*Privy Council Office, June 28, 1877.*

INTIMATION having been received from Ontario, Canada, "that the country around that town is swarming with the Colorado Beetle," the following Memorandum of the Canadian Minister of Agriculture on the subject of this beetle, which was published in the newspapers of November last, is reprinted.

*Privy Council Office,  
June, 1877.*

MEMORANDUM of the Canadian Minister of Agriculture, upon reference of a Despatch of the Secretary of State for the Colonies, on the Subject of the Colorado Beetle.

The undersigned, in accordance with a request of the Secretary of State for the Colonies, having carefully examined the Despatches of Lord Carnarvon, respectively bearing date the 3rd of March, 1875, and the 28th of August, 1876, has the honour to report as follows:

The occasion of considering measures for the prevention of the introduction of the Colorado potato beetle into other countries from Canada has not yet presented itself, and the information from the German authorities, conveyed to Her Majesty's Minister at Berlin, on the capture of the insect on board ships and at Bremen, as well as other information given by newspapers relative to its introduction into Sweden, shows that the beetles had come from the United States, having been shipped at ports, the neighbourhoods of which were invaded by them.

The document furnished to Her Majesty's Minister at Berlin, a copy of which forms part of the Despatch of the 28th August last, contains the following remark:

"It may be considered an almost insoluble problem in regard to transatlantic ships traffic to prevent by more extensive supervisory measures the introduction of these beetles into Europe."

The difficulty thus foreseen by the German authorities cannot but be self-evident when the habits and modes of progression of the insect are examined; for not only does it move by flying, and by navigating, so to speak, smooth water, but also travels on common vehicles, railway carriages and platforms, on decks of vessels, &c., especially during the months of August and September.

In localities fully invaded, the beetles may be seen creeping on side walks, bridges, and wharves, crawling up buildings, occupying fences, lodging themselves in every crevice, penetrating houses and dwellings, ascending and occupying vehicles of all sorts, finding their way into boats and vessels, placing themselves on any and every

article, and being found alive after a long sojourn in situations where there would seem to exist no chance for them to find any subsistence.

Such a short but correct *exposé* of the habits of the beetle as connected with the possibility of its penetrating almost anywhere, and by almost any means of transport, renders indeed insoluble the problem of absolutely preventing its inroad into new fields of devastation, no matter how remote or by what obstacles they may be separated from the regions already invaded.

It may be remarked in this respect that potatoes and their covering are neither more nor less apt to harbour the insect than anything else.

But if the absolute repelling of the invader is unfortunately beyond reach, the extent of the disaster is fortunately in a very great measure under control, involving, of course, care and expense.

The remedies which necessity has taught on this side of the Atlantic are such as to require for their application the joint effort of the community at large, kept alive to its interests and duties by the authorities, and men of devotedness to the common welfare.

These remedies are,—

1st. Searching for and crushing every potato beetle wherever found.

2nd. Frequent visits to the potato fields, and searching for the eggs deposited on the under side of the leaves of the potato vine; and

3rd. Watching for the presence of the larvæ on the buds and on the leaves of the plant, in order to destroy them by means of *Paris Green*, the only substance yet discovered to be effectually operative on a large scale for the destruction of the insect in its larva state.

By these means, and by these means only, the invaded American States, and the western part of Canada, have been able to secure potato crops in a measure commensurate with the care and energy bestowed, and by similar means only can the invasion be retarded and lessened in its effects.

No measure has been taken in Canada, for reasons given, to prevent the falling or creeping of individual insects on board ships loading in Dominion seaports.

There is, however, almost a certainty that the environs of Montreal will be invaded next year, and with that prospect in view, general orders may be given to public officers and employés of the ports to look for and destroy any beetles which might be observed on the wharves, on sheds, on packages of goods to be embarked, or on board ships. A general appeal might also be made to all persons having to deal with the shipping for assistance in the execution of such preventive measures.

The undersigned respectfully recommends the adoption of such precautions, beyond which he does not see that there is anything within the power of the Canadian Government to do.

The whole respectfully submitted.

## SOLDIERS' BALANCES UNCLAIMED.

IN pursuance of the "Regimental Debts Act, 1863," notice is hereby given, that Her Majesty's Principal Secretary of State for the War Department has available, for distribution amongst the Next of Kin or others entitled, the sum of money set opposite to the name of each of the deceased soldiers named in the list which is published with this notice in the London Gazette, and the "Army List," and is also to be seen at the Quarters of the several Staff Officers for the Pension Service throughout the United Kingdom.

Applications from persons supposing themselves entitled as Next of Kin should be addressed by letter to "The Under-Secretary of State, War Office, London, S.W.," and marked outside "Soldier's Effects."

No application can be attended to which does not state the date and place of the soldier's birth, enlistment, and death, and the name of his regiment; his regimental number should also be stated if known.

Should these particulars furnished by the applicant not agree with the facts recorded on the War Office documents relating to the deceased soldier, the applicant will be so informed; but should they agree therewith, then within three calendar months the Secretary of State will furnish the applicant with the usual requirements needed for the proof of the alleged relationship.

The application must be authenticated by the signature of the applicant, and his name should be affixed in the presence of the clergyman, or one of the churchwardens of the parish, or a Justice of the Peace; the applicant's address, with the name of the post town, must also be clearly stated. No personal application can receive attention.

Further lists will from time to time be published, and therefore it will facilitate the applicant's inquiries to give the number and date of the notice in which the deceased soldier's name appeared.—EFFECTS, 1876-7.

By order of the said Principal Secretary,

J. C. W. VIVIAN.

NOTE.—A copy of this Notice is to be seen at the Quarters of the several Staff Officers for the Pension Service throughout the United Kingdom.
