“ We, the Ecclesiastical Commissioners for England, in pursuance of the Act of the 16th and 17th years of Her late Majesty Queen Victoria, Chapter 50, and of the Act of the 23rd and 24th years of Her said late Majesty, Chapter 124, have prepared, and now humbly lay before Your Majesty in Council, the following Scheme for effecting an exchange of the Patronage of the Benefice (being a Vicarage) of Kneesall, situate in the County of Nottingham and Diocese of Southwell, (which Benefice is hereinafter called the said Benefice of Kneesall) for the Patronage of the Benefice

At the Court at *Buckingham Palace*, the 22nd day of *December*, 1915.

PRESENT,

The KING's Most Excellent Majesty in Council.

WHEREAS the Ecclesiastical Commissioners for England have, in pursuance of the Act of the 33rd and 34th years of Her late Majesty Queen Victoria, Chapter 39, and of the Acts therein mentioned, that is to say, the Act of the 3rd and 4th years of Her said late Majesty, Chapter 113, the Act of the 4th and 5th years of Her said late Majesty, Chapter 39, and the Act of the 31st and 32nd years of Her said late Majesty, Chapter 114, duly prepared, and laid before His Majesty in Council, a Scheme, bearing date the 18th day of November, in the year 1915, in the words and figures following, that is to say:—

"We, the Ecclesiastical Commissioners for England, in pursuance of the Act of the 33rd and 34th years of Her late Majesty Queen Victoria, Chapter 39, and of the Acts therein mentioned, that is to say, the Act of the 3rd and 4th years of Her said late Majesty, Chapter 113, the Act of the 4th and 5th years of Her said late Majesty, Chapter 39, and the Act of the 31st and 32nd years of Her said late Majesty, Chapter 114, have prepared, and now humbly lay before Your Majesty in Council, the following Scheme for effecting a transfer of the ownership of the Advowson or perpetual right of Patronage of and presentation to the Church and Cure (hereinafter called 'the said Benefice') of Ditchling, in the County of Sussex, and in the Diocese of Chichester:

"Whereas the Advowson or perpetual right of Patronage of, and presentation to, the said Benefice of Ditchling is vested for an estate in fee simple, in possession, free from incumbrances, in the Reverend Frank Partridge, of the Diocesan Church House, Brighton, in the County of Sussex, Clerk in Holy Orders:

"And whereas the said Frank Partridge is desirous that the whole Advowson or perpetual right of Patronage of, and presentation to, the said Benefice of Ditchling, now vested in him as aforesaid, should be transferred to and be vested in the Reverend Reginald James Lea, of The Vicarage, Henfield, in the County of Sussex, Clerk in Holy Orders, and Gertrude Isabel Lea, his wife, to hold as joint tenants for the term of their joint lives, and after the decease of one of them should be transferred to, and be vested in, the survivor of them for

the term of his or her natural life, and after the death of such survivor should be transferred to and be vested in the Bishop for the time being of the Diocese of Chichester:

"And whereas the said Reginald James Lea, and Gertrude Isabel Lea, are consenting jointly to accept the transfer to them of the said Advowson or right of Patronage for the term of their joint lives, and severally to accept the transfer to the survivor of them for the term of his or her natural life, of the said Advowson or right of Patronage:

"And whereas the Right Reverend Charles John, now Bishop of Chichester, is willing to accept the transfer to him, and his Successors, Bishops of Chichester, of the said Advowson or right of Patronage for such estate in fee simple expectant, upon the death of the survivor of them, the said Reginald James Lea, and Gertrude Isabel Lea, as aforesaid, and in token of such his willingness, and also in token that the same transfer has that consent of the Bishop of the Diocese which by the Acts in the hereinbefore mentioned Act recited, or by some or one of them, is made necessary, he, the said Charles John, Bishop of Chichester, has executed this Scheme as hereinafter mentioned:

"And whereas the transfer of the Patronage of the said Benefice of Ditchling which is hereinbefore mentioned, and hereinafter recommended and proposed, will, in our opinion, tend to make better provision for the Cure of Souls in the Parish or District in, or in respect of which, the right of Patronage or Advowson, so recommended and proposed to be transferred as aforesaid, arises or exists, that is to say, in the Parish of Ditchling:

"Now, therefore, with the consent of the said Frank Partridge (in testimony whereof he has signed and sealed this Scheme) and with the consents of the said Reginald James Lea, and Gertrude Isabel Lea, (in testimony whereof they have severally signed and sealed this Scheme) and with the consent of the said Charles John, Bishop of Chichester, (in testimony whereof he has signed this Scheme, and sealed the same with his Episcopal Seal), we, the said Ecclesiastical Commissioners for England, humbly recommend and propose that upon and from the day of the date of the publication in the London Gazette of any Order of Your Majesty in Council ratifying this Scheme, and without any conveyance or assurance in the law other than such duly gazetted Order, the whole Advowson or perpetual right of Patronage of, and presentation to, the said Benefice of Ditchling, now vested in him, the said Frank Partridge, as aforesaid, shall be transferred to the said Reginald James Lea, and Gertrude Isabel Lea, to hold as joint tenants for the term of their joint lives, and, as from the decease of one of them, shall be transferred to the survivor of them for the term of his or her natural life, and, as from the decease of the survivor, shall be transferred to, and be vested in, the said Charles John, Bishop of Chichester, and his Successors in the same Bishopric for ever.

"And we further recommend and propose that nothing herein contained shall prevent us from recommending and proposing any further or other measures relating to the matters aforesaid, or any of them, in accordance with the provisions of the said Acts, or of any of them, or of any other Act of Parliament."

And whereas the said Scheme has been approved by His Majesty in Council:

Now, therefore, His Majesty, by and with the advice of His said Council, is pleased hereby to ratify the said Scheme, and to order and direct that the same and every part thereof shall be effectual in law immediately from and after the time when this Order shall have been duly published in the London Gazette pursuant to the said Acts.

And His Majesty, by and with the like advice, is pleased hereby to direct that this Order be forthwith registered by the Registrar of the said Diocese of Chichester.

5 PER CENT. EXCHEQUER BONDS, 1920.

TREASURY WARRANT providing for certain matters connected with the issue of 5 per cent. Exchequer Bonds, 1920, including the registration thereof.

Whereas by Section 1 (1) of the War Loan Act, 1915 (5 and 6 George V, c. 55), it is provided that any money required for the raising of any supply granted to His Majesty for the service of the year ending the thirty-first day of March, nineteen hundred and sixteen, and, in addition, of a sum not exceeding two hundred and fifty million pounds, or for the raising of any sums required for cancelling securities or Treasury Bills under the powers of this Act, may be raised in such manner as the Treasury think fit, and for that purpose they may create and issue any securities by means of which any public loan has been raised or may be raised, or such other securities bearing such rate of interest and subject to such conditions as to repayment, redemption, or otherwise, as they think fit.

And whereas in virtue of the powers conferred upon Them by the Section above quoted the Lords Commissioners of His Majesty's Treasury have authorised the issue at the Bank of England of Exchequer Bonds bearing interest at the rate of five per cent. per annum and redeemable at par on the 1st December, 1920 (hereinafter referred to as 5 per cent. Exchequer Bonds, 1920) on the terms set out in the prospectus issued by the Bank of England under date the 16th December, 1915, of which a copy was published in the London Gazette of the 17th instant.

And whereas it is desirable to provide for certain matters connected with this issue including provision, by Warrant of Their Lordships in the manner specified by Section 27 of the Exchequer Bills and Bonds Act, 1866 (29 Vic., c. 55), for the registration in the books of the Bank of England of 5 per cent. Exchequer Bonds, 1920, in accordance with the terms of the prospectus.

Now therefore, We, being Two of the Lords Commissioners of His Majesty's Treasury, in virtue of the powers conferred upon us by the said Section 1 (1) of the War Loan Act, 1915, and of every other power enabling us in that behalf hereby give the following directions:—

The expression "Registered Bonds" means Bonds of the same issue registered in accordance with the provisions of this Warrant.

(2) The Governor and Company of the Bank of England (hereinafter referred to as the Bank) are hereby authorised at any time without further Warrant of this Board to issue Coupon Bonds of lower denominations in exchange for a Coupon Bond of a higher denomination to an amount not exceeding the nominal value of the latter, on payment of a fee of one shilling per Bond surrendered for exchange, and all Bonds so taken by the Bank in exchange for Bonds of lower denominations shall be cancelled forthwith.

(3) The Bank shall cause a separate Register to be kept in the office of the Chief Accountant of the Bank for the purpose of registering holdings of Coupon Bonds.

(4) Holdings so registered shall be known as Registered 5 per cent. Exchequer Bonds, 1920, and shall be transferable in the same manner as any Stock transferable under the National Debt Act, 1870, and any Acts amending that Act, and shall be subject to the provisions of that Act and any Act amending that Act provided that Registered Bonds shall be transferable only in sums of £100 or a multiple of £100.

(5) On the demand of any holder of Coupon Bonds in the prescribed form and on payment of a fee of one shilling per Bond, the Bank shall register the Bond or Bonds in respect of which the demand is made either as transferable in like manner as inscribed stock or as transferable by deed.

(6) All Coupon Bonds which are presented for registration at the Bank shall on registration be cancelled forthwith.

(7) For the purpose of reconverting Registered Bonds into Coupon Bonds the Bank are hereby authorised at any time without further Warrant from this Board to issue fresh Coupon Bonds to an amount not exceeding the total value of any Registered Bonds so converted, and all Registered Bonds so converted shall forthwith be removed from the Register.

LONDON COUNTY COUNCIL (GENERAL POWERS) ACT, 1909, SECTION 23.

The following regulations with respect to the construction of buildings wholly or partly of reinforced concrete and with respect to the use and composition of reinforced concrete in such construction, which were made by the London County Council on 6th July, 1915, and confirmed on 13th July, 1915, have been allowed by the Local Government Board, and the Board has directed that they shall come into operation on 1st January, 1916.

JAMES BIRD,

Clerk of the London County Council.

County Hall,
Spring Gardens,
21st December, 1915.

Sub-headings and italic cross references do not form part of the regulations.]

REGULATIONS with respect to the construction of buildings wholly or partly of reinforced concrete and with respect to the use and composition of reinforced concrete in such construction.

Whereas under the provisions of section 23 of the London County Council (General Powers) Act, 1909, the London County Council (therein and hereinafter referred to as "the Council") have power to make regulations with respect to the construction of buildings wholly or partly of reinforced concrete and with respect to the use and composition of reinforced concrete in such construction.

Now therefore in pursuance of the powers conferred upon the Council by the said section the Council do hereby make the following regulations—

PART I.

GENERAL.

1.—The term "reinforced concrete" as occurring in these regulations shall mean concrete which is reinforced by metal so combined therewith that the metal will

(a) be sufficient to take up all the tensile stresses;

(b) assist in the resistance to shear;

(c) assist in the resistance to compression where necessary.

2.—These regulations shall apply only to the construction of buildings of reinforced concrete in which the loads and stresses are transmitted through each storey to the foundations by a skeleton framework of reinforced concrete or partly by a skeleton framework of reinforced concrete and partly by a party wall or party walls.

3.—The skeleton framework of reinforced concrete of a building together with the party

wall or party walls (if any) upon which such framework bears shall be capable of safely and independently sustaining the whole dead load and the superimposed load bearing upon such framework and party wall or party walls, calculated in accordance with the data hereinafter contained.

4.—All floors, stairs, landings, and other portions of a building carried by a reinforced concrete framework shall be constructed throughout of incombustible materials, and be carried upon supports of incombustible materials; nevertheless, all internal stairs and landings may be constructed of fire-resisting materials, and nothing in this regulation shall prevent the use of wood framing, boarding and battens in the construction of roofs.

5.—No part of the reinforcing metal in a building shall be used for conducting electrical currents.

6.—In the case of the erection of a new building of reinforced concrete or the making of any addition or alteration or the carrying out of other work under the provisions of these regulations, the like notice shall be served upon the district surveyor as is required to be served by Part XIII. of the London Building Act, 1894, and such notice shall be accompanied (a) in the case of a new building by plans and sections of sufficient detail to show the construction thereof, together with a copy of the calculations of the loads and stresses to be provided for and particulars of the materials to be used; and should such plans, sections, calculations or particulars as originally furnished be not in sufficient detail, the person depositing the same shall furnish the district surveyor with such further plans, sections, calculations or particulars as may be reasonably necessary for the aforesaid purpose, and (b) in the case of an alteration or addition or other work as aforesaid by such plans, sections, calculations, and particulars as may be reasonably necessary.

PART II.

DATA TO BE USED FOR THE PURPOSES OF THESE REGULATIONS.

Floor and roof loads.

7.—The dead load of a building shall consist of the actual weight of walls, floors, stairs, landings, roofs and all other permanent construction comprised in such building.

8.—The superimposed load in respect of a building shall consist of all loads other than the dead load.

9.—In calculating the loads on foundations, pillars, piers, walls, framework, beams and other constructions carrying loads in buildings, the superimposed load shall be estimated as equivalent to the dead load set forth in the regulations following, and numbered *ten to twenty-four*, both inclusive.

10.—For a floor the estimate shall be made in accordance with the table immediately following:—

For a floor intended to be used for the purpose of	Equivalent dead load in pounds per square foot.
Domestic buildings not hereinafter specified ... } Other similar purposes ... }	70
Asylum wards ... } Common lodging-house bedrooms ... } Hospital wards ... } Hotel bedrooms ... } Workhouse wards ... } Other similar purposes ... }	84
Counting houses ... } Offices ... } Other similar purposes ... }	100
Art galleries ... } Chapels ... } Churches ... } Classrooms in school buildings, not being dwelling } houses so used ... } Lecture rooms ... } Meeting rooms ... } Music halls ... } Public assembly ... } Public concert rooms ... } Public library reading rooms ... } Retail shops ... } Theatres ... } Workshops ... } Other similar purposes ... }	112
Ball rooms ... } Drill rooms ... } Other similar purposes ... } Similar floors subject to vibration ... }	150
Book stores at libraries ... } Museums ... } For every floor in a building of the warehouse class } except such floors as are intended to be used for } any of the purposes aforesaid—not less than ... }	224

11.—For stairs and landings the superimposed load shall be estimated as equivalent to a distributed dead load of at least 120 pounds per square foot, but each step shall be capable of safely supporting a concentrated load at any point of not less than 300 pounds.

12.—For a roof the plane of which inclines upwards at a greater angle than twenty degrees with the horizontal, the superimposed load, which shall for this purpose be deemed to include wind pressure and weight of snow and ice, shall be estimated at twenty-eight pounds per square foot of sloping surface, normal to such sloping surface, on either side of such roof.

13.—For all other roofs the superimposed load shall be estimated at fifty-six pounds per square foot measured on a horizontal plane.

14.—If the superimposed load on any floor, landing, stairs or roof is to exceed that hereinbefore specified for such floor, landing, stairs or roof, such greater load shall be provided for with an equivalent margin of safety.

15.—In the case of any floor or roof intended to be used for a purpose for which a superimposed load is not specified in these regulations,

the superimposed load to be carried on such floor or roof shall be provided for with an equivalent margin of safety.

16.—In cases where a rolling load actuated by mechanical power is to be provided for such rolling load shall be taken as equivalent to a static load 50 per cent. in excess of the actual rolling load. The positive and negative bending moment at every cross section due to every position of the rolling load shall be properly provided for.

17.—Partitions and other structures superimposed on floors and roofs may be included in the superimposed load, provided the weight of the partition or other structure per square foot of base does not exceed the permissible load per square foot of floor or roof area. Partitions and other structures of greater weight shall be specially provided for.

18.—For calculating the resistance moment the angle of dispersion of a point load through hard filling and concrete shall not be taken at more than forty-five degrees from the vertical.

19.—For the purpose of calculating the total load to be carried on foundations, pillars and walls in buildings of more than two storeys in

height, the superimposed loads for the roof and for the floor of the topmost storey shall be calculated in full, but for the floors of the lower storeys a reduction of the superimposed loads shall be allowed as follows:—

For the floor of the storey next below the topmost storey a reduction of five per cent. of the superimposed load on the floor of that storey, as calculated in pursuance of the foregoing regulations, shall be allowed; for the floor of the next storey ten per cent. of the superimposed load on the floor of that storey similarly calculated; and so on by increments of five per cent. per storey till the reduction amounts to 50 per cent. It shall be taken at 50 per cent. per storey for all floors below.

20.—No such reduction as aforesaid shall be allowed in the case of a building of the warehouse class.

Wind pressure.

21.—All buildings shall be so designed as to resist safely a horizontal pressure equivalent to a static pressure of not less than twenty pounds per square foot of the whole projected surface normal to the direction of every wind.

(For pressure on panels of external walls see regulation 130.)

(a) The compressive reinforcement is anchored by bars extending at least through a depth equal to the arm of the resistance moment.

(b) The anchors are spaced not further apart (centre to centre) than a distance equal to the arm of the resistance moment, and not further apart (centre to centre) than 16 times the least diameter of the anchored bar. (Also see regulations 89 and 90.)

62.—In cases where the compressive resistance of the concrete is not taken into account the stress in the compressive reinforcement may be taken at 16,000 pounds per square inch on condition that—

(a) Sufficient steel is provided to take up the whole of the compression.

Notation for pillars, struts and other compression members.

113.—

- A = effective area of the pillar, i.e., the area bounded by the lateral reinforcement (binding) measured to the inside of the hooping.
- A_b = cross-sectional area of one bar of the binding or lateral reinforcement.
- A_v = area of the vertical reinforcement.
- c = permissible direct compressive stress. (See regulation 42.)
- d = effective diameter. (See regulation 99.)
- f = form factor, depending upon form or type of binding or laterals. See table in regulation 118.
- g = gyration radius of the area [A + (m-1) A_b] about an axis passing through the centroid of the area.
- i = increased stress permissible in the core of a pillar suitably hooped.

l = actual length of the pillar as defined in the regulation numbered 98.

m = modular ratio = $\frac{E_s}{E_c}$. (See regulation 54.)

P = permissible load or pressure on pillars with both ends fixed and with a ratio of virtual length to gyration radius not exceeding 45. (See first column of figures in regulation 122.)

p = percentage of volume of binding or lateral reinforcement with respect to the volume of hooped core in any given length of pillar = 100 V₁.

p_b = pitch of the binding or lateral reinforcement.

s = spacing factor depending upon the spacing or pitch of the binding or laterals. (See table in regulation 118.)

V₁ = volume ratio or ratio of the volume of binding or lateral reinforcement to the volume of the hooped core in any given length of pillar. (See regulations 116 and 117.)

v = virtual length of the pillar, strut or other compression member for different conditions of the ends. (See regulations 122 and 124.)

114.—A pillar, or other strut, shall be deemed to have fixed ends when the ends are sufficiently secured to other parts of the construction having such rigidity as will maintain the axis at the ends in its original position and direction under all loads less than the crippling load.

115.—In a pillar with fixed ends the stress in the concrete in the area bounded by the lateral reinforcement shall not exceed

c, in a pillar with the minimum of hooping or binding

i, in a pillar with more than the minimum of hooping or binding, where

$$i = c [1 + fs V_1]$$

116.—The required ratio of the volume of binding or lateral reinforcement to the volume of the hooped core may be obtained from the equation—

$$V_1 = \frac{i - c}{cfs}$$

117.—The value of V₁ actually provided, in either round or square pillars, may be ascertained by direct measurement or from the equation—

$$V_1 = \frac{4 A_b}{d p_b}$$

118.—

121.—The permissible load or pressure on pillars with both ends fixed and with ratios not exceeding those in the first column of figures in

regulation 122 shall be obtained from either of the equations—

For pillars with the minimum of hooping or binding

147.—All sand shall pass through a mesh three-sixteenths of an inch square measured in the clear.

148.—The sand shall be separated from the coarse material before the materials are measured.

Coarse material.

149.—The term "coarse material" means all the ingredients of the concrete except the sand, the cement, and the water.

150.—The coarse material shall consist of clean Thames or pit-ballast or gravel, hard stone, such as granite, basalt, trap rock, or other hard and equally suitable material. It shall be free from clay or any animal, vegetable, or bituminous matter.

151.—The following materials shall not be used with the sand or coarse material in the composition of the concrete under these regulations—

(a) Coal residues, including clinkers, cinders, ashes, coke breeze; pan breeze, slag and other similar material.

(b) Blast furnace slag, copper slag, forge breeze, dross and other similar material.

(c) Sulphates, including plaster of Paris, and other similar material.

(d) Limestones, magnesian limestones, marbles and other calcium carbonates.

152.—Unless quite clean all coarse material shall be thoroughly washed.

153.—The coarse material shall be of such a size as will pass through a mesh three-quarters of an inch square measured in the clear and be retained on a mesh three-sixteenths of an inch square measured in the clear.

154.—The coarse material shall be varied in size as much as possible between the limits of size allowed for the work, but subject to the provisions of regulation 142 it shall not be larger than such as can pass between the bars forming the reinforcement or between the reinforcement and the centering.

155.—The coarse material if of a porous nature shall be thoroughly wetted before being mixed with the other materials.

156.—The volume of mortar shall be in excess of what would be required to fill completely the interstices and voids of the coarse material.

157.—The volume of the sand shall not be more than twice the volume of the cement.

158.—The volume of coarse material shall not be more than twice the volume of sand.

Concrete.

159.—The concrete shall be composed of cement, sand and coarse material in one of the following or intermediate proportions and the ultimate compressive resistance shall not be less than that specified for the proportion adopted:—

Proportion by volume.			V	Ultimate compressive resistance in pounds per square inch.		Value of one-fourth of u_4
Cement.	Sand.	Coarse material.		1 month after mixing, = u_1	or, 4 months after mixing, = u_4	
1	2	4	6	1,600	2,400	600
1·2	2	4	5	1,800	2,600	650
1·5	2	4	4	2,000	2,800	700
2	2	4	3	2,200	3,000	750

160.—For determining the resistance of concrete, tests shall be made on cubes of not less than four inches each way, or cylinders of not less than six inches each way.

161.—The conditions accompanying the preparation, setting, maturing and actual testing of the cube or other test piece shall, as far as possible, conform to the conditions that would obtain in the actual execution of the reinforced work.

162.—The ultimate compressive resistance of concrete of materials mixed in intermediate proportions may be estimated from the following equation:—

$$u_1 = 2,800 - 200 V, \text{ or} \\ u_4 = 3,600 - 200 V, \text{ where:—}$$

u_1 = ultimate compressive resistance of one month, in pounds per square inch.

u_4 = ultimate compressive resistance at 4 months in pounds per square inch.

V = Volume of the sand plus the volume of the coarse material, per volume of cement, each measured separately and including the voids proper to each material.

163.—All three materials shall be thoroughly mixed dry in batches, and then again thoroughly mixed in batches after wetting, subject to the requirements of regulation 155.

Salt water shall not be used for the concrete.

164.—The concrete shall be placed in its final position before initial set has taken place.

In the case of beams, pillars and walls the thickness of the layers of loose concrete shall not exceed three inches before ramming.

166.—All metal for reinforcement shall be cleaned of all scale, dust and loose rust, immediately before depositing the concrete.

167.—Butt or scarf welding shall not be employed in any tensile reinforcement.

168.—The builder or other person directing the work to be executed shall, for the purpose of due supervision of the construction of the building, furnish the District Surveyor with reasonable proof as to the quality of materials to be used in such construction, and shall make any tests which shall be reasonably necessary.

TESTS AND TESTING.

169.—If at any time during the construction or within two months after the completion of the reinforced concrete construction it is found necessary to test any part of such construction by reason of any sign of weakness or faulty work appearing in the construction, the builder or other person causing or directing the work to be executed shall make such tests, and, if the tests show the work to be faulty, it shall be reconstructed and reinstated in accordance with these regulations.

170.—The total deflection of beams or slabs freely supported and uniformly loaded and subject to the permissible working stresses shall not exceed 1/600th of the span, when the span is 20 times the effective depth, and shall be in proportion for other ratios of span to depth, and for other conditions of ends and stress and loading.

171.—The superimposed test load on any floor, roof or other structure shall be not more than one and a half times the superimposed load for which such floor, roof or other structure has been designed. The superimposed test load on any beam, slab or other similar member which has been exposed to frost during the first week of hardening, shall be not less than one and a half times the superimposed load for which such beam, slab or other member has been designed.

172.—Loading tests shall not be made until the expiry of ninety days from the date of laying the concrete.

PART IX.

FORMWORK OR CENTERING.

173.—For the purpose of these regulations, the terms "Formwork" or "Centering" shall include all forms, moulds, sheeting, shuttering, planks, poles, posts, shores, struts and strutting, ties, uprights, waling and all other temporary supports to the concrete during the process of setting.

174.—The formwork or centering shall be of such dimensions and so constructed as to remain rigid during the laying, ramming and setting of the concrete.

175.—The vertical strutting shall be maintained continuous through the lower storeys to the foundations or to other floors or beams which are sufficiently set to afford the required support without injury to the construction.

176.—All formwork or centering shall be removed without shock or vibration.

177.—Before the formwork or centering under any beam or floor slab is removed the pillars below such beam or floor slab shall be partially stripped so that the pillars may be examined on all sides.

PART X.

WORKMANSHIP.

178. All reinforcement shall be placed and maintained in the position shown on the drawings.

179.—The concreting in any member shall be carried out as continuously as possible.

180.—Where work has to be recommenced on a surface which has hardened, such surface shall be well hacked, swept clean, thoroughly wetted, and covered with mortar composed of equal volumes of cement and sand.

181.—Concrete laid during dry weather shall be protected against too rapid drying. During the first week of hardening it shall be kept damp by means of wet sacking or other methods or by watering daily (Sundays and holidays included).

182.—Concrete shall not be laid when the temperature is below 4° Centigrade (39° Fahr.), and shall be protected when necessary.

183.—Concrete or mortar which has been frozen shall not be used.

184.—The concrete or mortar in any beam, slab, strut, or other similar member which has been exposed to frost during the first week of hardening shall be removed or such members shall be tested as provided for in regulations 169 to 172.

185.—No cutting for piping or any other purpose shall be done which would reduce the strength of any part of the structure below the standard required by these regulations.

186.—Blocks or strips of hard wood, coke breeze or other equally fire-resisting material may be embedded in the concrete and used solely for fixing purposes, provided that—

(a) they do not reduce the strength of any part of the structure below the standard required by these regulations.

(b) the area of such blocks or strips at any given cross section is not included in the calculated compression area of any beam, slab, pillar, or other constructional member.

187.—Soft wood or other equally combustible material shall not be embedded in the concrete.

188.—Wood or other combustible material may be placed on or over the surface of the concrete provided that any voids or hollow spaces between the combustible and incombustible materials be filled up with materials of an incombustible nature.
