October 19, 1882.

THE Board of Trade have received from the Secretary of State for Foreign Affairs a copy of a Decree of the Belgian Government, dated the 10th instant, enforcing the provisions adopted by the International Convention of Berne, with a view of checking the ravages of the phylloxera. The importation into and transit through Belgium of vines and dried cuttings, and also of slips and suckers of vines from phylloxerated districts is prohibited, but the latter articles may be imported from non-infected districts subject to special authorization from the Minister of the Interior. Market garden produce, cereals, fruit, and cut flowers, may be imported without special formalities, but all other plants, shrubs, and vegetables (not being vines or parts thereof), can only be admitted by the Custom-houses of Antwerp, Brussels, Ghent, Liege, and Ostend, or if coming by the land frontier, by any Custom-house situated on a railway.

The following conditions must also be observed:—

1. The articles must be so packed as to allow inspection.

2. They must be accompanied by:—

A. A declaration signed by the sender stating that the articles are the exclusive product of his establishment, that no portion of a vine is sent with them, whether or not any earth is contained in the package, and also designating the ultimate destination and name and address of the consignee.

B. A declaration by a competent authority based on the certificate of an official expert, stating:—

(a.) That the articles come from a plot of ground separated from the nearest vine-plant by a space of at least 20 mètres, or by such obstacle as the competent authority may judge sufficient to isolate the roots.

(b.) That the plot itself contains no vine-plant.

(c.) That no vine-plant or portion thereof has recently been deposited on such plot.

(d.) That if phylloxerated vines have been thereon, the roots have been torn up, the proper poisons have been applied, and that during three years investigations have been made which assure the complete destruction of the insect and the roots.
