly anxious that young Lieutenants should at once, on their promotion to that rank, avail themselves of the advantages of the College before their turn would come for appointment to a ship. The regulations specify allowances which are intended to remove any pecuniary difficulties in attending the College; and special consideration for appointments will be given to Lieutenants who thus occupy in so useful a manner the time necessarily spent on shore.

Arrangements have been made for the admission of Naval Engineer Officers to the College, which will prevent time spent at the College from entailing any pecuniary loss upon them.

The School of Naval Architecture at South Kensington will be absorbed in the Royal Naval College, Greenwich. The regulations for the admission of Engineer Students and of Dockyard Apprentices have been so framed as to provide as nearly as possible the same aggregate time for their instruction as that which is now afforded at South Kensington. Further regulations will be issued by their Lordships in regard to the admission of private students to the course of study at the College on similar conditions to those now existing at South Kensington.

My Lords have further determined to admit a limited number of Officers of the Mercantile Marine as students of the College, enjoying the full advantages of the whole course of instruction and tuition by the Educational Staff, while Officers of the Mercantile Marine generally will, on application, be allowed to attend courses of lectures.

The paramount object which my Lords have pursued in the organization of the College has been to provide the most efficient means for the higher education of Naval Officers adequate to the constantly increasing requirements of the Service; but my Lords also anticipate great advantages from the results likely to accrue from the connection which will be established through the College between men distinguished in the various departments of mathematical, physical, and chemical science, and those practical problems which so vitally interest the navigator, the naval architect, and the naval engineer.

My Lords expect the College to become, not only an educational establishment affording the means of the highest training in theoretical subjects to Naval Officers of all classes, but also a nucleus of mathematical and mechanical science specially devoted to those branches of scientific investigation which have most interest for the Navy.
