*Contents of Notice.*

2. The notice must describe generally the line of the railway and its termini, and the lands proposed to be taken, stating the quantity and the purpose for which it is proposed to take them; it must state the proposed gauge and motive power of the railway; it must be subscribed with the name of the person, company, or council responsible for the publication of the notice (hereinafter referred to as "the promoters"); and must name a place where a plan of the proposed works and of the lands to be taken and a book of reference to the plan and a section of the proposed works may be seen at all reasonable hours, and where copies of the draft Order can be obtained on payment of not exceeding one shilling per copy.

*As to Limits of Deviation.*

6. Where it is the intention of the promoters to apply for powers to make any lateral deviation from the line of the proposed railway, the limits of such deviation shall be defined on the plan, and all lands included within such limits shall be marked thereon.

*Buildings, &c., on Enlarged Scale.*

7. Unless the whole of such plan shall be upon a scale of not less than a quarter of an inch to

*Distances to be Marked.*

8. The distances from one of the termini must be shown in miles and furlongs on the plan, and a memorandum of the radius of every curve not exceeding one mile in length, shall be noted on the plan in furlongs and chains.

*Tunnelling to be Marked.*

In every section the line of the railway marked thereon shall correspond with the upper surface of the rails.

*Vertical Measures to be Marked at Change of Gradient.*

15. Distances on the datum line shall be marked in miles and furlongs, to correspond with those on the plan; a vertical measure from the datum line to the line of the railway shall be marked in feet and inches, or decimal parts of a foot, at the commencement and termination of the railway, and at each change of the gradient or inclination thereof; and the proportion or rate of inclination between every two consecutive vertical measures shall also be marked.

If any alteration be intended in the water level of any canal, or in the level or rate of inclination of any public carriage road or railway, which will be crossed by the railway, then the same shall be stated on the section, and each alteration shall be numbered; and cross sections in reference to the numbers, on a horizontal scale of not less than one inch to every three hundred and thirty feet, and on a vertical scale of not less than one inch to every forty feet shall be added which shall show the present surface of such road, canal, or railway, and the intended surface thereof, when altered; and the greatest of the present and intended rates of inclination of the portion of such road or railway intended to be altered shall also be marked in figures thereon, and where any public carriage road is crossed on the level, a cross section of such road shall also be added; and all such cross sections shall extend for two hundred yards on each side of the centre line of the railway.

*Embankments and Cuttings.*

18. Wherever the extreme height of an embankment, or the extreme depth of any cutting, shall exceed five feet, the extreme height over or depth under the surface of the ground shall be marked in figures on the section; and if any bridge or viaduct of more than three arches shall intervene in any embankment, or if any tunnel shall intervene in any cutting, the extreme height or depth shall be marked in figures on each of the parts into which such embankment or cutting shall be divided by such bridge, viaduct, or tunnel.

*Tunnelling and Viaduct to be Marked.*

19. Where tunnelling, as a substitute for open cutting, or a viaduct as a substitute for solid embankment, is intended, the same shall be marked on the section, and no work shall be shown as tunnelling, in the making of which it will be necessary to cut through or remove the surface soil.
