

23. Any person offending against or committing a breach of any of these bye-laws or regulations shall be liable to a penalty not exceeding forty shillings.

24. The expression "conductor" shall include any officer or servant in the employment of the Company and having charge of a carriage.

25. There shall be placed and kept placed in a conspicuous position inside of each carriage in use a printed copy of these bye-laws and regulations.

26. These bye-laws shall come into force on the 4th day of November, 1874

Sealed with the Common Seal of the said Company the 26th day of August, 1874.

Jos. Oldham, Secretary.

Patent Law Amendment Act, 1852.

Office of the Commissioners of Patents for Inventions.

NOTICE is hereby given, that—

1333. John Taylor, of Birmingham, in the county of Warwick, Decorator, has given notice at the Office of the Commissioners of his intention to proceed with his application for letters patent for the invention of "an improved mode or manner of treating risen flock patterned papers so as to give them the appearance of damasks."

1335. And Edward Thomas Hughes, of the firm of Hughes and Son, Patent Agents, 123, Chancery-lane, London, has given the like notice in respect of the invention of "improvements in the manufacture of paper-bags."—A communication to him from abroad by Félician Dangoise, of Brussels, in the Kingdom of Belgium.

As set forth in their respective petitions, both recorded in the said office on the 17th day of April, 1874.

1345. And James Gaskell and John Gaskell, of Burslem, in the county of Stafford, Potters, have given the like notice in respect of the invention of "a new or improved apparatus for the manufacture of castor bowls, knobs, and other articles of a similar description from plastic clay."

1347. And Charles Julius Ball, of New Bridge-street, Blackfriars, in the city of London, has given the like notice in respect of the invention of "improvements in the construction and arrangement of apparatus for drawing, withdrawing, and adjusting curtains, also applicable to other purposes."

1350. And Edward Thomas Hughes, of the firm of Hughes and Son, Patent Agents, 123, Chancery-lane, London, has given the like notice in respect of the invention of "a new system of locomotion."—A communication to him from abroad by Joseph Gombert, of Paris, France.

1355. And Wilhelm Radeke, of No. 28, Gracechurch-st., and Samuel Richard Smyth, of 35, Gresham-st., both in the city of London, have given the like notice in respect of the invention of "improvements in the manufacture of peat into fuel and charcoal, and in apparatus and appliances to be employed for such purposes, being partly also applicable to the carbonizing of wood."

As set forth in their respective petitions, all recorded in the said office on the 18th day of April, 1874.

1365. And John Bullough, of Accrington, in the county of Lancaster, Engineer, and Peter Ormerod Whitehead, of Belmont, Rawtenstall, in the same county, Engineer, have given the like notice in respect of the invention of "improvements in machinery employed for sizing and drying yarn."

1366. And Robert Hopwood Hutchinson, of Blackburn, in the county of Lancaster, Cotton Manufacturer, has given the like notice in respect of the invention of "improvements in the manufacture of cotton fabrics."

As set forth in their respective petitions, both recorded in the said office on the 20th day of April, 1874.

1367. And Augustus Haghe, Civil Engineer, of Stockwell, in the county of Surrey, has given the like notice in respect of the invention of "improvements in apparatus for working signals."

As set forth in his petition, recorded in the said office on the 21st day of April, 1874.

1387. And John Millward of Curzon-chambers, Paradise-street, Birmingham, in the county of Warwick, has given the like notice in respect of the invention of "improvements in steam boilers and their furnaces."—A communication to him from abroad by William H. Richardson, of Cincinnati, Hamilton County, State of Ohio, United States of America.

1393. And William Richards of 17, Burton-road, Brixton, in the county of Surrey, Engineer, has given the like notice in respect of the invention of "improvements in apparatus for indicating the receipt of moneys and for recording the same."

1399. And William Robert Lake, of the firm of Haseltine, Lake, & Co., Patent Agents, Southampton-buildings, London, has given the like notice in respect of the invention of "an improved apparatus for the treatment of rectal diseases."—A communication to him from abroad by William Duke Ludlow, of the city of and State of New York, United States of America.

1400. And Charles Francis Humbert, of Watford, Hertfordshire, Land Agent, and David Joy, of Middlesboro', Yorkshire, Engineer, have given the like notice in respect of the invention of "improvements in automatic repeating fire arms."

As set forth in their respective petitions, all recorded in the said office on the 22nd day of April, 1874.

1413. And John Frederick Spencer, of No. 28, Great George-street, Westminster, in the county of Middlesex, and William Inglis, of Bolton, in the county of Lancaster, have given the like notice in respect of the invention of "improvements in the means of starting steam-engines."

As set forth in their petition, recorded in the said office on the 23rd day of April, 1874.

1424. And Matthew Wilson, of Loughboro'-road, Brixton, in the county of Surrey, Gentleman, has given the like notice in respect of the invention of "an improved method of and apparatus for supplying oxygen in rooms and other closed places wherein the air is vitiated by the burning of gas or other lights."

1430. And William Thomson, of the city of Glasgow, in the county of Lanark, North Britain, Engineer, has given the like notice in respect of the invention of "a new or improved tube-expander."
