Pier Works Light-Vessel—Position to be Altered.

WITH reference to Notice to Mariners No. 689 of 1899, and previous Notices referring to the establishment of the pier works light-vessel:—

Further notice is hereby given, that it having been found impracticable, owing to the heavy cross sea in S.W. gales, to maintain the pier works light-vessel in a position so near the end of the works, the light-vessel is about to be moved to a position $5\frac{1}{2}$ cables from the end of the Admiralty Pier, and in line with the extension works.

In consequence of this alteration in position the explosive fog signal will not in future be fired from the light-vessel, but from the end of the pier extension works.

A fog signal will be established on the end of the east pier, which will probably be a bell.

Further notice will be given when the alterations have been carried out.

This Notice affects the following Admiralty Charts:—English Channel, Nos. 1598 and 2675c; North Sea, No. 2182a; Dover and Calais to Orfordness and Scheveningen, No. 1406; Dungeness to the Thames, No. 1895; the Downs, No. 1828; Dover Bay, No. 1698. Agersö rear light is white fixed, elevated 47 feet above high water; and visible in clear weather from a distance of 12 miles.

No. 721.—NEW ZEALAND.

Storm Signals at Certain Lighthouses.

THE Government of New Zealand has given notice, that on and after the 18th October, 1899, the following weather forecast signals will be exhibited from the undermentioned lighthouses, viz.:—

NORTH ISLAND.

Cape Maria van Diemen, in lat. 34° 28' S., long. 172° 39' E.

Tiri Tiri, in lat. 36° 36' S., long. 174° 55' E.

SOUTH ISLAND.

Cape Campbell, in latitude 41° 43' S., longitude 174° 18' E.

Cape Foulwind, in latitude 41° 45' S., longitude 171° 29' E.

Fairwell Spit, in latitude 40° 33' S., longitude 173° 1' E.

The weather signals consist of two symbols, a black cone and a black drum. The cone is 3 feet high and 3 feet wide at the base, and the drum is 3 feet high and 3 feet wide at either end.

These symbols will be used either with or without a red pennant; they will be shown to all vessels passing within signal distance, and between the hours of 8 A.M. and 6 P.M., unless the wind at the station is too strong.

Mariners are cautioned that weather forecast signals for the day are not to be considered as covering a distance greater than a radius of 200 miles from the place at which they are hoisted, and those made with the red pennant under as covering only a radius of 50 miles from the place at which they are hoisted.

If the symbols are not displayed, mariners desirous of obtaining information as to probable changes of weather are requested to use the International Code Signal for that purpose.

The weather forecast for the day will be forwarded from Wellington as soon as possible after 10 A.M., except on the following days:—All

Sundays, Christmas Day, Boxing Day, New Year's Day, Good Friday, Easter Monday, and the Sovereign's and Prince of Wales's Birthdays. Such messages ought to reach their destination, at latest, about noon on the day they are issued.

The red pennant hoisted below any weather signal made between the hours of 8 A.M. and noon will always indicate that such signal belongs to the forecast of the previous day.

Weather signals without the red pennant will always indicate that the forecast belongs to the day upon which they are hoisted.

The red pennant, when hoisted alone, will indicate that the forecast for the day has not been received from Wellington.

Whenever the wind at any of the signal stations has changed in such manner that the forecast for the previous day will not apply, no symbol will be displayed until the forecast for the day has been received at the station.

EXPLANATION OF SIGNALS.

Moderate Weather.

This will be indicated by the International Code Signal.

CAUTIONARY SIGNALS.

Northerly Gales.—The cone hoisted point upwards will denote that strong winds or gales are probable from the northward—that is, from about north-east, changing by the north towards west.

N.B.—This change of wind is usually followed by strong winds or gales from the southward.

Westerly Gales.—The cone hoisted point downwards will denote that strong winds or gales are probable from the westward—that is, from about west, changing by the south-west towards south.

N.B.—After these gales have moderated the wind generally backs to the north-west or to the north; but should the southerly gale continue for a longer time than usual the wind may be expected to work round as far as south-east.

Easterly Gales.—The cone hoisted point upwards with the drum below will denote that strong winds or gales are probable from the eastward—that is, from about north, changing towards the east and south-east.

N.B.—This change of wind denotes a black north-easter and an approaching cyclone.

Southerly Gales.—The cone hoisted point downwards with the drum below will indicate that strong winds or gales are probable from east, changing by the south towards south-west.

Unusual Gales.—The drum only will indicate that strong winds or gales are probable from about south, changing by the east towards north.

Masters of vessels calling at Bluff will in future be able to obtain information at the telegraph office of the date on which the next barometric depression from the westward is expected.
