The latitude of the eastern point of the island was determined by meridian altitude, taken on shore, to be 1° 27' 30" S. Owing to cloudy weather the longitude of this point could not be obtained by astronomical observations, but was determined on the passage to Maty Island, by means of bearings taken when both islands were in sight, to be in about longitude 143° 6' 20" E.

Pare Joie Reef—Position of.

With reference to Notice to Mariners No. 717 of 1905:—

The Netherlands Government has given further notice, dated 23rd November, 1905, that a repeated and careful search has been made for the Pare Joie Reef in the position reported by the American steam ship "Mississippi" in May, 1905, without any trace of its existence being found.

It is consequently considered that the "Mississippi" must have been deceived by the appearance of the water, but as a reef does doubtless exist in this vicinity, on which the ship "Pare Joie" remained aground for 24 hours, it is probable that the position given by that vessel is the most reliable.

Pare Joie Reef has, therefore, been transferred on the Chart from the position given by the "Mississippi," to the situation originally assigned to it by the "Pare Joie" viz., to a position from which Gaspar Island Summit bears S. ½ E., distant 5½ miles. It has been marked P.D.
